## THE KMA SPEC

Architectural Products & Furnishings

KMA & Associates An explosion of new products!

[www.kma.bz](http://www.kma.bz)

Bringing you up to date on KMA's unique architectural product collection!

**Celebration of Independence Day!** We love this time of year! It's summertime! We enjoy sunshine, family BBQ's, backyard fireworks, lightning bugs, swimming pools and no more masks! Something else we are celebrating is the incredible innovation our manufacturers are showing in product development and advancements. We have so many thoughtful, exciting, and inspiring products to introduce for you! We'd shout it from the mountaintops but we'll just settle for an appointment or webinar to meet with you so we can share just what we mean by product innovation. Here is a quick preview in this month's newsletter:

**HEY!! Did you just hear something go BOOM?** Well, we did! And we know it's not a fire-cracker. It's the sound of forceful innovation in the arena of commercial window treatments. Mecho has just launched the amazing new M7 bracket for manually operated rollershades. This is a game-changer KMA & Associates is pleased to bring you. Keep reading!

**Q: Now that Mecho offers 4 different brackets for manually operated shades, how do you know which to specify?**

**A: To help guide your choices, here are the features and benefits of each bracket outlined in our table below:**

If you have been thinking really large spans of roller shades need to be motorized, think again! Sure, motorized shades are the best option for many applications. However, motorized shades are not always necessary now that Mecho offers the M7 bracket for manually operated roller shades.

The highlights of this new bracket are as follows:

- Can lift a shade 30 feet wide X 10 feet high, with one chain using 2 fingers. Pretty cool, huh?
- You can multi-band up to 6 bands within the 30 feet span. Multi-band shades ship with an adjustable coupler to insure the hem bars will line up perfectly.
- You can have a 1 band shade up to 15' wide and 10' high. If you can fit it in the building, that is!
- You can convert this Mecho 7 manual shade, to an embedded battery motorized shade at a future date and not have to waste any of the material. That's flexibility!
- We can surround a project using Mecho 5, Mecho 5X, and Mecho 7, to potentially cover all areas in a building, - all using the same fascia. So practical!
- With other large commercial window treatments hitting clutch limits, bead-chain breaking can result in shade failure. Not so with Mecho 7! The system has been designed with a shock-absorbing urethane bumper to prevent breakage and shade downtime.
- With Mecho 7, you get a 25 year non-depreciating warranty on the bracket and chain. Such durability!

Please visit [www.mechoshade.com](http://www.mechoshade.com) to see more on the new Mecho 7.

**When you want the best, work with the best. The best work with Mecho.**
