Toyota Picks Publishers Home Town for the Name of Its Popular Pickup Truck

2022 Toyota Tacoma TRD Pro (photo Auto News)

by Bill McCallum

Every time I get a new Toyota Tacoma truck to drive it reminds me of my "home town" Tacoma, Washington. To this day I am not sure why Toyota picked Tacoma for the name of their truck. I have often said, the only three significant events in the history of Tacoma were 1- the purchase and development of Point Defiance a 760 urban park including a Zoo, Rose Garden, and Aquarium.

2- The construction in 1891 of what ended up being Stadium High School 3- Toyota naming their popular truck "Tacoma". The national press launch of the Tacoma truck was held at Point Defiance Park, which I attended.

The title to the "best selling truck in America" has long been held by Ford's F-150, but in recent years Chevrolet, Ram, and the Toyota Tacoma have been gaining ground on the leader. The

Tacoma TRD Pro I drove was powered by a 3.6L V6 with VVT-i mated with a 6 speed AT. With 10 safety features including rear parking sonar, blind spot monitor and rear cross traffic alert. With 22 mpg and a base MSRP of \$ 48,640. I would say the Toyota Tacoma TRD PRO deserves a "test drive" if your looking for an "off-road" or "on-road" truck with lots room and packed with "pulling power."

What Legend of Auto Gala GUESTS Have to Say About the Event Held in Monterey During Concours Week

by Bill McCallum

"Bill, Thank you for a spectacular evening with great people and entertainment. We are honored to have been your guests."

Brenda & Robert

"Hello Bill, I think I cried 3 times during the acceptance speeches. So inspiring & heart warming. Can't thank you enough for including us."

Phyllis & Leslie

Thank you Bill ! We had a fabulous night."

Tim

"Bill, you have a great annual event."

Robin

"Bill, Wow ! You really know how to throw a party. Thank you for a memorable evening during Concours week. Hope we can repay you next year."

Josh & Danielle

"Bill, you should be so proud of your contributions to the world of classic cars & the lives of those you've touched in magical ways. You're a kind soul & strong visionary. Thank you immensely for allowing us the privilege of being your guests."

Charley

Please join us as we honor automotive families (Henry Ford, Galpin Ford, Bill Pierre Ford, Rick Case Auto Group) and other Legends including Danny Sullivan, Steve Saleen, Lynn St. James, Barry Meguiar, Jay Leno and other surprise guests including a Tech Giant "Car Guy", at our 2022 Legends of Auto Gala on the evening of August 18th, 2022 in Monterey, CA - see page 26 for Legends of Auto Gala Details

Mazda CX-50 (Story on Page 2 & 16 - Photo Auto News)

The Oil Shortage of the 70's

Bill McCallum
publisher

For those of you that were not around in the late 1970's we had a global oil shortage and a massive escalation in the price of gas at the pump. The event was triggered by the closure of 2 U.S. oil refineries and a lengthy OAPEC embargo of oil exports. Gas was selling for 50 cents a gallon at the time and it jumped to \$ 4.00 a gallon. You heard me right 50 cents a gallon. Talk about inflation. That's an 800% increase. Mass hysteria set in with 1/4 mile lines at service stations across the U.S. Some states setup an "odd" or "even" licenses plate systems allowing you to buy gas every other day with a 5 gallon limit. President Nixon issued an executive order reducing the speed limit on Interstate Highways from 70 mph to 55 mph to save gas. Maybe its time to REVISIT Nixon's policy TODAY ??

The All New Rugged Mazda CX-50

Chris Chung
editor

When Mazda announced that they would have a CX-50 AND a CX-5 in their line up for 2023, I felt perplexed. Why would Mazda have two compact SUVs with similar powertrains and similar pricing? In a segment that holds one of their best sellers (CX-5's) on top of that.

That said, I had the opportunity to test drive the CX-50 Premium Plus recently, and as much as I love the CX-5, I might opt for the new "5-0" if I were in the market for a compact SUV today.

As previously mentioned, the CX-50 shares a powertrain with the CX-5. However, they differ in that the CX-50 is meant to be more "rugged" and off-road capable. The body is longer, lower, and wider than the CX-5 making it a bit like the Subaru Outback. Despite being lower though, the CX-50 has an inch higher ground clearance compared to the CX-5. These aspects combined with an "Off-road" drive mode makes you feel completely in control as you navigate that last mile to basecamp over mud, dirt, steep hills and fire trails.

The CX-50 is also no slouch when it comes to comfort either. The ride quality is smooth and the interior fit and finish are high quality and pleasant to touch.

The CX-50 comes with powertrain options of their 2.5 L

WA. State Adds License Fee For Hybrid Owners

Sally Hanson
travel editor

Every year when my car-tabs come due, I seethe at the thought of being ripped off by the State of Washington once again by having to pay the hybrid vehicle transportation fee of \$75 in addition to the basic license renewal fee and other fees to renew my tabs because I drive a hybrid vehicle.

In 2019—even before COVID-19 reared its ugly head—House Bill 2042 was passed by our misguided legislators to help the state advance greener transportation goals by adding a new \$75 transportation electrification fee for electric and alternative fuel vehicles and a yearly \$75 fee on hybrid and alternative fuel vehicles that are exempt from the alternative fuel registration renewal fee or new transportation electrification fee.

Here's my beef—I use more gasoline than many solely gasoline-inspired engines on the market today. By choice, I drive a Toyota RAV4 hybrid vehicle with all-wheel-drive. My window sticker truly states that this is a "gasoline vehicle" even though

Jeep Wrangler Unlimited Sahara 4xe

Arv Voss
feature writer

Despite its newfound complexity, the 4xe range of venerable Wranglers loses none of its legendary capability or features. The iconic off-road warrior enters the modern era as a four door, five passenger convertible although going sans top is a bit of a challenge. It s now a plug-in hybrid, but one is not likely to be tooling about in electric mode when rock crawling.

Unlike the WWII era Wrangler, today's examples serve up such conveniences as air conditioning and power windows. Other available niceties include leather upholstery, touch screen infotainment featuring in-dash navigation, a Wi-Fi hot spot along with a power soft top. Doors and roofs remain removable.

There are now two new powertrains – the plug-in hybrid 4xe and the monster 470 horsepower V8 that moves the new Rubicon392 down the road. The electrified hybrid Wrangler combines a turbocharged four-cylinder with an electric motor for a generous 375-hp combined output. Along

Honda CRV Test Drive Review

Scot McCallum
"Green Car Guy"

The Honda CRV is considered by most to be the best small SUV's on the market today. The CRV has been a "best seller" for over a decade. The 190-hp 1.5 Liter Turbo generates more than enough power when loaded with gear. The CRV offers 36 cubic feet of cargo space with a suggested maximum load of 1,500 pounds and delivers an overall mpg rating of 28 miles.

I found the ride to be quiet and very comfortable. The CRV is available in 5 trim lines the EX, EX-L, HYBRID, LX and Touring. Two engine options include a 1.5-liter 4 Turbo and a 212-hp 2.0-liter 4 hybrid.

Android Auto and Apple CarPlay are available and CRV models range from \$20,050 to \$34,750. If your looking for a small SUV, I suggest you test drive the CRV at you local Honda dealer.

CRV Sales for the month of April were 18,000 units in the U.S. and the Top Selling model in the lineup for April 2022!

The all-new Genesis G80 offers Looks & Capability

David Schmidt
feature writer

The Genesis, the luxury brand of Hyundai, is trying to do to the luxury segment what the past generation of Sonata did to the mid-sized sedan.

Granted the task is more difficult since almost all luxury vehicles come with almost all the new-tech features and styling is exponentially better than average. But the concept is the same:

Make a stylish and noticeable product that offers significant capability for a reasonable, but not cheap, price... Give people a reason to notice both the car and what it offers and compare it to its potential competition... Let those admirers conclude that the other luxury brands are simply charging too much.

Granted the luxury car market doesn't care overly about price, but they absolutely care about value. Since they are affluent, most of them clearly believe they are not easily fooled. Seeing others possessing a car with the style, flair and capability of this new Genesis G80 may hint that they've been had.

2022 Mercedes-Benz EQS EV

Dave Kunz
LA feature writer

For its first dedicated electric vehicle offered in North America, Mercedes-Benz decided to go big. Literally. The 2022 EQS is essentially the battery-powered version of the legendary S-class, a car that has occupied garages of luxury homes and reserved parking spaces at high-rent office buildings for decades.

Like the gasoline-powered S-class (also new this model year), the EQS is pricey, starting at about \$103,000. But also like the S-class, it really performs. Battery range is estimated by the EPA to be around 350 miles for the EQS 450+, and the sprint to 60 mph comes up in around 4 seconds for the more powerful model, the EQS 580 4MATIC, which boasts a range of 340 miles. As with most premium electric cars, mashing the throttle pedal can send the blood rushing to the back of your head, as maximum torque is nearly instantaneous.

When it's time to replenish the massive battery pack located under the big Benz's floor, a DC quick charge is a cinch at

2022 Ford Maverick Test Drive

Howard Elmer
truck writer

Ford is bringing an all-new truck to market later this year - and it's a compact. Resurrecting a model name from the 70s - the new Maverick compact pickup is partly based on the current Escape. So, while its small its also all truck. With this intro Ford is staking out a new segment in the truck market, one that they inadvertently helped create. How so?

