

How to turn a kml files into a route in Google Maps

- Open Google Maps on your computer
 - Hit the icon on the upper left that looks like 3 parallel lines
 - In the drop down menu select Your Places
 - Pick MAPS
 - Click CREATE MAP at the bottom of the list
 - Click “Import”
 - Click “Select a file from your computer”
 - Navigate to where you have stored “Mill Bike Rte – Canal Way.kml”
 - The route should then open in Google Maps
 - Click on “Untitled map” in the upper left, enter a name, and save.
-
- Now open Google Maps on your mobile phone. (Often simply the Maps icon.)
 - Click the 3 bars at the upper left
 - Click Your Places
 - Scroll right to MAPS
 - The map you just created should appear at the top. Click it.
 - The route now appears in Google Maps.
