

Hurricane Preparedness Guide

Stay Powered & Protected with PPM ECO Kits

Your Essential Guide to Staying Safe, Secure, and Powered During Storm Season

1. KNOW YOUR KIT

Your PPM ECO Microgrid isn't backup.

It's primary power – silent, solar-powered, and engineered to last through 7+ days without fuel or grid input.

- ✓ Solar panels + AI-managed battery storage
- ✓ Works during blackouts – no generator noise, no fumes
- ✓ Installed in homes, estates, clinics, and commercial spaces across FL, TX, CA
- ✓ Pre-season charge & test = peace of mind

Test it weekly. Trust it always.

2. THE 5 ESSENTIALS

When the storm hits, focus on what matters:

Icon	Priority
 Light	LED only. Low draw. High clarity.
 Cool	Keep fridge closed. Preserve
 Connect	Charge phones, radios,
 Water	1 gallon per person/day.
 Safety	Secure windows. Stay indoors. No

Your kit powers these – not the other way around.

3. FOR HOMEOWNERS

You don't need to survive the storm.

You deserve to live through it with dignity.

- Power lights, security, sump pumps, medical devices
- Use smart load management to extend runtime
- Keep communication alive – no dead phones in the dark
- Let your system do the work. You rest.

A home with power isn't just comfortable.

It's calm. And calm saves lives.

4. FOR BUSINESSES

Outage = lost revenue.

Resilience = competitive advantage.

- Keep POS systems running
- Protect refrigeration (food, pharma, inventory)
- Maintain Wi-Fi, servers, security cameras
- Enable remote work – even when the grid is down

Businesses with backup power recover 3x faster.

Don't wait until it's too late.

5. FOR DEVELOPERS & BROKERS

Resilience isn't an add-on.

It's the new luxury amenity.

- Market homes with integrated PPM ECO Kits as "Storm-Proof"
- Command 10-20% higher resale value
- Attract buyers who value independence over convenience
- Partner with us to embed microgrids into new builds – before construction begins

The next generation of Florida real estate won't ask, "Do you have solar?"

They'll ask, "Does it survive the next hurricane?"

6. WHAT HAPPENS NEXT?

After the storm passes:

- Inspect your property for damage
- Reconnect systems safely
- Monitor performance via our app
- Reach out if anything feels off – we're here, not just for installation, but for life

We don't sell kits. We build legacies.

READY BEFORE IT HITS?

Let us help you prepare – before the wind rises.

- ◆ Pre-storm system health check
- ◆ Custom runtime planning for your home or business
- ◆ Emergency support package (priority access)
- ◆ Installation & integration in Miami, Houston, LA, and beyond

**Own your power.
Prepare ahead.
Stay powered through anything.**

PPM ECO – Not just energy. Sovereignty.

By PPM ECO – Where resilience is designed, not donated.
"The grid doesn't fail you. It just stops caring."
Your power shouldn't.
