THE KMA SPEC

Architectural Products & Furnishings
Our Amazing Tables Edition!

Bringing you up to date on KMA's unique architectural product collection!

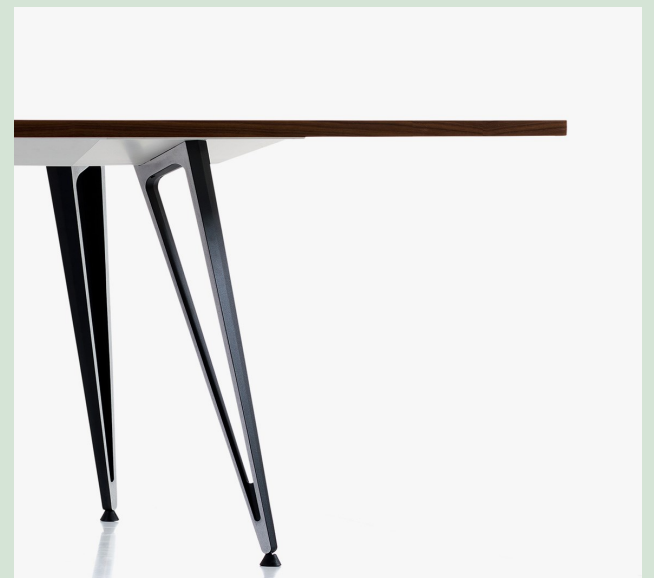

This month we focus our attentions on something for which every project has a need: **TABLES!** Bet you had no idea of the wide assortment of innovative tables our manufacturers offer! We want to encourage you to think of KMA when it comes time to make selections for tables. So we decided to highlight our favorites in this month's newsletter. If you need tables for presentations, conferences, work tasks, dining, childrens' activities, or just to sit a cup of coffee upon, have we got suggestions for you! Please read on and let us know how we can help on your next table project. [See page 2 for updates on many other exciting products.](#)

Left: The elegant and sculptural "Cone Table" from Neinkamper. It's height-adjustable and available with optional power & data.

Left: The colorful "Zoo Desk" by Neinkamper. This collection is sure to bring smiles in any area designed for children. Crafted from sturdy, interlocking plywood forms with laminate in bold primary colors, Zoo tables bring bison, elephants, reindeer, and even giant pieces of Swiss cheese into the realm of kids furniture.

Right: "Attach" part of the Lamhults Collection from InSpec, the newest division of Sandler Seating. This table is mounted on beams of recycled aluminum for almost limitless of shape, size, and design.

Left and Above: The "V-Stack" table from Sandler Seating.—A very versatile stacking table available in multiple sizes and finishes. These are the ultimate go-anywhere—flexible table solution.

