THE KMA SPEC

Another Field Trip!

KMA visit the Nienkamper Furniture factory.

Bringing you up to date on KMA's unique architectural product collection!

Your KMA reps have just returned from another fascinating manufacturing tour! This time, it's **Nienkamper Furniture** located in Toronto, Canada.

KMA is very pleased and honored to represent such an esteemed company who has the highest standards in manufacturing, durability and ease of maintenance. Nienkamper's philosophy is to create furniture that responds directly to customer demands in a consistently evolving marketplace.

Nienkämper : Excellence from Design to Delivery!

You may be already familiar with Nienkämper, But if not, please let us introduce you!

Nienkämper is committed to being at the forefront of innovation, collaborating with forward-thinking designers, and pushing the boundaries of technology.

Nienkämper began importing, and later manufacturing under license, classic European -designed furniture in the 1960s and 1970s. As their international profile grew, they began adding American and Canadian designers to the lineup. Today the company is recognized for producing some of the best corporate and residential furniture on the market.

Founded by Klaus Nienkämper, the factory was established in Toronto. Since 1968, it has expanded dramatically. Today it is a 120,000-square-foot state-of-the-art facility producing furniture for shipment around the world.

Nienkämper's proven track record is founded on classic and contemporary designs. While visiting this factory, we were so impressed by the options for customization in many of the product lines and the sleek way technology features are designed for the convenience of the end-user. Nienkämper's reputation as a furniture manufacturer has long inspired trust. Design is respected and in turn, customers are respected. Your KMA reps witnessed the fact that this company does what it takes to deliver the best product and the greatest value in the most efficient and effective way!

Above: Our Host and Nienkamper's Vice President, Anne Marie Snook, demonstrates the **Gateway All-In-One**, a natural addition to the ever-expanding and versatile Gateway Collection giving enormous scope for the widest range of height-adjustable workstations.

Below: Beautiful wood veneers ready to be transformed into stunning furniture pieces. So much to see! We would love to show you more on our next visit to your studio / office!

Left: The molded frame of the **Heartbeat Lounge**. The shape and direction of the alternating seating resembles a wave or a pulse and keeps guests from being seated back to back. Also, the design makes it effortless to spark interaction. Designed to facilitate conversation, Heartbeat suggests sharing a "heart to heart" with your fellow human being. These, at left, are ready to be upholstered. Designed by the famous industrial designer, Karim Rashid.

Above: The Award-winning **Heartbeat Lounge** as it appeared in a 2019 promotional photo. (Note: Unika Vaev is the graded-in upholstery for Nienkamper.) The Heartbeat Chair is shown in Unika Vaev "ZOOM". Color: #35 Aqua.

CAD Files and Revit Files are available for your convenience!
