

Legislating wellness, type 2 diabetes prevention/education.

3500 applicants + \$ 6,300.

Legislation fee creating a new vanity license plate.

Once legislated, 100% of funds go into scholarships for WA teachers, and students in the health or education fields.

These students receive a T. Colin Campbell CNS certification in plant-based nutrition.

Once they pass the certification, they must pay it forward and teach what they have learned in schools, community centers, underserved communities.

This is how we build a bridge to wellness, and work to stop type 2 diabetes!