It's no secret that traditional half-ton pickups (like the F-150) have grown to oversized proportions in the past two decades. In fact, when the mid-size Ford Ranger returned to the portfolio just a few years ago it was the size of a pre-millennium half-ton. No small truck help there.

Of course, the rest of the industry has been moving virtually in lock-step with Ford as no one wanted to be caught short as it seemed that the market just couldn't get enough of big trucks. Now, we have over-large half-tons from all the manufacturers.

But in just the past few years there has been push-back. A vocal

Millennials Gain Buying Clout thru Online Buying

Jordan Williams
millennial writer

I recently read two articles this month of November predicting Millennials across the globe to lead a car buying boom in the next six months, writer Alexa St. John of Automotive News and the EY.com staff state.

EY.com stats, which polled 3,300 individuals in nine countries include:

- Almost a third (31%) of people without a car intend to buy one in the next six months
- 45% of those will be Millennials
- Only 6% are looking for an electric vehicle
- Public transport use for work travel especially has declined by 69% from pre-pandemic levels.

Are you ready dealers? Millennials are a comin'! How exciting is this news? Have fun shopping Millennials! I hope everyone finds the car of their dreams. Write to me and tell me what you purchased - even better - send photos!

Until next time - Have a Nice Summer!

1970 Chev Camaro SS/RS Review

Mark Smith
classic cars writer

The 1970 Split Bumper SS/RS Camaro is a knockout design by any standard. The hood on this model is near perfection. The highlights and shadows create the illusion of curves folding into curves. The gaping grill - like a vintage racing car with a deep surround. Details and more details. The styled pontoon fenders, inboard marker lights with a catwalk trim, round simple taillights - and a minimum of chrome. This design is wonderful and timeless.

This one is gold. Nail polish gold. A black vinyl roof with stainless trim to create a formal hardtop look. This car is low, wide and stanced - as delivered! I think that this car's design is in the pantheon of General Motors design work, as produced - maybe in the top ten. This is a 55k original mile car, for better or worse. The originality is superb, its current condition: in need of a caretaker. Documentation - enough to fill the trunk. Some recent mechanical work to keep it on the road, but nothing comprehensive. The interior is well worn. Trashed, really. But

Las Vegas SEMA Recap

This year may have been the best year ever to attend the SEMA Show. Why you may ask? Well it had a whole new spark to it. Coming off of a terrible 2020, the industry survivors were excited to show off what was new and to see who was still in business. Was SEMA a little smaller this year? You bet and frankly in our view, it made it better. People were more relaxed and anxious to talk and share, plus there were new parts, new innovations and new displays in nearly every inch of the 1 million square foot convention center.

We called it the industry's biggest "lie detector" because your company either made it or it didn't. Some companies choose not to attend, perhaps driven by budget concerns or fears of contracting COVID-19, but either way not being there sent a negative message. SEMA is one of the conventions that's not an option and that was especially relevant this year with "public attendance" for the first time in SEMA's history. For less than a \$100 ticket, the retail

Community Stewardship, it's our responsibility.

I have been leading a military family focused nonprofit for nine years, from start-up mode to sustainment. This deviation from my consulting and entrepreneurial path has given me a broader understanding of how our communities are shaped, and how they are transformed.

As a submarine veteran and military child, I know the military challenges. But in my post-military life, I became somewhat of a professional problem solver. Twelve years ago, I began volunteering for a nonprofit that served military families. I was astounded seeing all the agencies that provided sustainment support, without focusing on the long-term. Families were being given a fish, not taught to fish too.

So, I worked to create Support the Enlisted Project (STEP) to compliment those community services, providing the other side of the coin, where our focus is making their current financial crisis their last crisis.

This is one example of how communities are improved.

"It's ALL-NEW" Range Rover Review

The all-new New Range Rover debuted in Grapevine last week at Land Rover Grapevine, a Park Place Dealership. The vehicle is now available in both short and long wheelbases, so you can decide on the length you need. (As well as the monthlies you want to bite off! Ed.). There is also an extended-range plug-in hybrid (PHEV) model that will be available for order in mid-2022. The new 434 horsepower powertrain provides 62 miles of near-silent pure electric driving; around town use electricity and on the road you use a little gas.

The New Range Rover will offer voice control with Amazon Alexa built in. In certain markets using natural voice commands enables customers to manage everything from their favorite music track selection to navigation, or phone while keeping their hands on the wheel. Range Rover has been awarded the PIVI pro infotainment technology and is elevated by the New Range Rover's latest and largest

Galpin Ford An American Success Story

I am a fourth generation Native Californian and attended high school during the mid 1950's in Southern California. Cars were the big excitement along with movies and music. People would rush to the Auto Show at the Pan Pacific Auditorium and view their next dream car. Auto dealers were scattered around various towns within Los Angeles County and existed "few and far between" compared to today. The population explosion hit and so did auto dealer growth.

No business, organization or government is any better than the character of the person at the top. When that person's creed is "If you strive to put God first, family second, business third and everything else - including yourself - somewhat after those three, you set a tremendous example for your family, your employees and your customers", you have something special.

President Ronald Reagan once said, "When I think about what's right in America, I will always

Honda had a Record Year for both CR-V Hybrids & Accord Hybrids

Honda was the #3 selling retail brand in the U.S. for 2021 and #1 selling brand for first time millennial and Gen Z buyers. This is one reason why Honda had a record year for both CR-V Hybrid and Accord Hybrid sales and the 5th straight year of electrified growth. The CR-V is the Honda brand’s best selling model for the past decade.

The Honda CR-V Hybrid comes in three trim lines; Hybrid EX, Hybrid EX-L and Hybrid Tour-

ing. Power comes from a 2.0-liter 4hybrid mated with a CVT Transmission producing 212 hp.

The base price range is \$25,750 to \$36,750 depending on options.

The value continues with an overall MPG rating of 28 to 35.

While the “one-off” direct selling EV makers continue to crow about future sales and potential order lists, companies like Honda will leave them “in-the-dust” in the GREAT EV RACE TO MARKET.

Honda CR-V Hybrid (photo Auto News)

NWAPA Announces 2022 Northwest Outdoor Activity Vehicle of the Year

After two days of on- and off-road evaluations, the automotive media professionals of the Northwest Automotive Press Association (NWAPA) named the 2022 Jeep Grand Cherokee 4xe as the Northwest Outdoor Activity Vehicle of the Year. This marks the first time in the 27-year history of the event (fondly referred to as “Mudfest”) that a plug-in vehicle has won the overall title.

“The 2022 Jeep Grand Cherokee 4xe marks a new era in the SUV market,” says NWAPA President John Vincent of U.S. News & World Report. “It’s a no-compromise vehicle that blends Jeep’s legendary off-road capability with outstanding on-road manners, impressive fuel economy, and the ability to travel on electricity alone.”

Members of the NWAPA spent two days evaluating 20 SUVs, crossovers, and pickups on specially prepared courses at the Ridge Motorsports Park in Shelton, Wash.

The first day of testing consisted of on-pavement courses designed to allow evaluation of acceleration, braking, road manners, and handling. The second day was all about off-road performance, with challenges crafted to evaluate traction, clearance, articulation, and the latest in off-road technology.

There was broad consensus that 2022 brought us the most diverse – and most competitive – field in the history of the event. Awards were earned in seven categories, and an overall winner was named.

- Subcompact and Compact Family – **2023 Mazda CX-50 Turbo Premium Plus**
- Runner up – 2022 Subaru Forester Wilderness
- Mid-and Full-Size Family – **2022 Jeep Grand Cherokee 4xe**
- Runner up – 2022 Kia Sorento PHEV
- Compact and Midsize Luxury – **2022 Genesis GV70 AWD 3.5T Sport Prestige** (repeat winner)
- Runner up – 2022 Acura MDX Type S
- Full-Size Luxury – **2021 Genesis GV80 AWD 3.5T Prestige**

2022 Ford Maverick Test Drive Review by Howard Elmer

continued from page 3

group had started saying - enough! - we want a smaller truck. Ford is answering with the Maverick; a true compact.

But they aren't the only manufacturer who is listening. In fact, a new player, Hyundai has chosen this year to also bring an SUV based compact truck to market - the Santa Cruz (one that they showed years ago in Detroit - then sat on). It also looks promising as a compact and has gotten positive buzz. However, Ford's entry, the Maverick, is going to be the real catalyst in this compact category; one that

I expect the other truck builders will also dive in to. Just watch Ram - that's my prediction.

The all-new 2022 Ford Maverick is the truck for people who never knew they wanted a truck, says Ford. I'm not sure I agree with that statement. But I understand that they expect to draw in new customers to the truck market; however, I really think the bulk of sales will be to current truck owners who will consider the new Maverick right-sized for their needs. So, while size is one thing, Maverick is also aiming at the winning trifecta of low price and decent fuel consumption, which

will also make it the entry-level truck choice.

