Miniature Red Dot Scopes are the future of handgun sights. I know, that is a controversial statement. I remember when most cops carried revolvers too. I also remember when the Glock was thought of as a fad plastic gun that would not hold up to the rigors of a lot of rounds. Times change. Miniature Red Dot Scopes are showing up on more and more handguns in officers holsters and in the future, I'm guessing that we will see more of them. This is an opportunity to get the latest information on these sighting systems and get some hands on instruction on how to use them.

You DO NOT have to have a Miniature Red Dot Scope to take the class. This is an information based class to help students know the difference between scopes and how to use them properly. There will be some range time involved but not a lot. This is not a shooting class, it's an instructional and informative class. Bring eye and ear protection though as there will be a little shooting just to see out of the sights.

Come out and make up your mind on these. Who knows, you might just find yourself with a new sighting system on your gun that helps save your life.

Directions:

From Rt. 316 (West State Street in Charleston). Turn South on Decker Springs Road. Take second right hand turn and follow the road around the curve. The training center is on your left.

From Rt. 16 (Reynolds Drive, This intersection will have a Marathon Station on the south side of the street and Lincoln Gardens Family Restaurant on the north) Turn north onto Reynolds Drive and follow that to the bottom of the hill where the road comes to a T. <-> Turn left and follow the road. It will take you under the railroad tracks. The road curves to the right, around a large building in the middle of the road. The training center will be just past it on the right.

GPS Coordinates of training building: 39.49319144

-88.19841767

Google Maps understands GPS better than it does the address

Observed Mandates Include:

Use of force
