CONSUMER INFORMATION NOTICE

Applicator Business name: DOWN TO EARTH LANDSCAPING, INC

Address: 705 Wright Debow Rd, Jackson, NJ

Phone: 732 833 7702

The information contained in this letter is required by New Jersey state regulation. We hope that you find it useful.

Your plant health program may consist of multiple scheduled visits during the course of the year. The exact dates of applications may be scheduled upon request. Please check with your DTE Area Manager.

At the time of application, our technicians will be evaluating plant conditions as part of an IPM Program. Pesticides will be applied when they are necessary to maintain or protect the health of your property. Sanitation as well as physical and biological control measures should be considered as a part of a good pest control program. Pesticides may be used as another part of an IPM Program. Pesticides are substances used to control living organisms and vary in degree of toxicity.

The pesticides used on your site are reflective of your contracted turf and plant health program. The pesticides listed under '**2024 TURF & PLANT HEALTH**' are the products that we intend to use throughout the season and include products to treat common turf and plant health issues that may be outside the scope of your contract. Prior approval of pesticide products outside the scope of your contract will be necessary before scheduling. All product labels and MSDS sheets are available upon request.

Environmental conditions and manufacturing constraints may result in the necessity and use of alternative products. Those products are listed separately under the **2024 CHEMICAL LIST**. If these products are needed, a product label and SDS will be provided to you in a timely manner before the start of the scheduled application.

If you have residents that are pesticide sensitive or wish to be omitted from pesticide treatments, please provide their contact information and address when you return the 2024 CIN.

Post-treatment instructions and restrictions will be provided to you during application scheduling. Our technicians will also post signs Throughout the community to inform you that an application was made. These sign(s) must remain in place for at least 72 hours following the application, the community is responsible for removing these flags unless otherwise stated in the service contract. If a subcontractor is used, we will send an addendum to this CIN if they use products not outlined in our CIN.

We are also required to provide the following phone numbers for your use in the event you have questions concerning the materials that we will be using:

NATIONAL PESTICIDE INFORMATION CENTER: (800) 858-7378. For general health and pesticide toxicology questions.

- NEW JERSEY POISON INFORMATION & EDUCATION SYSTEM: (800) 222-1222. For emergency situations.
- NEW JERSEY PESTICIDE CONTROL PROGRAM (609) 984-6507. This number is for pesticide regulatory information and pesticide complaints.

Please sign and return this portion of the *Consumer Information Notice* to us for inclusion in our records.

As the customer, I hereby certify that DOWN TO EARTH LANDSCAPING INC has provided me, in writing, all the information required under the NJDEP Pesticide Control Program's notification program. I have read the information supplied and understand my rights and responsibilities under this program. I also agree to remove the notification sign(s) that they will post on my property, no sooner than 72 hours following each application.

Signed:  Date: 3/7/24