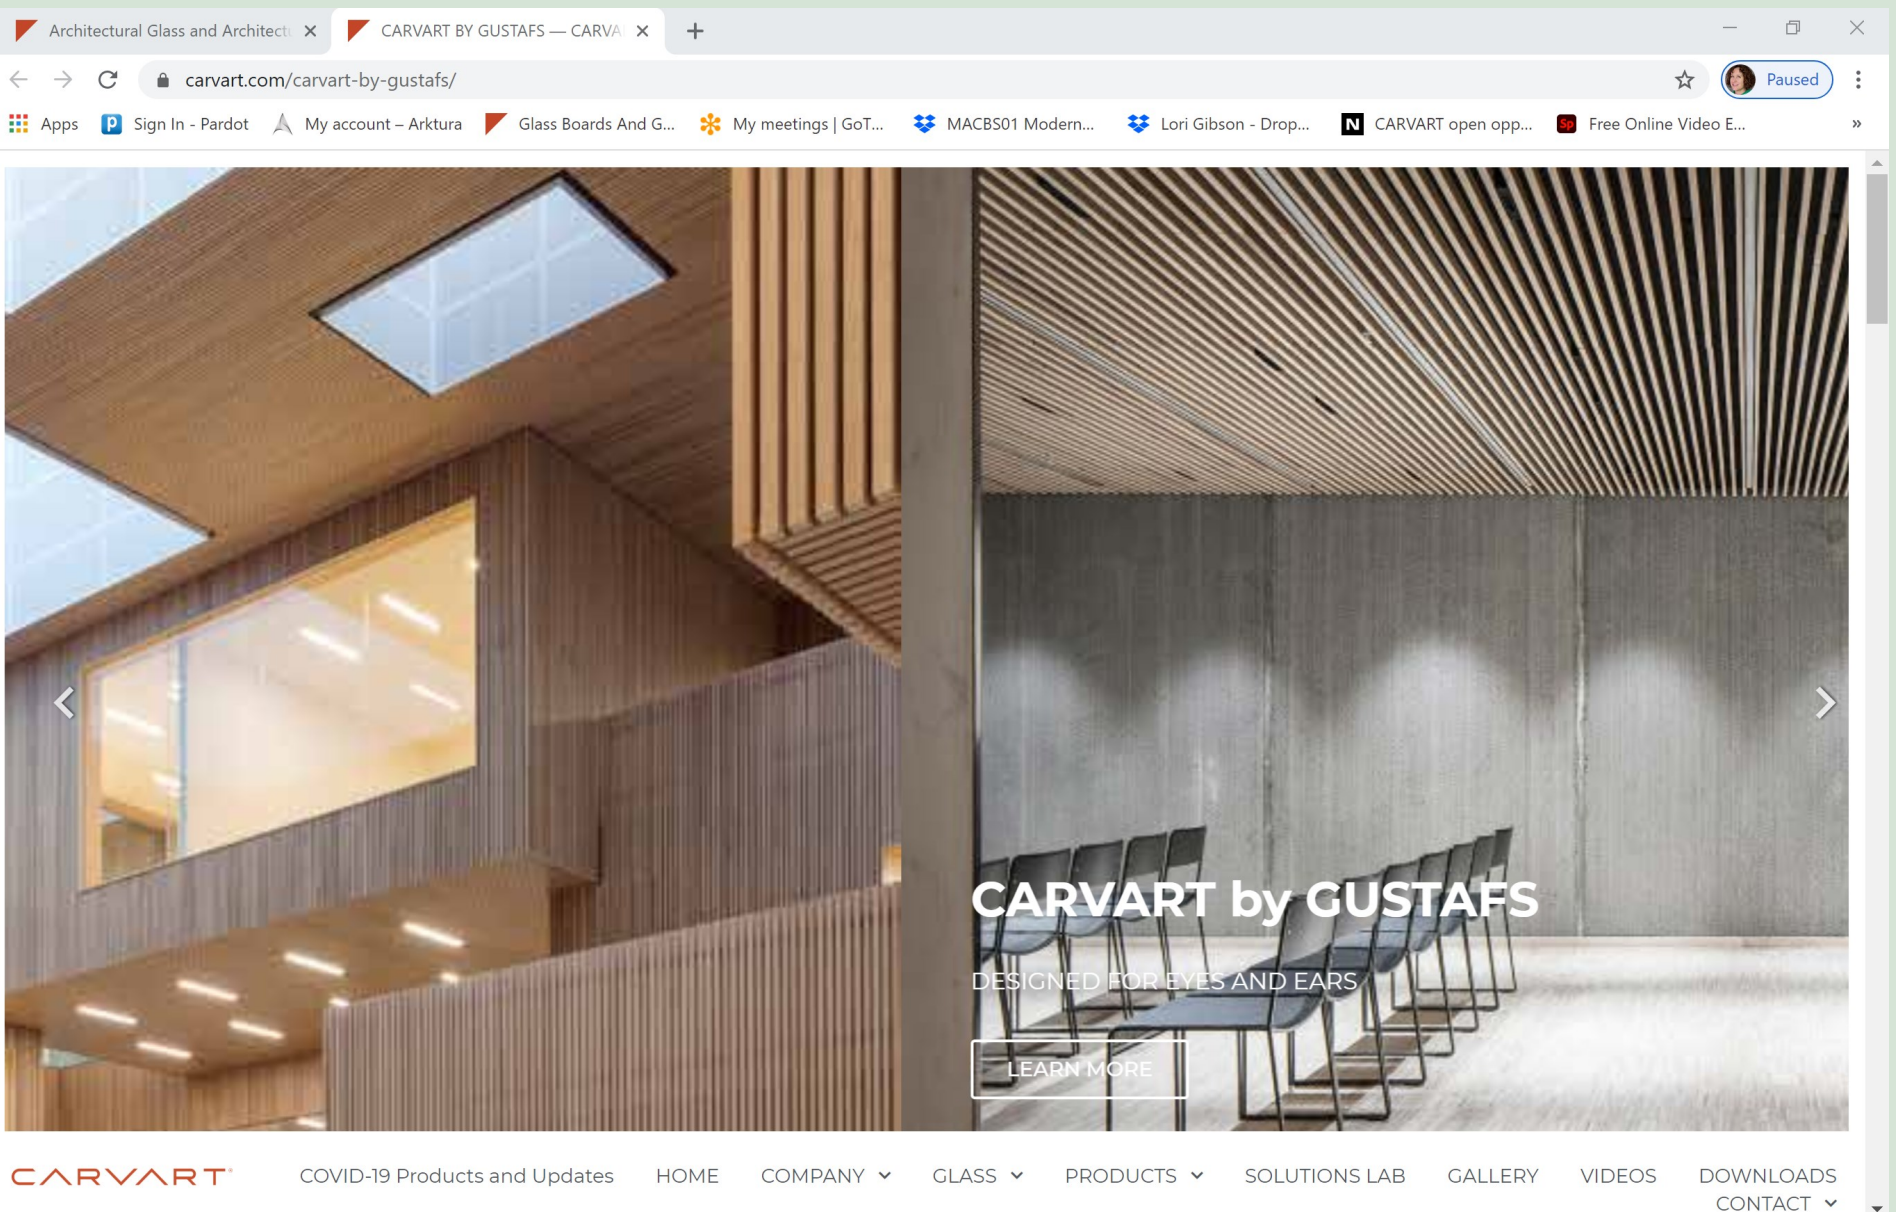

KMA & Associates can guide you to truly unique tables!

