TIMELESS TELO'S™

- Dr. Milam's Tree of Life/Immortality, Vitality and Longevity botanical blend.
- Supports immune health and protects the body from the damaging effects of oxidative stress and toxins.

Environmental stressors such as smoking, inflammatory disease, lack of modest exercise, excessive drinking, chronic stress, lifestyle factors, nutrition and sleep quality can lead to increases in oxidative damage and premature telomere shortening.

Telomeres are repetitive DNA sequences at the ends of linear chromosomes that help maintain the integrity of chromosomal DNA with each cell division. Telomeres length varies from about 8,000-13,000 base pairs DNA letters in length. By age 35, we may lose up to 30-40% of our base pairs and by age 65 as much as 50-60%. As such telomeres length is now recognized as a marker of biological age.

There is increasing evidence that short telomeres correlate with age-associated disease by limiting the ability of tissues to regenerate.

Research also shows that certain nutrients play a key role in protecting and even increasing the length of telomeres in the body. Short telomeres decrease the ability of healthy cells in the body to divide and function properly resulting in accelerated aging and disease. TimeLess Telo's™ contains patent pending, natural compounds shown to help maintain telomere health including Moringa — the most nutrient-dense plant on the planet.

Key Ingredients: Telo95®, Dr. Milam's Longevity & Vitality Blend: Moringa extract leaves, Gynostemma whole herb, Astragalus root, Schizandra berries, Ashwagandha extract root, L-Glutathione reduced, Resveratrol root.

POLYMEAL™

THE HISTORY:

The Polymeal™ concept originated as a diet-based approach for healthier living. In 2003, a group of researchers at the University Medical Center in Rotterdam isolated six key foods (red wine, dark chocolate, garlic, omega-3, fruits and vegetables) that they found to be a helpful part of one's diet.

NEW SPIRIT NATURALS TAKES THE POLYMEAL CONCEPT TO NEW HEIGHTS.

Based on the research of these six foods, Dr. Milam formulated a product called Polymeal™. The concept

was expanded to include more than 100 ingredients. These ingredients including whole foods, amino acids, botanical extracts, juice powders, enzymes, electrolytes, omega fatty acids (EFA), nutraceuticals, proanthocyanidins, flavonoids, carotenoids, phytoestersols, polyphenols, natural fibers, antioxidants, vitamins, prebiotics and probiotics, mineral and trace minerals.
