

# SCOR-P Virtual Training

Join master instructor  
**Douglas Kent** for the world's  
first LIVE virtual SCOR-  
Professional training

## SCOR-Professional Training

SCOR Professional Training provides an in-depth understanding of the latest version of the Supply Chain Operations Reference (SCOR) model – The Digital Standards – Just released!

During the SCOR® Professional Training, you will develop actionable steps to improve supply chain processes and management by learning from real-life examples and projects.

Attend this session to learn the standardized language of supply chain management and how to:

- Use SCOR® to identify and solve problems in your supply chain
- Identify and support organizational learning goals
- Improve supply chain efficiency from a process and cost perspective
- Organize a typical SCOR project
- Implement well-defined and repeatable processes

Attendees are eligible to sit for the (Online) SCOR examination to obtain the highly sought after SCOR-P certification

## Format

The SCOR Professional Training event is held live virtually over 6 sessions for three hours per session. Participants from ANY location worldwide are welcome! Please have a look at the time zone options we have provided.

Short breaks are offered during the 3-hour sessions.