Right: Live-Edge tables hand made by Soft Touch Furniture, located in Girard, OH. Isn't this a beauty? These tables are as unique as nature and can be made in a variety of sizes (In fact, the exact size is impossible to determine beforehand, although we can get as close as possible). That's nature!

You can choose from any species you desire, but keep in mind that availability can be limited from time to time.

Soft Touch Furnitures specializes in hospitality projects and is very accessible because of their close proximity in KMA's territories. What's more, you'll be impressed with their custom capabilities and first class craftsmanship.

Have you ever considered **acoustical wall cladding** for a project?

KMA & Associates is please to represent **CARVART by GUSTAF's**, a wall cladding system providing designers the possibility to create exciting and appealing rooms while at the same time ensuring the highest possible well-being for their occupants. Linear Ribs, Planks, and Modules can be used in curved or straight installations and is easily combined with each panel system. With its interlocking components for ease of installation, CARVART by GUSTAF's wall-cladding is fire rated and can offer certified wood and products without added urea-formaldehyde and extremely low emissions.

CARVART by GUSTAF's offers your project superior acoustics. Here's how:

MAKING THE MOST OUT OF YOUR ROOM

When dressed with Gustafs Nano panels, a room reduces not only the disturbing noise of conversations and other human sounds, it also absorbs the noise of machines and other mechanical equipment and thereby reducing the reverberation time to a very comfortable level.

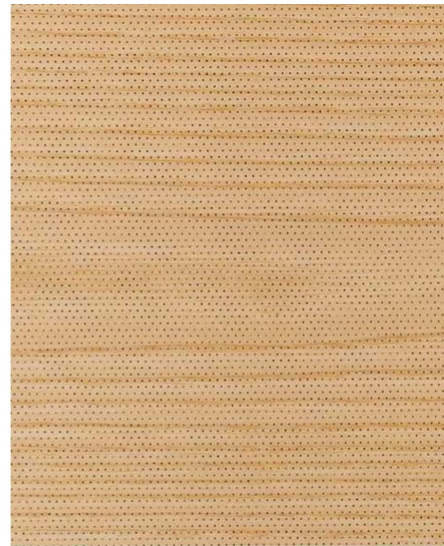

THE CORE MATERIAL

Of course Gustafs NANO's standard core is made of fiber gypsum, allowing a 100% closed joint installation. This core also contributes to the highest possible fire classification for Nano perforation: B-s1,d0 including the veneer.

CONTINUOUS PATTERN

Gustaf Panels are produced with "over veneered" wooden edges. That is why the Nano perforation pattern really reaches all the way out to the edges of a panel, without any bezel. Due to this the installation will appear very homogeneous.

INVISIBLE NANO PERFORATION WITH UNIQUE ACOUSTICS From a normal viewing distance, the Nano perforation is invisible, but the acoustic qualities are excellent with absorption class B (w 0,85). The secret is the combination of two acoustic mechanisms, the Nano holes in the surface and thousands of larger sound chambers in the core. Gustafs Nano is less depending on insulation and air gaps behind the panel, so in general thinner walls can be achieved, saving valuable space.

MORE CEU's for you!

Unika Vaev now has a 1 hr ceu on "Acoustical Concepts" added to the site: AEC Daily.

Go to AEC Daily, www.aecdaily.com, create a FREE account and search for Unika Vaev. You'll find the CEU under our Education tab.

AEC Daily is one of the largest providers of continuing education (CE) to the Construction, Architectural, Interior Design and Engineering communities. Complimentary courses are available 24 hours per day, 7 days per week, with automated credit reporting to numerous organizations across the United States and Canada. Architects, Engineers, Interior Designers and other Construction Professionals rely on AEC Daily to maintain their accreditation and keep them up-to-date with new products and technologies.

A note from our KMA Group:

Times are very strange and un-certain indeed, and even dangerous. Your KMA reps are sincerely hoping that this newsletter finds you healthy and safe. We so miss calling on our design communities and understand that it is best to keep physically distant to preserve our health. That said, we still want to introduce you to new products and keep you up to date as best as we can. For that reason, we can now be seen on our own YouTube channel!

Here you'll find our video collection we have made on various products.

We know you are busier than ever trying to juggle work, family, and more, so we do try to keep it entertaining and short. Please check it out when you have time and check back often as we add more videos from time-to-time.

Here it is!
