This is a Law Enforcement trainer course designed for workplaces that need people with the skills to train in police traffic radar and lidar operation. This course is designed to prepare learners to become a subject matter expert in the operation of R.A.D.A.R. and L.I.D.A.R. speed-measuring devices. This training course mixes current technical facts with adept user knowledge in the teaching and understanding of the workings and enforcement application of radar and lidar for today's law enforcement officer.

#### **CORE Overview**

The purpose of the Core Module is to provide the learner with the knowledge and skills necessary to perform speed enforcement activities.

#### • Learning Objectives

- Need for speed enforcement
- Benefits of effective speed enforcement
- Absolute and basic speed laws
- Safety considerations as they apply to speed enforcement
- Elements of a speed enforcement tracking history

testimony

#### **Course Conclusion Overview**

All the above objectives are incorporated into a written and practical examination. Learners are required to pass both the written and practical with a minimum score of 80% for certification completion.

- Sections Review
- Optional Written Pretest (Administered first day of training)
- Written Posttest
- Practical/Proficiency Testing
- Course Evaluation

**\*\*In addition to the above requirements, for certificate completion of this Instructor course Police officers are required to have at least 3 years of experience operating radar/lidar, complete an Instructor Development Course, and prepare and present a topic related to subject matter.**

**Observed Mandates Include:**

**Legal Updates**

This course is funded by the Illinois Law Enforcement Training and Standards Board.
