

Broken valve stems are a fact of life. If you're like most off-roaders, you know the frustration first-hand. With normal stems, your day could be ruined and you might damage your wheel or tire. Luckily, there's the Colby Valve.

The Colby Valve is the only tool-free solution for replacing tire valve stems on-location in 5 minutes or less. It's cheap insurance against a ruined day.

No tire removal. No tools. No problems.

**Installs from the
outside of
the wheel**

**Fits all
standard .453
valve holes**

**Installs in
5 minutes or less
on-location**

**20X stronger
than
standard
valves**
