# ***USPIE* awards Seattle Chief Sealth International High School with January Millstone of the Month**

*School educators fail teen boy for claiming only women can get pregnant*

**COLUMBIA, S.C.** — As the nation’s legislators struggle to define a “woman” and actively work to dismantle common sense biology, American children are being left to fend for themselves against the radical Leftist agenda happening in government schools. *United States Parents Involved in Education (USPIE)*, a leader in the fight for parental rights and government removal from education, announced that the “[Millstone of the Month Award](#)” for January goes to Seattle’s Chief Sealth International High School for failing a student on a biased and inaccurate quiz.

A 10<sup>th</sup>-grade student [reportedly failed an Ethnic Studies World History quiz](#) when asked if only women can get pregnant and only men can have penises. When the student affirmed this biological truth, he not only failed the assignment but was called a “product of the patriarchy that teaches young boys not to care about anything” by the teacher.

***“Let’s face the facts — men cannot bear children,” said USPIE Founder and President Sheri Few. “To assert otherwise is an attack on traditional womanhood. It is absolute insanity for teachers to penalize a student for acknowledging this biological truth. This situation is an indicator of the tragic state of American education. Government schools are more concerned with a political agenda than teaching children the truth. Not only did this teacher peddle inappropriate propaganda in his or her classroom, but the student was then insulted for sticking firm to the truth. This school and the entire district should be ashamed of themselves.”***

For parents looking to assert their God-given parental authority when it comes to their children’s education, *USPIE* has powerful resources that equip concerned citizens to fight back against indoctrination happening in government schools. *USPIE*’s latest film, “[Truth & Lies in American Education](#),” uncovers what is being taught inside government schools, such as critical race theory, Marxist ideology, and anti-American ideals.

***“This situation in Seattle is a clear example of why parents must remain alert and active in their children’s education,” said Few. “If we don’t fight for the future of America, it will be gone much sooner than any of us realize.”***

*Few* has been on the forefront of the fight for educational reform for decades and has been one of the most passionate voices for parental and local control against. “[Truth & Lies in American Education](#)” actually follows *Few*’s own daughter-in-law, April, as she learns about the horrors of the American school system. “[Truth & Lies in American Education](#)” addresses questions such as:

- Are standardized tests being used for data collection?
- Is there a federal education scheme to control the nation’s economy?
- Why is the study of history so often anti-American and anti-Christian?

- Are children being taught to become political activists?
- What is the true aim of “comprehensive” sexuality education?
- How much transgender influence is there in government schools?
- What about critical race theory and the 1619 Project?

“[\*Truth & Lies in American Education\*](#)” is available for streaming on [SalemNOW](#), as well [available on DVD](#). For more information about “*Truth & Lies in American Education*,” [click here](#).

*United States Parents Involved in Education (USPIE)* is a nonprofit, nationwide coalition that seeks to return education to its proper local roots and restore parental authority over their children’s education by helping parents and local communities to escape federal and other national influences. It is the vision of *USPIE* to create a culture where parents, empowered with the authority to choose what and how their children learn, are the undisputed primary educators of their children, where local schools operate in support of families, and where education is unencumbered by federal mandates.
