About this Course-

This course is designed for both the trainer and the department alike. This course is designed to help teach the trainer, or anyone who would like to be a trainer, what they need to do in order to get their class approved by the state. Emphasis is not only on what they need to do but why they need to do it.

The State of Illinois has mandated that officers complete training on an array of different subjects. Many times officers have completed this training through their own in-service training programs that are being conducted through their department, but not being credited for the training because it is not certified. Without certifications, officers will then have to attend other training simply for the purpose of checking off a training mandate, when in reality, they have already met that mandate if the training had been certified.

This workshop will include an afternoon session on writing Training Outlines and Instructor Biographies. Officers are already conducting training through the department in the form of **Field Training, Crisis Response Team, K9, Defensive Tactics, Firearms, Taser** etc. This workshop will enable this office to get the training that you are already conducting certified so that your department and your officers are credited with the training. **Remember, according to the state, if the training is not certified, it did not happen.** This is your opportunity to greatly enhance the amount of training that you are credited for by letting me help you get the paperwork completed and in turn, the training certified.

At the end of this workshop, officers will turn in completed training information packages, including Training Outlines and Training Officer Biographies. From there, I will fill out the rest of the paperwork, getting them certified.

Observed Mandates Include:

Procedural Justice

This course is funded by the Illinois Law Enforcement Training and Standards Board.