Maverick will be powered by

a hybrid that promises good fuel economy and will be priced to start at \$25,900 in Canada. The fact that

Ford released the price at the same time as the truck news dropped **continued on page 8**

2022 Maverick Towing a Trailer (photo Howard Elmer)

Jeep Wrangler Review by Arv Voss

continued from page 2

with the extra electric power, the 4xe powertrain is also capable of delivering up to 25 miles of electric-only motoring and a potential zero-to-60-mpg time of 6.0 seconds. The 4xe hybrid system is only available on four-door Unlimited models and the battery pack's placement under the rear seat allows the plug-in Wrangler to keep the same ground clearance and capability as non-hybrid models.

Wranglers may be fitted with only the basic essentials or they can be topped off with up to date infotainment features. The infotainment interface is dubbed Uconnect and is easy to use, readily responsive, and it can be displayed on a touchscreen, which is available in three sizes. Apple Car Play and Android Auto are optional, as is a nine-speaker Alpine audio system and navigation.

Wranglers are not the most spacious or accommodating SUVs

available in today's marketplace, but they offer a smooth combination of heritage and modern Jeep flavor. There's a commanding view of the road - or off-road, which makes for ease of maneuverability, however the rearward view is hampered by bulky roof pillars, roll bars, and grab handles. The Wrangler offers enough room for groceries and gear, but the rear seats don't fold flush with the floor.

Unfortunately, Jeep offers only a limited number of optional

Wrangler 4xe (photo Arv Voss)

Soul, electrified.

The soul has many aspects. It is variable and constantly changing. When viewing the Porsche Taycan, it reveals itself by a smile that expresses total delight. The Taycan is uncompromising and perfect for the everyday. Striking proportions, timeless and instantly recognizable design. With a spacious interior and two luggage compartments, providing comfort and convenience for four.

Experience true electrified performance.
The Taycan Turbo S.

PORSCHE

driver assistance features, but not high-tech gear that one expects to see on vehicles in their elevated price range. Key available safety features offered include: blind-spot monitoring, rear cross-traffic alert and rear parking sensors.

MY Jeep Wrangler tester was an Unlimited Sahara 4xe which wore a Billet Silver metallic exterior coat and came with a Black interior. The base sticker read \$47,995. with the as tested price rising to \$54,030. after factoring in the extensive list of optional fare. In terms of warranty, a standard package that includes limited warranty and powertrain policies, all 2021 models come with a limited warranty that covers 3 years of free maintenance or 36,000 miles and a powertrain warranty covering 5 years or 60,000 miles.

Electric off-roading? The 17.0-kWh battery pack is claimed to provide up to 25 miles of electric-only driving, which the folks at Jeep say is enough for a few hours of low-speed off-roading, and that when the battery runs out, the turbocharged four-cylinder is capable of powering all four wheels like a conventional Wrangler, so there's no need to be concerned about being stranded in the wilderness without charging capability.

The Wrangler 4xe is undeniably the most complicated Wrangler ever with its. 2.0-liter turbo-4 coupled with a 17.3-kwh battery pack, the motor generator, and an electric motor for a total combined output of 375 hp and 470 lb-ft of torque and also an 8-speed automatic transmission and full-time four-wheel-drive system with a 2-speed transfer case. Even with all this, the power is available on command while functioning in the background. Run in Hybrid mode and the system will default to Electric mode if there's enough power in the battery pack and one isn't calling for all the power. When the energy runs out of the battery pack, the 4xe runs like a typical hybrid.

Range Rover Review by Harold Allen

continued from page 4

touchscreen, a 13.1-inch curved floating screen.

The interior is extremely clean and uncluttered – and intuitive. Range Rover’s relative simplicity allows you to watch the road rather than watching the dash. Notably, even the base New Range Rover SE boasts 20-way heated electric front seats with power reclining heated rear seats; SE seats are covered in Perforated Windsor and complemented by Duo-Tone headlining.

The New Range Rover SV comes with the most advanced engineering ever offered, with a new 523 horsepower twin-turbocharged gas engine as its centerpiece. Looking at the vehicle from front to rear you know you’re looking at a Range Rover – it’s not just another SUV

going down the road.

This gives you a brief overview, but it is a gorgeous vehicle. Beyond the New Range Rover, the lineup continues to include the Range Rover Sport starting at roughly \$70K, the Range Rover Villar beginning at \$58,000, the compact Range Rover Evoque starting in the mid-\$40s, the rugged Discovery at \$56K and its smaller sibling, the Discovery Sport at \$43K.

The New Range Rover starts at around \$100,000 and tops out just a tad over \$200,000. You can design your New Range Rover to fit your personal needs – making your vehicle unique makes these vehicles so unique. Availability for the New Range Rover will be mid-year.

2022 Range Rover (photo by Harold Allen)

David Schmidt's Test Drive Review on the All-New Genesis G80

continued from page 3

This 2021 G80 is an all-new platform shared with its sports-ute sibling, the GV80. It is a rear-wheel drive platform with room for an all-wheel drive system. It is also slightly larger than the Mercedes, BMW, Audi, Lexus and Infiniti models with which it competes.

But it’s not the data that are the threat. It’s the looks and the satisfaction which comes from driving it. At this point I must make a confession. I own one of these, the G80 AWD 3.5-liter Prestige. That’s the one with 20-inch alloy wheels, Nappa leather seats, the 12.3-inch 3D digital instrument cluster, the HUD, and microfiber suede pillars and headliner. Total MSRP

came to \$69,195.

The base model, the G80 2.5T, starts at \$48,745, and comes with 18-inch wheels, leatherette seats, piano-black trim, dual-zone climate control, an eight-inch LCD driver information display, front and rear parking sensors, and a pretty extensive suite of safety features that include forward-collision avoidance assist, lane-keeping, blind-spot collision-avoidance, driver attention warning, and smart cruise control with the very excellent Highway Driving Assist II.

The styling is striking. I’ve been asked numerous times what kind of car this is – and interestingly been asked three times if it’s a Bentley. Not a

bad day when you’re compared to a car costing at least an extra \$100,000. However, more importantly it is surprising how many teenager’s heads snap around to look at it. Come on, this is a full-sized sedan, what are kids doing admiring it?

It is probably because it is worth looking at.

Hyundai let the designers have their head, and the result is a sedan with perfect proportions. The hood is correctly long. The roofline flows just right into the body and the appropriate angle. You will know it is right because every time you walk up to the car you compliment yourself on your good taste.

The all-new Genesis G80

Miami's Bomnin Chevrolet locations become #1 and #2 for General Motors sales worldwide, Bomnin Volvo earns #1 for Volvo in USA

The accomplishments were earned despite global supply chain issues, microchip shortages

Bomnin Automotive Group, one of the largest and fastest-growing auto groups in South Florida, once again lived up to its slogan “Committed to Excellence” as three Bomnin dealerships were named the largest in the country in 2021.

Bomnin Automotive Group proudly announced the following:

Bomnin Chevrolet West Kendall is officially the largest new Chevrolet dealer in the world with 4,741 new Chevrolets sold in 2021

Bomnin Chevrolet Dadeland is the second largest new Chevrolet dealer in the world with 4,667 new Chevrolets sold in 2021

Bomnin Volvo is the largest new Volvo dealer in America with 1,760 new Volvos sold in 2021

Bomnin Chevrolet West Kendall and Bomnin Chevrolet Dadeland

sit only eight miles apart, but were able to become the two highest volume Chevrolet stores in the world during 2021, an outstanding achievement considering South Florida had previously been a predominantly import and luxury market.

In Bomnin Volvo's first full year in business, the team delivered 1,760 new Volvos during 2021, ranking as the #1 Volvo dealer in the nation nearly every month. Bomnin Volvo sold more than 17 percent more new Volvos during 2021 than the nation's second leading Volvo dealer.

“This was truly a team achievement. Our team's hard work, dedication, conviction, and ‘Commitment to Excellence’ culminated in these remarkable accomplishments,” said Arnaldo Bomnin, Bomnin Automotive Group's founder and CEO. “I cannot think of a better way to express my gratitude than to thank my team from the bottom of my heart and say, ‘All the Glory to God.’ I am humbled and grateful for what we were able to accomplish during a year of supply chain and pandemic-related uncertainty and am looking forward to what the future has in store for the Bomnin Auto Team.”

In addition to being known as one of the top vehicle retailers in America, Bomnin Automotive Group is also known locally in south Florida for giving back to the community, recently hosting a Thanksgiving turkey giveaway, as well as partnering with Miami-Dade County Police for a Christmas Toy giveaway.

“While we are overjoyed to

announce these incredible accomplishments, we would like to thank you, the community, for choosing us as your preferred Chevrolet and Volvo dealerships,” said Bomnin. “We sell cars, but our passion is giving back to the community.”

Bomnin, who fled Cuba to immigrate to America in 1996 with nothing but a gold watch and three gold rings to his name, now owns and operates seven franchises under six rooftops, which include Bomnin Chevrolet Dadeland, Bomnin Chevrolet West Kendall, Bomnin Cadillac Chevrolet Homestead, Bomnin Mitsubishi, Bomnin Volvo Cars Dadeland and Bomnin Chevrolet Manassas.

Upon moving to the United States, Bomnin began landscaping and selling avocados and lobster on the streets of Miami. One day, while selling lobster at a Miami dealership, the General Manager observed his extraordinary sales skills and offered him the opportunity to become a sales associate.

