**Bridgemaster / Workmaster**  
platforms provide safe and ra

*An operator-friendly, heavy-duty underbridge work platform provides safe and easy access for major maintenance work, affording crews high capability for below deck access.*

*Our engineering department welcomes the challenge of custom designing underbridge aerials, as in this special application for Metro-Dade County's downtown people mover viaduct in Miami.*

*Bridgemaster Jr. offers a fully accessorized small aerial unit mounted on a low gross-weight vehicle for low-gross weight rated bridges.*

*Above deck truss structures present no access problems for either our large Bridgemaster-ART-B-4 or our smaller*

Underbridge aerial buckets and work  
rapid unit deployment and recovery.

*High bridge rails do not restrict Bridgemaster's below deck through-truss deployment.*

*Bridgemaster Jr, flat-car mounted flagship unit heads a work-train-consist for inspection, repair and*
