Guangdong Be-Tech Security Systems Limited
No.17, Keyuan 3 Road, Ronggui, Shunde
High-Tech Zone, Foshan, Guangdong, P.R. China

Attn: Mr. Ken Liang

Dear Ken

We have tested and certified the OASIS PMS 5.0 interface for the Be-Tech Door Lock system and the interface is named as **OASIS PMS Interface License for BE-TECH DOOR LOCK** supporting the functions below:

- Interface in TCP/IP Ethernet Protocol and in the form of DLL
- New Card (when a guest checks asking for 1 or 2 cards)
- New Card (when a guest lost the card and asks for a new card)
- Duplicate (Additional) Card (when an in-house guest wants a 2nd card)
- Additional (Duplicate) Card (when a shared guest checks in to the same room)

As special arrangement, we have waived the certification cost for the above. This interface is now included in our standard Door Lock Interface selection and end user can order the license as standard interface.

Please read and sign below as your acceptance of the terms and conditions of the licensed interface. Please scan and return by email to admin@oasispms.com

- BE-TECH agrees that the above interface license shall be exclusively used for the interface to BE-TECH system by function.
- BE-TECH agrees not to use or redistribute any of the above licensed interface messages in any other BE-TECH systems or to a third-party company.
- BE-TECH agrees that each interface is licensed by Oasis Hospitality Software Ltd. by function and a separate license fee will be required when used in any other application other than the certified BE-TECH Door Lock system.

Accepted by
Guangdong Be-Tech Security Systems Limited

Name: Ken Liang
Date: 2017.6.21

Ken, for your record, we have installed the OASIS PMS ↔ BE-TECH Door Lock interface in LIVE hotel operations.

Best regards

Wong Wai Yung
Systems Manager