Bomnin continued exemplifying his incredible work ethic until he acquired his first dealership in 2010, turning it from a dealership selling about 70 vehicles a month to the #1 Chevrolet dealership in the Southeast for five consecutive years from 2016-2020. In 2021, that dealership ranked second place, only behind its sister dealership, Bomnin Chevrolet West Kendall.

For more information on Bomnin and his many award-winning dealerships, visit <http://www.bomninchevrolet.com>.

2022 Ford Maverick Test Drive

continued from page 6

shows how serious they are about cornering this market. Right size, cheap on fuel, low entry price – this could be a winner.

Maverick has the Ford pickup truck “look” including the drop-down side windows and a front end that stretches edge to edge. It looks squat and planted. Despite its size Maverick's upright and squared off shape is great for space efficiency, inside and out. Maverick is offered in three trim levels – XL, XLT and Lariat. An FX4 package will also be available with the AWD XLT and Lariat trucks. This package will offer more off-road capability; all-terrain tires; suspension tuning and additional underbody protection. There is also an electronic AWD drive mode dial with modes like Mud/Rut and Sand, as well as Hill Descent Control.

Maverick will come as a five-passenger, four-door pickup only. That full-hybrid powertrain has a projected fuel number of 5.9 L/100 km/City – or about 800 kms on a single tank of gas.

Maverick's base engine is a 2.5L Atkinson-cycle four-cylinder hybrid powertrain. It makes 19 hp (this number includes the electric motor) and 155 lb.-ft. of torque pushed through a continuously variable transmission (CVT) driving the front wheels. This base package offers 1,500 lb. of payload and max tow of 2,000 lb. However, a second optional powertrain pushes that tow number to 4000 lb. That setup features a 2.0L EcoBoost gas engine making 250 hp and 277 lb.-ft. of torque. The transmission is an 8-speed automatic and comes standard with all-wheel drive.

Hollywood Film Festival is a Sponsor of Legends of Auto Gala

continued from page 4

Side Story” was the first openly queer woman of color to win for acting as Best Supporting Actress.

Leading up to the Oscars® we were invited to be part of international fashion designer Shekhar Rahate's new tv show with celebrity psychic and creative entrepreneur Laura Powers and Keri Norley of The Wealth Alchemist podcast. The show is about designing and styling for award shows with executive producer Anjanette Miller.

The iHollywood Film Fest core team with Arati Misro, Michelle Tabrizi-Ortiz, Terri Tilton and iHollywood Film Fest founder Joyce Chow came out to celebrate Hollywood's biggest night of the year, Oscar® Sunday at The Academy Museum of Motion Pictures, by the Academy of Motion Picture Arts and Sciences. Oscars® Night at the Museum was the first Oscars® after opening this past September at an estimated cost of \$482 million.

The Academy Awards® ABC preshow taping began the afternoon. There were plenty of photo opps with red carpets, photo booths, passed hors d'oeuvres, museum tours and The Oscars® Experience to remember an unforgettable day and evening. The Academy Awards® was viewed in the David Geffen Theatre reminding one of the upcoming Cannes Film Festival.

Today everyone's still talking about Will Smith smacking Chris Rock during the Academy Awards® while we were getting the boot from the Academy Museum. It's all about the experience and the memories whether it's Oscar® Sunday, the feel of the road in your wheels or the upcoming iHollywood Film Fest film festival as we align entertainment creatives, spirit and technology.

AMR 2022 welcomes new supports in the new host city

The Auto Maintenance and Repair Expo (AMR) is set to return from 24 to 27 March 2022. On the strength of nearly 40 years in the Jing-jin-ji (Beijing, Tianjin, Hebei) region, the show has developed into a highly internationalised annual event for China's automotive aftermarket industry. Its relocation from Beijing to the new state-of-the-art National Convention & Exhibition Center in Tianjin brings along new supporting organisations. The move aims to propel the business platform forward, offering opportunities to showcase products and exchange information alongside the country's latest economic development strategy for domestic and international markets.

In recent years, supportive policies have boosted the development of the Jing-jin-ji city cluster. As the host city of AMR, Tianjin, in particular, is one of China's major car manufacturing hubs covering the entire auto supply chain from parts manufacturing to car making and aftermarket services.

For example, a number of leading carmakers like BYD, FAW-Toyota, FAW-Volkswagen and Great Wall Motor with bases in Tianjin are reaping the benefits of the city's geographical location and flourishing automotive market. In 2020, the city saw 3.29 million vehicles on the road [1]. Furthermore, players produced 1.26 million car units, contributing to the city's auto manufacturing industry that marked a value of RMB 230 billion (USD 36.04 billion) [2].

In November 2021, the Tianjin's local government expanded on its strategic blueprint to further elevate the city's automotive community [3]. This includes everything from manufacturing, consumption, trade, finance, driving culture, the used car market and aftermarket.

Ms Fiona Chiew, Managing Director of Messe Frankfurt Traders-Link (Beijing) Co Ltd, said: “Relocating AMR to Tianjin aims to assist various stakeholders in the auto repair and maintenance sector take on the region's rising opportunities. As a result, players from the entire aftermarket value chain can collaborate and grow together by taking advantage of the comprehensive resources from this high-quality business platform.”

To illustrate, the next edition will host an expected 1,000 domestic and overseas exhibitors, showcasing 8,000 leading brands across 100,000 sqm of exhibition space. Displays will cover auto maintenance, repair, parts and components, car care, accessories and customising, supply chain, new energy vehicle aftersales service and commercial vehicle.

New supporters and new product zones

The upcoming AMR is welcoming new industry associations and supporting organisations as an upshot of branching out in the new host city. They will introduce product zones at the show that shine a light on growing trends and address unique local market needs.

For example, the new Made-in-Tianjin zone, organised by the Tianjin Automotive Aftermarket Industry Association, will convene companies from Tianjin that reflect the city's capabilities in auto parts manufacturing across to car making.

On top of this, Tianjin has been identified as a key economic developmental city and an expected boost of local spending sets to accelerate car making. In fact, Tianjin saw a 73 percent growth of value in the automotive manufacturing sector during the first quarter of 2021. With this, the area is becoming a distinguished automotive manufacturing hub; there are already more than 300 car parts and components makers in Tianjin with an individual yearly turnover of over RMB 20 million, of which over 200 of them even reached RMB 100 million [4].

G+D presents new security chips for the connected car

Giesecke+Devrient (G+D) is launching Sm@rtSIM® CX Luna 1.3M, a new range of security chips for the automotive industry.

They are based on Infineon's next generation SLI37 automotive security controller and offer a multifunction platform for eSIM applications, IoT and digital car key solutions.

The automotive industry is undergoing a major change. One of the key drivers of this transformation is the connected car. More and more vehicles are connecting to mobile networks in order to link to emergency service systems and enable extended features such as telematic services. At the same time, a driver's need for cellular connectivity for infotainment applications is increasing. Additional challenges arise from the development of autonomous driving, as this technology places high demands on the bandwidth of network connections.

For the numerous challenges of the connected car, G+D has developed Sm@rtSIM® CX Luna 1.3M – the next generation industrial and automotive grade product suite. It is based on Infineon's newest security controller SLI37, which meets the technical specifications of the automotive industry and is specifically tailored to the challenging environmental conditions of automobiles. With a faster CPU and larger memory, they enable several innovative applications for the connected car. G+D's new products based on these controllers allow automotive manufacturers to provide highly secure and high-performance mobile connections via eSIM technology. They support 5G standalone networks and cover all eSIM consumer and M2M use cases. A special DSDA add-on (Dual SIM Dual Active) is available to automotive manufacturers. This allows to equip vehicles with two eSIM modules: One for using the drivers personal subscription for infotainment services and one for the services provided by the carmaker. The DSDA add-on includes the management of both chips remotely via one central G+D's AirOn eSIM management platform, thereby simplifying their logistical processes. For example, manufacturers have the option to upload the correct network profiles “over the air” after the cars have been delivered to their target regions. Additionally, manufacturers can comply with local legal requirements more easily.

In addition to eSIM applications, Sm@rtSIM® CX Luna 1.3M can also be used for digital car key solutions. In this case the new series acts as an embedded secure element eSE – a special chip for storing encryption keys for secure communication between the vehicle, mobile devices and a dedicated back end. The chip thus enables user-friendly solutions for unlocking and starting a vehicle and protects the communication of the vehicle against attacks by hackers.

"Circuit of the Northwest" Aims to Rival Legendary Tracks

by Christopher Chung

This past week, TeamAuto News got to have an exclusive look at what the future of the "Circuit of the Northwest" may look like. With the goal of breaking ground in Q3 of this year, the Circuit of the Northwest looks to bring a "world-class" racing experience to the Pacific Northwest that rivals some of the world's most legendary tracks including the likes of Laguna Seca.

