

INTEGRAL

CYBER PROTECT +

**INTEGRAL IT IS NOW OFFERING A NEW SERVICE
CYBER PROTECT +**

**CYBER PROTECT + IS A ONE STOP SHOP FOR EVERYDAY CYBER-SECURITY
PROTECTION. UNLIKE AN ANTI-VIRUS SCANNER AND REMOVAL TOOL,
THE TOOLS INCLUDED WITH PROTECT + TAKE A LAYERED APPROACH TO
CYBER-SECURITY.**

THE FIRST LAYER IS THE APPLICATION LAYER, IF AN APPLICATION SUCH AS A WEB-BROWSER TRIES TO ENTER A MALICIOUS OR DEEP-FAKE SITE. PROTECT + WILL AUTOMATICALLY BLOCK AND BLACK-LIST THE SITE.

THE SECOND LAYER IS THE REAL-TIME PROTECTION LAYER. THIS LAYER CHECKS ALL DOWNLOADED AND MODIFIED FILES WITH AN AWARD-WINNING SUPER-FAST DUAL-ENGINE SCANNER. INCLUDING MACHINE LEARNING (AI)-SUPPORTED MALWARE DETECTION.

THE THIRD LAYER IS ALL ABOUT BEHAVIOR ANALYSIS. PROTECT + TOOLS CONTINUOUSLY MONITOR THE BEHAVIOR OF ALL ACTIVE PROCESSES ON WORKSTATIONS AND SERVERS AND IMMEDIATELY RAISES AN ALERT IF SUSPICIOUS ACTIVITY IS DETECTED. THIS ALERT IS THEN SENT TO INTEGRAL IT

THE FINAL LAYER IS ALL ABOUT RANSOMWARE DETECTION, USING A CUSTOM-BUILT AI BEHAVIORAL MONITORING APPLICATION, PROTECT + STOPS RANSOMWARE BEFORE IT CAN ENCRYPT ANY FILES. ISOLATING THE MALWARE AND STOPPING THE SPREAD OF THE ATTACK IN ITS TRACKS.

QUALITY SERVICE AND WELL ROUNDED PROTECTION
