

FIRST MATE

First Mate is the app every boat owner needs for a reliable and enjoyable boating experience

TAKE THE GUESS WORK OUT OF YOUR BOATING EXPERIENCE WITH **FIRST MATE**

First Mate is the first **app** using advanced Naval Architecture calculations to provide you with **vessel duration, range, speed, and engine output** without the need for expensive integrated management systems.

This **app** compliments your navigation equipment and gauges to calculate the information needed to plan or update the voyage in real time.

First Mate Apple

First Mate Google

FIRST MATE Will calculate

- Based on remaining fuel: engine hours till empty and distance till empty
- Planing speed to optimize fuel usage
- Maximum speed
- Estimated engine RPM, fuel burn rate, brake horsepower
- All calculations update when user updates the vessel weight, fluid levels, and seastate.

Print logs of your journey down the river, over the ocean, and around the world!
