0800-1600 hrs

DSLETC

3121 Dewitt Ave.

Mattoon, Il.

#### Submit enrollment to:

<https://www.glocktraining.com/Schedule.aspx> Please see instructions below.

Many departments carry Glock pistols; they are a fine sidearm. This course is going to teach you how to diagnose problems with the Glock handgun when they happen. This course will cover the following topics:

Safe action system design, function and safeties, unloading and clearing, field stripping and reassembly, detail disassembly and reassembly of slide, detail disassembly and reassembly of receiver, fires control components configuration and engagement. Multiple practice disassembly and reassembly of entire pistol, options/alternate parts offered, sights and tools, diagnostics and trouble shooting guides.

Students will have to take a written exam with an 80% score to pass. Don't let that scare you off, I've taken this course myself about four times, you will do fine. You get so much practice taking the guns apart and putting them back together that you will have it down by the time a test comes around.

**Enrollment Information:** To enroll in the advanced course, go to the address next to the logo. In order to qualify for this course, you will need to have gone through the basic class which is offered on December 1st, the day before this one starts OR have been an armorer for two years. Any exceptions will have to be made through Glock, it has nothing to do with me.

**At this time it is unknown if MTU 13 will be paying for ANY slots in the class. If we do they will ONLY be available to MTU 13 members. This policy and this flyer will be updated as information changes. As of this moment in time we are simply ONLY hosting the location of the class.**
