# this moment

The 2019-2020 school year was unprecedented. On March 13, 2020, all schools in Illinois were closed due to the growing health risk of the COVID-19 pandemic. At the beginning, schools were closed for two weeks, but as time went on, extension after extension occurred, and school never reopened for the rest of the school year. Remote and e-learning took place, and our students and teachers did the best they could with the situation. The school still functioned, and staff and parents tried to do their best to get resources to our students. (Below is a picture of our staff preparing meals to be sent home to the students).

The Class of 2020 lost a lot at the end of their senior year, prom, normal graduation, spring sports, Senior Day, and many other traditions. However, the silver lining was that many new traditions took place, including a parade, yard signs, decorations, and countless other small recognitions.

We did the best we could to finish this Yearbook with the materials we had. Some events and groups were not honored as they should be, but we tried our best to honor the Class of 2020.

Entrepreneurship education seeks to prepare people, especially youth, to be responsible, enterprising individuals who become entrepreneurs or entrepreneurial thinkers and contribute to economic development and sustainable communities. The CEO program is much more than a textbook course. Rather, students are immersed in real life learning experiences with the opportunity to take risks, manage the results, and learn from the outcomes.

# Friday Night Lights

On Friday, March 13, 2020, Governor J.B. Pritzker announced a state-wide school closure effective March 17 in response to the growing COVID-19 pandemic. At the time, the closure was set for only two weeks, but as time passed, the pandemic spread, which forced states to close their schools across the nation.

With the closure of school, also came the shuttering of spring sports. Baseball, softball, and track and field had started practice before the shut down, and were never able to resume. None of the spring sports had games or meets, effectively ending the 2019-2020 competitive sports season.

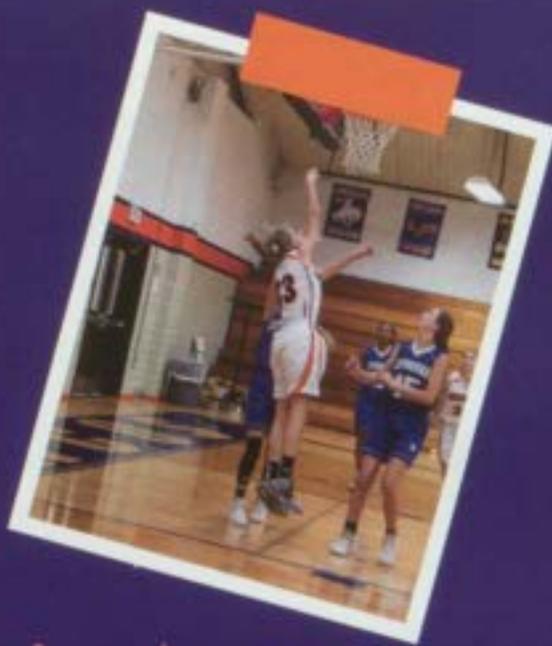

Everyone involved with sports were hit hard, but especially our seniors and their families. Gone were their days on the field or track.

On Friday, April 17, Bement High School took part in the state-wide Friday Night Lights program sponsored by the IHSA, to spend some time recognizing our seniors and what they had missed.

The school lit up the football field and the gym, and the village did the same with the softball field, and our athletes were recognized for their work and accomplishments.

# Graduation 2020

With schools closed, and gatherings of 10 or more people not allowed for safety reasons, Bement High School held individual graduation ceremonies for the Class of 2020, followed by a parade through Bement. The spectators were distanced, everyone stayed safe, and we were able to recognize our graduates.

Salutatorian Ellie Shonkwiler with Board of Education Member Denise Strack.

Our goal is to make it quick and easy for the contractor or hospital maintenance staff to create PROFESSIONAL AND FUNCTIONAL barrier system construction enclosures to simplify hospital infection control.

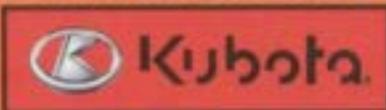

We manufacture reusable, light weight panels that easily fasten together to create a dust-free barrier system construction enclosure. We implement extruded aluminum and tough polycarbonate in our product for a durable, flexible, and lasting deployment.

Our panels meet or exceed infection control guidelines. Hospital infection control departments appreciate the clean appearance of our barrier system panels, temporary walls, construction enclosures and the fact that they are easily cleaned and sanitized.