With that said, the Circuit of the Northwest is intended to be much more than a normal race track. With plans for a motorcross track, a concert/live music area in the center, a movie theatre, autominiums, a wellness center, and even a STEM center; Circuit of the Northwest aims to be a premier entertainment destination in the PNW. Check them out at circuitofthenorthwest.com

Miami's Bomnin Chev. #1 & #2 for GM

About Bomnin Automotive Group

Bomnin Automotive Group began as a single dealership founded in 2010 by Arnaldo Bomnin, a Cuban immigrant who escaped the communist nation in 1996. Under his leadership the company has experienced transformative growth from selling an average of 70 cars a month to becoming the largest Chevrolet dealer in the nation, retailing more than 1,900 vehicles per month across all locations.

Bomnin Chevrolet Dadeland has been awarded with the prestigious Dealer of the Year Award for the last seven consecutive years, and the West Kendall dealership has earned the award the last four consecutive years. The Dealer of the Year award is given to less than one percent of GM dealers across the nation and is based on their commitment to excellence through sales, service and customer satisfaction.

Currently Bomnin Automotive operates five top-rated General Motors franchises, with four in South Florida and a fifth in Virginia, near Washington D.C. The group generated over \$1 billion dollars of total revenue in 2021, a record for Bomnin.

NWAPA Announces 2022 Event Awards

continued from page 5

- Runner up – 2022 Wagoneer Series III 4x4
- Pickup Trucks – 2022 Hyundai Santa Cruz Limited AWD (repeat winner)
- Runner up – 2022 Nissan Frontier Pro-4X
- Extreme Capability – 2021 Ford F-150 Raptor
- Runner up (tie) – 2022 Jeep Grand Cherokee 4xe
- Runner up (tie) – 2022 Wagoneer Series II 4x4
- Electrified Utility Vehicle – 2022 Jeep Grand Cherokee 4xe
- Runner up – 2022 Kia Sorento PHEV
- NW Outdoor Activity Vehicle of the Year – 2022 Jeep Grand Cherokee 4xe
- Runner up – 2022 Genesis GV70 AWD 3.5T Sport Prestige

The off-road testing courses featured optional sections for extremely capable vehicles. They took these SUVs and pickups through steep climbs, deep moguls, and extreme descents on loose dirt and mud to test their prowess and features, such as low-range four-wheel drive, axle articulation, plus approach, breakover, and departure angles. Vehicles were required to complete this course to be eligible for the Extreme Capability category.

New for 2022 was the Electrified Outdoor Activity Vehicle of the Year class. To compete in this class, a vehicle needed to be fully electric or a plug-in hybrid. The electrified vehicles competing this year were plug-in hybrid SUVs.

Photos and videos of the event are available at the following link: <https://1drv.ms/u/s!A1K-A45XG2XMIOsc4V1n3mClejQIlg?e=5vs3QL>. Please note that additional photos will be available at this link in the coming days.

About NWAPA

NWAPA (www.nwapa.org) is a professional organization of automotive journalists and media members from throughout the Pacific Northwest and Southwest Canada. Founded in 1991, NWAPA includes 45 voting members representing newspapers, magazines, radio stations, media groups, and the internet. Members of the organization have been testing SUVs and crossovers since the advent of the modern sport-utility vehicle in the mid-1990s. Non-voting NWAPA members include representatives from automotive manufacturers and related industry professionals.

From Around the U.S.

Newport Car Museum A Worldwide Tourist Destination

Opened just four and a half years ago, the Newport Car Museum in Portsmouth, R.I. has become a recognized worldwide tourist destination, maturing well beyond its basic ability to draw off of visitors to the Gilded Age Mansions and other seaside attractions offered in nearby Newport. Since Covid restrictions were lifted in mid-2020, numbers of visitors have jumped exponentially, and in 2021 the Museum welcomed a record 50,000 people through its doors.

“Our hope always has been to put smiles on our visitors’ faces,” said Gunther Buerman, who with his wife Maggie Buerman opened the Museum in June of 2017, “and so far, we have been successful.”

During its relatively short life, the Museum has won numerous awards, and while once it was described as a hidden gem, it is now regularly compared to other acclaimed car museums such as Florida’s Revs Institute and California’s Petersen Automotive Museum. For 2021, it received the TripAdvisor® Travelers’ Choice award and distinction as among the Top 10% of Attractions Worldwide.

“It’s a privilege to see this collection,” said recent visitor Philip Millstein (Cambridge, Mass.). “This is not an old man’s place where you come to see old cars; there’s a vitality here... the colors, the displays, the people who greet you. The Museum is not just gorgeous, it is relevant.”

Initially, the Buermans had no idea how it would fly, this idea of theirs to present as art their own private collection of rare and exotic cars. “The first challenge was securing an amazing space that we could grow into and wouldn’t be perceived as just a garage,” said Buerman, “so we acquired a former missile manufacturing facility on the campus of Raytheon Technologies.”

The 114,000 square foot building, which had to be completely gutted, re-configured and transformed into a space worthy of displaying the Buerman’s collection (then 65 strong), came with 17 acres of grounds attached, which would eventually figure prominently into the Museum’s ability to host car clubs, car shows and other special events onsite, as

well as offer visitors free parking for as many as 300 cars. Today, the Museum’s displays cover 80,000 square feet—the equivalent in space of 1½ football fields, including the end zones. They comprise more than 85 cars in six Galleries—Ford/Shelby, Corvettes, World Cars, Fin Cars, American Muscle and Mopars – and a Pop-Up Porsche Exhibit. There are no barrier ropes around the cars, and enhancements to the Museum experience include specially commissioned artwork; historic videos; and an impressive collection of Mid-Century Modern furniture serving as seating. A 2,500 sq. ft. gift shop has become its own colorful gallery, offering up thousands of items curated for car lovers and others.

“The Museum is now sought out directly by those traveling to New England looking for experiences that mean something to them,” said Buerman. “Our audience is in large part car aficionados and art lovers. Some have travelled to see as many different car museums as they can in this country, and they tell us how amazed they are at what they find here. They appreciate the art gallery ambience, the beauty of the cars and the rich automotive history represented by each decade of design, starting with the early

70th Pebble Beach Concours d’Elegance Charitable Donations Exceed \$2 Million

Throughout Its History the Event Has Raised Over \$32 Million to Help People in Need

Pebble Beach Company CEO David Stivers (center) and Pebble Beach Company Chairman Sandra Button (beside him) with Concours charity representatives (l to r): Dr. Steve Packer of Montage Health; Dr. Jeff Bass, guest, and April Ritchie of Natividad; Kevin Causey of Montage Health; Steve Emerson of United Way Monterey County; Ron Johnson of Boys & Girls Clubs of Monterey County; Carol Bishop of Kinship Center; Gina Nucci of Boys & Girls Clubs of Monterey County; Nicki Pasculli of Kinship Center; Adrienne Laurent of Salinas Valley Memorial Healthcare System; Katy Castagna of United Way Monterey County; and Jeff Wardwell of Salinas Valley Memorial Hospital Foundation. (Photo: Sherman Chu/Pebble Beach Concours d’Elegance)

The 2021 Pebble Beach Concours d’Elegance raised over \$2 million for charity—a figure on par with funds raised in pre-pandemic years.

The full amount, a total of \$2,089,450, was announced today by Pebble Beach Company CEO David Stivers as these funds were

distributed to the event’s charitable partners—and he stressed that these funds stay local.

“The Pebble Beach Concours and Pebble Beach Company are synonymous with excellence, and both have long supported local charities on the Monterey Peninsula and across Monterey County,” said Stivers. “The Concours, under the leadership of Chairman Sandra Button, has raised over \$32 million for local charities since its inception.”

Through Pebble Beach Company Foundation, its primary charitable partner, Concours funds benefit more than 95 of the region’s best youth-focused non profits, impacting the lives of more than 10,000 children each year. Several charities, including the Boys & Girls Clubs of Monterey County, Kinship Center, Montage Health, Natividad Foundation, Salinas Valley Memorial Healthcare System and United Way Monterey County, also benefit directly from Concours Charity Drawings.

“We’re thankful for all of the people who continue to gather at Pebble Beach to celebrate cars and raise funds for people in need.

Iden's Dealer Services Expands NW Dealer Network (www.idensdealerservices.com)

by Bill McCallum

When I started publishing Auto News in 1986, Kevin Iden was a college student with a dream. The dream was to create and grow a network of dealers offering them detailing and reconditioning services to benefit both the dealer and their customers.

Thus, Iden’s Dealer Services was born in 1989 in Renton, WA and today has grown to over 200 employees, 24 locations (and growing), and working onsite with over 70 new car dealerships to streamline their process to get cars retail ready faster and to a higher quality level.

Iden’s dealer accounts provide several services to their customers including:

- 1- Complete Interior & Exterior Detailing Services (new cars, used cars and service customers)
- 2- 3M Window Films/Tint and CHIPROTECT 3M Clear Vehicle Protection Film
- 3- Paint, Fabric, Leather, & Windshield Sealants
- 4- Providing Full Reconditioning Services (Dent Repair, Interior, Wheel, and Paint Repairs, inventory photos & more)

For additional information on Iden’s Dealer Services visit: www.IdensDealerServices.com

TOYOTA RAV4 HYBRID

The Toyota RAV4 started the movement to compact SUV's in the U.S. and is still the "top seller." The hybrid deserves a look.

