Non-Plant Food Ingredients:	% By Weight
<i>Seaweed Extract</i>	10.0%

GENERAL INFORMATION

SEAWEED-CONNECT™ is a concentrated seaweed extract of *Ascophyllum nodosum* kelp. It is recognized as an excellent source of natural growth substances as well as minerals and carbohydrates to support plant growth. Components of SEAWEED-CONNECT™ include plant substances that promote growth and cell division. SEAWEED-CONNECT™ is recommended for use in the formulation of specialty fertilizers to enhance their performance and increase their efficacy. SEAWEED-CONNECT™ is manufactured through a proprietary process that maintains intact the natural compounds present in the kelp during extraction. It is not phytotoxic at the recommended rates. When using SEAWEED-CONNECT™ with other products do a jar test before mixing to ensure compatibility.

DIRECTIONS FOR USE

SEAWEED-CONNECT™ can be used on any crop. It is designed for soil or foliar application. Apply foliarly mixed with enough water to obtain thorough foliar coverage. For soil applications ensure proper methods are used to maximize contact of the product with roots or apply through irrigation if so desired. For fertilizer rates suitable to your geographical area or the maximum allowable non-nutrient application rates per acre, consult a trained soil specialist/Certified Crop Advisor.

NOTICE

The statements made on this label are believed to be true and accurate, but because of conditions of use which are beyond our control, NUTECH does not make, nor does it authorize any agent or representative to make any warranty, guarantee or representation, expressed or implied, concerning this material or the use thereof. Neither NUTECH nor the seller shall be held responsible in any manner for any personal injury or property damage or loss resulting to the buyer or the other persons from handling, storage or use of this material, not in accordance with the directions. The buyer assumes all risk and liability resulting from improper handling, storage or use and accepts and uses this material on these conditions.

CROP RECOMMENDATIONS

Corn and Soybeans: Apply 1-2 pints/ac in-furrow with liquid fertilizers.
Cereals (wheat, barley, oats, rice): Apply 1-2 pts/ac at critical stages of growth such as heading. Repeat applications as needed.
Potato: Apply 0.5-1 gal/ac in furrow. Use 1-2 qts/ac when plants reach a height of 10-12 in. Repeat as needed.
Tomato, pepper, and vegetables: Apply 1-2 qts./ac during 15 days after transplant. Repeat every 21 days as needed until fruit maturity.
Fruit bearing trees (apple, pecan, walnut, citrus): Apply ½ gal per acre or 1 gal/100 gals of water at bloom, repeating at fruit set, small fruit stage and during fruit development.
Seedling and transplant production: For seedling and transplant production in seedbeds, greenhouses or nurseries, apply weekly 8-12 fl. oz. of SEAWEED-CONNECT™ for every 100 gallons of water, or mixed with foliar fertilizers in the same proportion.

PRECAUTIONS

SEAWEED-CONNECT™ is nontoxic to humans or animals. Nevertheless, it is recommended that you observe the normal precautions for its application, such as avoiding ingestion of the product, and washing hands with soap and water after handling it. In case of spills, absorb with soil and disperse it in the cultivated area. Harmful if swallowed. Avoid contact with skin, eyes or clothing. In case of contact, immediately flush skin or eyes with water for at least 15 minutes. SEAWEED-CONNECT™ is compatible with most insecticides, fungicides, herbicides and fertilizers. A jar test is recommended prior to mixing large quantities. It is not phytotoxic at the recommended rates. When using SEAWEED-CONNECT™ with other products avoid mixing with highly acidic or highly alkaline materials.
