EMERGENCY VALVE

Your solution for repairs in the field! The “winged spacer” design makes installation as easy as twisting a wingnut.

- TOOL FREE installation
- Fits most standard .453” wheel openings
- Black, Orange, and Red spacers available

ULTIMATE VALVE

A shorter, permanent, ultra-low profile valve stem to avoid valve issues up front.

- 1/2” shorter than our other valves
- Fits most standard .453” wheel openings
- Socket (7/16”) or wrench required for installation

XL VALVE

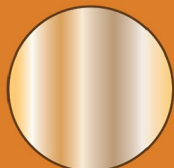

Made to fit larger wheel openings. This includes everything from construction and farm equipment to mining vehicles.

- Fits larger 5/8” (.625”) wheel openings
- Our strongest valve
- Socket (9/16”) or wrench required for installation

Installs from the outside of the wheel

Quality 360 brass components

Installs in about 1 minute on location

20X stronger than standard valves

Made in the USA