BASE PRICE: \$37,030*
TYPE: Compact SUV (hybrid)
ENGINE: 2.5 Liter
TRANS: ECVT
HORSEPOWER: 219 hp
MPG: 40 mpg (combined)

TOYOTA GR 86 PREMIUM

The Toyota GR 86 Premium is a "hot rocket" for those looking for a sports coupe with lots of power at an affordable price point.

BASE PRICE: \$30,590*
TYPE: Sports Coupe
ENGINE: 2.0 Liter
TRANS: 6 Speed
HORSEPOWER: 200 hp
MPG: 30 hiway

TOYOTA COROLLA HATCH BACK

The Toyota Corolla continues to be the leading seller in the Toyota lineup and with the new design of the hatch back they will hold that record.

BASE PRICE: \$24,865*
TYPE: Sedan
ENGINE: 2.0L 4 cyl
TRANS: Sport Drive
HORSEPOWER: 169 hp
MPG: 38 hiway

TOYOTA SIENNA

While mini vans are not as popular today the Toyota Sienna "is." Available in 6 different trim lines and a "best bet" form moving kids and gear.

BASE PRICE: \$34,560*
TYPE: Mini Van
ENGINE: 2.5L
TRANS: CVT
HORSEPOWER: 245 hp
MPG: Overall 36 mpg

Marysville Toyota Dealer and Three other New Car Dealers Lobby, Governor for New EV Rules!

WSADA President Dan Wilder, Jr., Executive Committee members Brad Brotherton and Jim Colon, Board member Matthew Phillips, Executive Vice President Vicki Giles Fabr , Senior General Counsel Bryan Imai, and lobbyist Scott Hazlegrove attended a virtual meeting with Governor Jay Inslee and his staff.

The Governor agreed to the meeting as a thank you for dealers sending 12 EV's on short notice to his December press conference announcing the climate-based portion of his budget proposal.

In the meeting, WSADA and dealers outlined the efforts dealers have undertaken to promote the EV Revolution and invest in the technology, and made two policy requests:

Matthew Phillips (Car Pros) asked the Governor to ensure DOR is able to implement future EV-related sales tax credits in a manner that is efficient and easy for dealership employees and customers. The Governor's current proposal has income restrictions that could complicate the process by requiring tax returns from buyers.

Jim Colon (Marysville Toyota) asked the Governor to instruct Dept. of Ecology to adopt an early action credit program under the Zero Emission Vehicle mandate that is effective MY2025. Some manufacturers have either refused to deliver or throttled delivery of EVs and plug-in hybrid vehicles to Washington because they would not receive credit under the ZEV mandate program. Adopting early credits will hopefully increase the supply available to Washington dealers.

The Governor agreed to ask his staff to investigate the EV sales tax issue.

He also announced that Ecology will issue a notice in the next 1-2 weeks announcing a rule making to adopt the early action credit program.

This is a remarkable achievement for dealers, and particularly Jim Colon, who has championed this issue since learning Toyota intended on withholding the upcoming 2023 bZ4X EV from Washington dealers.

"Jim's passionate advocacy and leadership on this issue produced results in record time, and helped show the incredible power of a positive relationship with legislators and the Governor's Office," said Giles Fabr .

WSADA Grassroots Updates are compiled and edited by Bryan Imai and Vicki Giles Fabr . If you have any questions or concerns, please contact either at info@wsada.org.

Hyundai Santa Cruz Pickup Offers New Options for Buyers

Hyundai has created a top seller with the all-new Santa Cruz four door crew cab pickup. It competes with the Honda Ridgeline, Ford Ranger, Chevrolet Colorado, GMC Canyon, Nissan Frontier, and Toyota Tacoma.

Hyundai dealers report a high level of interest in the small pickup introduced in 2021. Comments from our recent test drive (see front page photo) range from "... a home run in the styling department," "... plenty of power for the task," "... value priced for the market."

As a former Ford Ranger owner I understand the demographics for what some call the small truck market. It's not commercial use but a family truck for that camping trip, an occasional trip to the dump, a summer shopping trip to COSTCO, hauling gear to little league games and other family activities.

The Santa Cruz is powered with a 2.5 Liter Turbo charged 4 cyl. engine mated with an 8 Speed transmission. Our test drive model was priced at an MSRP of \$39,720. With a 27 MPG rating for highway driving some buyers are moving to smaller trucks as the price of fuel continues to grow.

Loaded with 11 safety features including forward collision-avoidance assist, lane keeping assist, lane following assist, driver attention warning, blind spot collision assist, rear cross traffic collision avoidance assist and much more.

The all-new 2022 Hyundai Santa Cruz LTD AWD deserves a look.

Las Vegas SEMA Report by Tim Titus

continued from page 4

performance customer got a look behind the industry's curtain into the "Land of Oz;" SEMA is that kind of event. After attending the show for thirty years, it still blows our minds when we walk in each year. We can imagine what these new viewers must have thought seeing it for the first time.

The weather in Las Vegas was perfect, the monorail rail made it a snap to get to the Convention Center, and all of the restaurants were in full swing. The bars and nightclubs were hopping and during those four days the first week of November, there was no better place on earth than in Las Vegas for the SEMA Show. If you have a bucket list and you love the auto industry, SEMA needs to be right at the top. Hope to see you there next year!

Thank You for Being a Valued Ford Country Customer!

Record-Setting \$126.5 Million Auction at Mecum's 35th Anniversary Event in Indy

Flagship Classic and Collector Car Auction Event Exceeds 2021 Record Total by 18%

Long holding status as the world's largest classic and collector car auction company, Mecum has been crushing its own auction sales records for years, and Indy 2022 continued the noteworthy trend with \$126.5 million total overall sales achieved May 13-21—an 18% increase over the past Indy auction record of \$107 million achieved at last year's event. The Indy 2022 auction saw more than 90% of all offerings hammer sold throughout its nine days of non-stop auction action, including a total of 81% of all 2,504 vehicles offered. Dana Mecum's Original Spring Classic auction, held annually at the Indiana State Fairgrounds in Indianapolis, this year marked Mecum Auctions' 35th year in business, and the unparalleled results from the anniversary event speak volumes about the remarkable growth and success that the company has achieved

since its inception in 1988.

Top individual sales at the 2022 event were led by an impressive variety of vehicles, including two of the historic race cars from the headlining Ray Evernham Collection, along with a 1957 Mercedes-Benz 300SL Roadster (Lot S124) and the most valuable Dodge Hemi Daytona (Lot F111) ever sold at auction, all of which achieved individual sale prices far exceeding the million-dollar mark. In total, nine vehicles in Indianapolis sold for more than \$1 million.

The No. 1 top seller was Evernham's 1965 Brawner Hawk Ford "Dean Van Lines Special" Indy Car (Lot S166), driven by Mario Andretti, which brought \$2.2 million as an offering that crossed the

auction block with no reserve. The aforementioned 300SL became the auction's second-highest seller with a \$1.375 million sale, which was matched in price by Evernham's 1965 Eagle Weslake Ford "Santa Ana" Indy Car (Lot S167), driven by Dan Gurney, and the 18-car, single-lot offering of Corvettes (Lot S159) from Dr. Richard Foster.

The 1969 Dodge Hemi Daytona (Lot F111) that landed the position as the auction's fourth-highest seller and earned honors as the most valuable Hemi Daytona ever sold at auction was offered from the Motor City Muscle Collection. The car boasted a final selling price of \$1.32 million, adding to the Motor City Muscle Collec-

tion's impressive overall total of \$3.8 million achieved for all 11 of the cars sold from the group's jaw-dropping selection of classic muscle cars and more.

The Indy 2022 top 10 sales list was rounded out nicely by a 1965 Shelby 289 Cobra Roadster (Lot S136) from The Dr. J. Christian and Jennifer McCarter Collection that sold for \$1.1 million and a one-of-two 1971 Chevrolet Corvette ZR2 Convertible (Lot S127) that sold for \$962,500.

Private vehicle collections were responsible for nearly \$47 million of the record-setting auction total, with the headlining Ray Evernham collection of 32 no-reserve race cars and more achieving an impressive total of \$6.4 million. The main-

attraction Asi and Lisa Sheikh Collection realized sales for all 33 of its rare and top-shelf classic and collector car offerings, reaching \$6.7 million in total. The Dr. J. Christian and Jennifer McCarter Collection was also exceptionally well received with 20 cars hammering sold for an overall total of \$7.6 million in sales.

Road Art in Indianapolis was a resounding success with \$2.5 million added to the \$126.5 million auction total, and individual Road Art sales were led by the \$147,500 sale of a 1950s Ford Jubilee animated single-sided porcelain neon sign (Lot Z817).

For access to complete auction results, sign up for a free MyMecum account at Mecum.com.

