

AI IN LEARNING

LESSON 1.1 EXPLORING TRENDS IN LEARNING WITH AI

How does AI benefit learners?

Artificial Intelligence (AI) is used to direct learners to relevant content as they learn on-demand. "Bots" adjust to each learner's preferences to create personalized learning experiences.

AI already influences what we see, read, and buy online. It makes sense that we can expand our learning and social networks with the help of machine learning.

BOT OR NOT?

QUIZ QUESTION: I CAN STORE 700 TERABYTES OF DATA, IN ONE TINY UNIT. AM I A BOT OR NOT?
