

BARA-MED SELECT HYPERBARIC CHAMBER

The first state-of-the-art computerized hyperbaric chamber.

The **BARA-MED Select** is the first computer-driven hyperbaric chamber in the world.

The only automated system on the market, the BARA-MED Select liberates physicians from manually activating every step of the process. Hospitals save time and resources.

The O.S.C.A.R. computerized control system streamlines patient care.

Objective, auditable record of treatments | Tamperproof, hard copy treatment record | Improved overall recordkeeping accuracy | Medical record software interface

BARA-MED SELECT FEATURES

- ✓ Gurney undercarriage storage™ optimizes workflow
- ✓ SMOOTH RIDE® curvilinear compression profile reduces the incidence of barotraumas by 67 percent*
- ✓ Passive pressure relief mattress safely treats wider patient profile
- ✓ Greater patient internal volume
- ✓ Scans tilt and effective rail placement optimizes space
- ✓ Saves operational costs year after year due to **lower oxygen consumption**
- ✓ Patient capacity up to 700 pounds

A RECORD-SETTER FOR PATIENT CONTINUATION RATES.

The chamber's exclusive SMOOTH RIDE® technology reduces the incidence of barotraumas by 67 percent*, comparing many patients to finish treatment. SMOOTH RIDE creates a curvilinear compression protocol.

THE INDUSTRY LEADER FOR EFFICIENCY.

BARA-MED's hyperbaric chambers save hyperbaric therapy customers approximately \$8000 per year in oxygen costs.**

The BARA-MED Select runs as efficiently as technologically possible, consuming 90 liters of oxygen per minute compared to 240 liters in competing chambers.

REMOTE ONLINE DIAGNOSTIC CAPABILITIES REDUCE DOWNTIME.

Tune-ups and repairs occur without transporting the chamber, reducing downtime to mere hours, compared to days with competing hyperbaric chambers.

INCREASED EFFICIENCY

Automated operation reduces staff time and streamlines treatment workflow.

ENHANCED SAFETY

Advanced monitoring and safety features ensure the highest standards of care.

IMPROVED PATIENT EXPERIENCE

SMOOTH RIDE® technology and patient-focused design increase comfort and continuation rates.

LOWER OPERATING COSTS

Reduced oxygen consumption and optimized performance save thousands in operating expenses.

ADVANCED TECHNOLOGY. SUPERIOR OUTCOMES. TRUST BARA-MED SELECT.

MADE IN THE
USA

*Based on the average cost of gas multiplied by the difference of the first through rate of our competitors and our chambers.

**Based on 90 liters/min for BARA-MED Select vs. 240 liters/min for competing chambers.