1965 Brawner Hawk Ford "Dean Van Lines Special" Indy Car (Lot S166) sold at \$2,200,000

1957 Mercedes-Benz 300SL Roadster (Lot S124) sold at \$1,375,000

Drager Family History in Motorcycles and Collector Cars Dates Back to 1934

by Bill McCallum

Drager's Classic Sales and Collector Car & Motorcycle Collection's move from Lynnwood, WA to their new 20,000 square ft. facility in Burlington, WA has been a family affair. Jeri and his wife Joan (see photo) organized the move. While their son Andrew and his daughter Jannah did some of the heavy lifting during the move. Jeri's remodeling team lead my manager Mike started the remodel back in February 2020. The facility is open by reservation during the Covid-19 crisis but they are starting to book reservations for 2021 events. With a inhouse kitchen that can handle service for up to a 500 person event, they will be ready-to-go in 2021 when restrictions ease up. They have already had a small car group, "Horsepower Chrome and Rust Kreepy Kruiise" have an event on Halloween. Jeri Drager, a West Coast Icon,

in the collecting and selling of motorcycles, cars, and trucks started working in the family business in 1959. Otto, Jeri's father and his wife started the family business in 1934 with a Harley Davidson store in Aberdeen, WA.

As the Harley Davidson business grew Otto moved his motorcycle business to Bremerton WA and then Seattle, WA. Jeri moved the business to Shoreline, WA. 20 years ago and added an automotive & motorcycle museum and an event center. This Spring Jeri moved the business North to Burlington, WA. to an all-new 20,000 sq. ft. facility (see photos) which is now open by appointment.

Courtney Kramer, Global Auto News Monterey Marketing Manager

by Bill McCallum

Courtney Kramer worked professionally in film, tv and theatre as an actor for nine years, until 2005 when she wrote "Mental the Musical", which premiered in Vancouver and went on to play at the Cherry Lane Theatre in New York, before moving to a six month run in Los Angeles. Following the close of the show, Courtney decided

to put her broadcast journalism degree to good use. She worked as an entertainment publicist at famed Wolf Kasteler for two years before she began a news anchor career in Vancouver, eventually landing a top anchor position at 640AM talk radio in Los Angeles. She later continued her radio career in Canada, until her move to Carmel in 2014 where she had

her beautiful baby girl Peyton later that year. Two years after the birth of her second daughter, Courtney decided to pursue a career in health and wellness. Seeing an unmet need for natural anti-inflammatory and true antioxidant rich products,

she created Sweet Prairie Haskap, a company she developed with farmers in Canada to produce a concentrated juice of the Canadian Haskap berry – one of the most nutrient dense berries in the world. Today she is a proud mom to seven

year old Peyton and four year old Sayler, who start Santa Catalina School in the fall. She currently runs Sweet Prairie Haskap while providing marketing support for Global Auto News.

Mercedes Benz Steps Into the EV Market with the EQS

by Dave Kunz

continued from page 3

the growing number of public charging stations. I found a bank of Electrify America fast-charge units tucked behind a local BofA, and using the charging company's app, was able to easily connect the EQS and listen as the kilowatts hummed their way into the car in short order. Mercedes-Benz customers will get two years of complimentary access to this juice-on-the-fly charging.

Or, charge the car at home with an installed 240-volt station and have a "full tank" (aka topped-up battery) each morning when you depart. It's probably not a stretch of the imagination to guess that Mercedes-Benz's affluent customers place a high priority on personal safety, so the idea of never having to visit a gas station could be quite appealing.

And vehicle safety is a priority to Mercedes-Benz, so all the active and passive features in that regard are included. It would be extremely difficult to get this car into a collision, given all its cutting-edge accident-avoidance technology. But if that were to happen, this is arguably one of the safest vehicles to be in.

Like safety, luxury is paramount in a car like the EQS, and nothing disappoints here either. Plush, comfortable seats, serene quiet, a Burmester audio system that rivals the sound of a live concert, and even soft ambient lighting. Traveling in this big EV, whether as the driver or a passenger, is about as stress-free as it gets. My test vehicle, a fully-loaded EQS 580, coddled me as well as any large sedan has ever done. Plus, I was moving about purely on electric power the entire time.

Shelby American Introduces Its Latest Generation Shelby Raptor, Its Most Polished Off Road Super Truck Ever

Shelby American, a wholly owned subsidiary of Carroll Shelby International Inc. (CSBI:PK), has announced the latest generation Shelby Ford F-150 Raptor, the most polished off-road truck ever offered by the company. The 525-horsepower truck is now available in limited quantities through official dealers nationwide.

“Shelby American and Ford Motor Company have a tremendous history of working diligently together on high performance cars and trucks for enthusiasts worldwide,” said Joe Conway, CEO of Shelby American. “We’re excited to continue that important legacy. The future is bright as our companies continue evolving the product line, so the public has even more choices for world-class

Shelby vehicles through Ford dealer showrooms.”

The latest vehicle in the lineup builds upon Shelby American’s rich legacy.

“Carroll Shelby established Shelby American in 1962 and immediately pulled ahead of every automaker, just as he did on the track while a race car driver,” said Gary Patterson, president of Shelby American. “An important part of his legacy was the idea of a high-performance street legal truck, which his team pioneered in the 1980s. When Ford introduced the first F-150 Raptor in 2010, Shelby began building super trucks based on that incredible vehicle. Our latest generation achieves handling, ride and power levels no one could envision when

Shelby American started on this trail.”

In 2021, Ford introduced a fully redesigned F-150 Raptor that boosted its off-road capability with all-new five-link rear suspension featuring improved wheel travel and electronically controlled shocks along with upsized wheels and tires. The reengineered running gear features extra-long trailing arms to better maintain axle position on rough terrain, a Panhard rod and 24-inch coil springs. Next-generation FOX™ Live Valve™ internal bypass shocks with state-of-the-art electronic control technology offer position-sensitive damping adjust ability.

The high output 3.5-liter Eco-Boost® V6 engine delivers strong

low-end torque for maximum towing and increased payload capability. The suspension design combined with more sophisticated engine management software means the truck can put more torque to the rear wheels for quicker starts off the line, faster acceleration and better throttle responsiveness while still delivering comfort, stability, handling, control and traction at speed.

The interior was completely redesigned to elevate the owner experience with style, comfort and utility. The truck features enhanced materials, new color choices and more storage. The new Ford Shelby Raptor has standard over-the-air updates and a new connected experience that can deliver potential features like shareable digital trail maps. There is also SYNC® 4 with cloud-connected navigation and voice search and the FordPass mobile app to check on the truck remotely and more.

“The Ford F-150 Raptor and Shelby version of the truck have improved every generation,” said Vince LaViolette, Shelby Ameri-

can Vice President of Operations and Chief Designer. “The latest Shelby Raptor boasts its best suspension system ever, giant 37-inch off-road tires on aluminum forged wheels, functional offroad bumpers and LED lighting for any occasion. It makes impressive power, can stay cool in the most severe environments and look handsome while doing it.”

The all-new 2021-2022 Shelby Ford F-150 Raptor delivers the rugged capabilities needed for outdoor adventure. The heavy-duty suspension and underbody were built to withstand the toughest conditions with its race-proven FOX Live Valve system. The suspension provides a smooth and comfortable feeling on pavement with aggressive control and stability at high speeds off-road.

Shelby American worked closely with partners like Fox, Ford Performance and Whipple to create its vision of the truck. Leveraging the new capabilities of the Ford Raptor, it has more power, refinement, technology and handling capabilities.

Shelby American Introduces Its Latest Generation Shelby Raptor

continued from page 18

For 2021, the Shelby Raptor features new and better handling underpinning, 75 more horsepower, an additional cooling package and an exterior with rugged all-American styling. The Shelby Raptor strikes an imposing stance with its robust bumper system, bed chase rack system carrying a pair of spare alloy 18-inch wheels wrapped in 37-inch high-performance tires, functional fresh air hood, Shelby stripes and badges. Inside, the Shelby American theme continues across the leather seats, dashboard and floor mats.

"The Shelby Raptor has every creature comfort the new F-Series truck provides," said Patterson. "And it has the capabilities to back up its bold looks. From skimming sand dunes to maneuvering the asphalt jungle, it's by far our most polished off-road truck to date."

The Shelby Ford F-150 Raptor, including the truck, start at \$124,820 MSRP. The truck is

available through select Tuscany and Ford dealers in North America. Each vehicle from Shelby American has a Shelby serial number that will be documented in the official Shelby Registry. The cars come with a 3 year/36,000-mile

warranty including powertrain. Individuals interested in Shelby vehicle can visit their local dealer or go to (<https://www.shelby.com>).

Shelby American Raptor

Action Cameras Extend up to 9', Above or Below The Roofline

With a waterproof action camera, there's seemingly no limit to the incredible videos that can be recorded. The only limitation has been the length of an arm or flimsy selfie stick. With Shurhold Industries' Camera

Adapter, a GoPro or Garmin VIRB quickly and securely attaches to any of the company's 11 different handles. Extending up to 9', it's easy to capture stunning new perspectives.

Made from a high-performance polymer, the Camera Adapter is completely rustproof. Part of Shurhold's One Handle Does It All System, it locks onto any Shurhold fixed or telescoping triple-anodized aluminum handle and can be adjusted for the optimal shooting angle. With

a Handle Mate PFD, it'll even float if accidentally dropped in the water.

The Shurhold Camera Adapter has unlimited uses, both practical and fun. Safer than climbing a ladder, it's easy to inspect roofs on larger vehicles. Below, it's perfect for checking for leaks underneath the frame. A video of it in action is at bit.ly/Shurhold-CameraAdapter.

