

Understanding the War

What America is experiencing today is the intentional outcome of a 100+ year communist Movement and a 60+ year Islamic Movement inside the United States. Hostile foreign powers Iran, China, Turkey, Saudi Arabia, Pakistan, Qatar, U.A.E., Egypt, Venezuela, and others use thousands of Islamic & communist proxy organizations inside the U.S. to wage war against America.

While there are many other nefarious global and trans-national organizations and Movements hostile to liberty and the rule of law, the focus of all efforts in this war should primarily be on the communist and Islamic Movements because individuals and organizations which make up these two massive hostile efforts operate seamlessly and effectively at the international, national, and especially at *local levels* where the rubber meets the road.

Evidence in the largest terrorism trials in American history, as well as intelligence and open source information, reveals all of the prominent Islamic organizations in the United States are a part of an organized effort to undermine and destroy America's Constitutional Republic.

This is much more a war of espionage, counterintelligence, propaganda, and subversion rather than kinetic military warfare or mere "violence." This war is primarily being fought in the Information Warfare Battlespace. **Violence is viewed by the enemy as a support mechanism to advance the enemy's much larger non-violent/non-kinetic Lines of Effort.** Hence, the use of the phrase "violent extremism" - including by the leaders of the current administration - plays into a hostile information campaign which drives the narrative away from real "enemies" like communists & jihadis towards the nothingness of "violent extremists."

The *Islamic Movement* declares it seeks to establish an Islamic State (caliphate) under sharia, thereby creating *a hostile one-world government under foreign law antithetical to the U.S. Constitution.* The *communist Movement* seeks to establish a global communist government thereby creating *a hostile one-world government under communism antithetical to the U.S. Constitution.*

100% of all published Islamic Law/sharia mandates warfare against non-muslims until a Global Islamic State is established and sharia is imposed on the earth. Because the Islamic enemy specifically states its basis for fighting is Islamic Law/sharia - hostile foreign law - this is not a First Amendment issue, but an Article VI issue. Everyone who swears fidelity to the U.S. Constitution has a duty to ensure sharia never takes root in the United States. Yet, everywhere there is a muslim community in the United States, sharia is being imposed.

Funding for the U.S. Islamic Movement comes from a myriad of sources to include hostile foreign powers, communist and jihadi organizations, and from local muslim communities which are often able to raise \$500,000 to a million dollars in one night of fundraising. Islamic zakat necessarily funds terrorism and thousands of U.S. Islamic organizations take in zakat money.

The fact all of the jihadi organizations in America are designated non-profit organizations significantly helps them keep more money to wage war against the U.S.

Because of the massive domestic information warfare operations, ignorance by U.S. leaders, and the penetration of key government and societal institutions - religious, media, political, education - America's response to this war has been ill-conceived, underwhelming and inconsequential. Most leaders do not even understand America is at war.

The very people advising the U.S. government on U.S. foreign policy as it relates to the Islamic world, and domestic counter-terrorism strategies are enemies. A few examples include: Hamas operative **Miher Bitar** was the Director of Intelligence for the National Security Council under President Biden; **Abdurahman Alamoudi** - President Clinton's Islamic Advisor for 8 years, founded 2 dozens of the largest Islamic organizations in North America, and created the Muslim Chaplain Program for the Department of Defense was an Al Qaeda financier sentenced in 2003 to 23 years in federal prison; **Arianne Tabatabai** was the Chief of Staff for the Assistant Secretary of Defense for Special Operations & Low Intensity Conflict (ASD SOLIC) and is an Iranian asset reporting to an IRGC Commander; **Imam Husham al Husainy** is a nationally known Islamic leader and Hizbollah supporter who President Trump invited to his 2025 Inauguration; **Rabiul Chowdhury** has access to Mr. Trump and his administration despite the fact he is a Hamas official; Mr. Trump named 3 jihadis, including convicted terrorist **Randall Royer** and senior Hamas/Muslim Brotherhood legal scholar **Hamza Yusuf**, to the U.S. Commission on Religious Liberty; **Amer Ghalib** was named the Ambassador to Kuwait under the Trump administration despite being a jihadi from Michigan; Mr. Trump's administration hosted and fawned over Al Qaeda leader **Abu Mohammad al-Julani**, and allowed Julani to speak at the UN and be interviewed by former U.S. army general and Director of Central Intelligence David Petraeus, who praised the murderer of American soldiers and Marines.

In the history of the world, no war has ever been won by fixing issues or changing policies. Wars are won by identifying and vanquishing enemies.

Because (1) the federal government, as well as all state governments, have refused to identify the enemies in this war or that America is in a war, (2) the federal government is corrupted to the point it functions far from the founding principles, and (3) because these hostile Movements have so infiltrated our society, this war must be primarily fought at the local level.

Victory in this war will only come at the local level when citizens come to a deep understanding of the true nature of the enemy and the war the enemy is fighting, stop depending on others to do what needs to be done, take back their **local counties** and fortify them as independent free governing communities, and re-establish America's Founding Principles of The Law of Nature & Nature's God at the county level. This is why the INTO ACTION training was developed.

Its time to put freedom back on the offensive where it belongs.
