Supply Chain Mapping

Logistics

Market Studies

The use cases for data visualization and analytics in Offshore Wind are wide and varied.

Ideal utilizations of the technology are:

- 1) **Supply Chain Mapping** – using multiple data sets, and maintaining current updates to project-phased mapping throughout the EPCOM lifecycle.
- 2) **Logistics** – slow downs impede global operations. Data visualization identifies bottlenecks, and solutions.
- 3) **Market Studies** – Understanding markets from a variety of perspectives, and planning which areas to address when, is key to business strategy.

Brezler, LLC does the heavy lifting for you. Detailed analyses can carry your branding and color schemes, be produced in digital and hard copy formats, and are embeddable in your web site. Reach out via any of the methods below to begin a consultation.