The Shurhold Camera Adapter doesn't have to remain in the vehicle. It's ideal for use around the house, whether checking gutters, crawl spaces or the progress of nesting birds.

The Shurhold Camera Adapter costs \$12.95; handles start at \$6.68; and the Handle Mate PFD is \$12.98.

Newport Car Museum Reports Record Attendance

continued from page 12

1950s, and finishing with new models from the 21st Century." **The Newport Car Museum Collection at a Glance**

The Ford/Shelby Gallery pays homage to Carroll Shelby's great race cars that were so admired in their day and includes an extremely rare 1965 Ford Shelby 427 SC Cobra, an original Shelby Series 1, and iconic Shelby Mustangs such as the 1965 GT350R and 1970 Boss 429.

The Corvette Gallery features Corvettes from every generation, C1 through C7, starting with a 1954 convertible and finishing with a 2019 ZR1 Convertible. For fun there's a brilliant multi-colored 2005 Corvette, hand painted by artist Romero Britto.

The World Car Gallery features exquisite models such as a 1963 Mercedes-Benz 300SL, 2015 Porsche 918 Spyder, 2014 McLaren P1, a newly added 2017 Lamborghini Aventador SV Roadster, and for a whimsical twist, a 1957 BMW Isetta and 2010 Tesla Roadster.

The Fin Car Gallery offers a walk down memory lane for those

who remember such classics as the 1954 Buick Skylark, '59 Cadillac Series 62, '57 Desoto Adventurer Convertible, and 1960 Cadillac Eldorado Biarritz Convertible.

The Mopar and American Muscle Galleries resonate with the younger crowd and include a 1969 4-Speed Hemi Dodge Charger R/T, 1961 Chevy Impala SS 409 convertible, 1969 Camaro Z/28, 2018 Dodge Demon, 1964 GTO, 2017 Dodge Viper ACR, and from the 1970s, a Plymouth Hemi 'Cuda and Plymouth Superbird Six Pack.

The Pop-Up Porsche Exhibit consists of nine exquisite models and brings to 14 the total count of that marque in the collection. It includes a 2018 911 GT2 RS, 2011 911 GT3 RS 4.0, 1956 356a Speedster and 2005 Carrera GT.

The Newport Car Museum is open daily 10-5. Tickets can be bought at the door or online at www.newportcarmuseum.org. Regular admission: \$18/adults; \$15/Seniors, Military, Students; \$8/Ages 5-15 (with an adult); Free/Ages 4 and under (with an adult).

Shurhold is dedicated to educating car and truck owners on vehicle value preservation. Inventor of the One Handle Does It All System, Shurhold manufactures specialty care items and accessories to clean, polish and detail.

Contact Shurhold, 3119 SW 42nd Ave., Palm City, FL 34990. 800-962-6241; Fax: 772-286-9620. www.shurhold.com/auto.

1970 Chevrolet Camaro SS/RS

continued from page 3

the guts are there and the parts are available. The tan interior is weak in contrast to the striking gold exterior, the car needs a different interior treatment so trashed is fine. Some of the better attributes were around the gearbox. The original center console was there - a wide angular piece. With a super clear diagram of the gate pattern as an emblem on the console below the shifter. The shifter was a wonderful piece of equipment. It felt brand new - light, short throws and direct engagement. Almost worth buying for that gearbox alone. Hurst - the best equipment.

Turning her over - very hard start. Chevrolet V8s are easy to tune - this engine needs to be properly sorted out. Gauges work. Once the engine reached temperature, I set out for a quick test drive. The car is on stock rims and wearing white letter BFGs of unknown year in less than road worthy condition. The engine pulls smoothly and the car is a joy to run up and down the gears. A 350 Chevy with a 4spd is a really magical combination. The stock 4 speed requires near constant shifting, which makes the car extremely engaging. The

car handles low and flat. It is easy to drive quickly and accurately - imagine with a suspension rebuild! This car had new shocks, some new bushings and some other new steering bits but really needed the full monty.

Handles reasonably well for its age - especially when equipped with the original lower horsepower drivetrain. Many other cars of this vintage run over 500 horsepower these days, but these cars were engineered for the original power plant. In that state, the car feels complete to me - not in need of upgrades chasing upgrades to find that sweet spot again. I have chased that on a few builds over the years. It's a delicate balance on these older cars.

The car is soft by modern standards; most modern SUV and CUVs ride far firmer. But that softer ride is really appealing to me. Comfortable, low, with flat handling and those iconic looks and heritage. This car exudes confidence.

This one was not for me - and I have a deep affinity for the Chevy F body. That body was my high school sweetheart!

think of men like Bert Boeckmann. May your good deeds be rewarded with continued success and good health”.

When I refer to Galpin Ford from 1968 forward, it's a Boeckmann family owned dealership, Bert, his wife Jane and eventually their son, Beau in 1982.

“When I think about what's right in America, I will always think of men like Bert Boeckman.

May your good deeds be rewarded with continued success and good health”.

It's 1946, following the end of World War II, a Ford Dealership was opened in the City of San Fernando and Frank Galpin's business sold 46 cars in its' first year.

Galpin was ahead of the customizing trend with the Galpinized 1952 Ford convertible. This custom Ford ended up gracing the cover of Motor Trend magazine.

The year 1953 came and a gentleman named Bert Boeckmann joined Galpin as a salesman and became General Manager in 1957. From this time until 1968, when Bert became sole owner of Galpin Ford, many firsts happened; leasing vehicles to individuals is a Galpin origination, launched a West Coast NASCAR racing team, the first Shelby dealer in California, sponsored the first Mustang Owners and Shelby Cobra Clubs, introduced European sunroof technology to America and developed Galpin Square - America's first automobile department store complete with a restaurant.

1970 came with Bert and his wife Jane, along with one other individual, started a motor home manufacturing company. Its' first year, the vehicle became the number one selling Class C motor coach in California.

Galpin has always been at the forefront of custom vehicles since 1952 with their Galpinized cars and trucks. Beau was made Vice President in 1998 and opened Galpin Auto Sport (GAS) in 2006, a freestanding customizing and performance facility.

The Boeckmann family - Bert, Jane and Beau - all have shared in the building of an automotive empire containing a heart and soul. They, together and singularly, have nurtured so many achievements and earned the rewards and many honors bestowed on them.

- Brand Names Foundation Automotive Retailer of the Year Award - twice
- Automotive Hall of Fame - Bert
- Opened the first Methanol service station in the world - 1982
- National Automobile Dealers Association, 25,000 dealers in America, named Bert the National Quality Dealer of the year

Tires

Pirelli Introduces Its First Replacement Tire For Electric Vehicles: The New P Zero All Season Plus with The Elect Marking

Comfort and Long-Lasting Performance Are The Main Features Of This EV Specific New Tire

The New P Zero All Season Plus Comes With PNCS: The Pirelli Technology Designed To Lower The Noise Inside The Vehicle

Pirelli today announced the introduction in North America of its first replacement tire developed specifically for electric vehicles: the P Zero All Season Plus with Elect marking.

The Elect marking offers a number of advantages. First and foremost is low rolling resistance, designed to increase the driving range while reducing consumption.

Compared to a non-elect P Zero All Season Plus product, the new Pirelli tire has shown a reduction of 15% of rolling resistance, which translates in a direct improvement in the battery life of the vehicle.

Another key advantage of the Elect marking is noise reduction, for ultimate comfort and to emphasize the quiet inside the cabin. In electric cars, the engine is no longer the primary source of noise, so reducing sound frequencies produced by the tires is key to increase driving comfort.

Finally, an immediate grip designed to bite into the asphalt instantly, putting the power down for a quick getaway. There is also another feature that is worth mentioning: a special structure designed to support the weight of a battery-powered vehicle.

The new P Zero All Season Plus also features the Pirelli Noise Cancelling System (PNCS): a technology designed to reduce interior vehicle noise thanks to a sound absorbing material applied to the inside circumferential wall of the tire that offers significantly improved driving comfort, a feature much appreciated by those who own electric cars. Pirelli Noise Cancelling System (PNCS) equipped P Zero All Season Plus Elect has shown a 5% decrease in cabin noise versus the leading original equipment competitor.

With the introduction of this new product, Pirelli confirms once again to be at the forefront of the electric vehicle revolution, after having been the first tire manufacturer to homologate a dedicated technology for electric vehicles and having the highest number of homologations of tires for EVs.

“Developing a tire specifically for electric vehicles requires a number of considerations you do not encounter when working with internal combustion engines,” said Ian Coke, Chief Technical Officer at Pirelli North America. “Electric vehicles are heavier, have more powerful and faster acceleration off the line and require lower rolling resistance.”

Pirelli P Zero

VW Creates Lab To Test EV Batteries

• Lab will serve as the center of high-voltage engineering activities in the U.S.

• Facility will support the launch and localization of Volkswagen ID.4 and future electric models

• VW to hire 25 engineers to support lab

Volkswagen of America today marked the start of construction of its Battery Engineering Lab at its Chattanooga Engineering and Planning Center. The approximately \$22 million dollar facility will test and validate electric vehicle cells and battery packs for the North American region.

The new lab will join Volkswagen Chattanooga’s under-construction 564,000 square-foot electric vehicle production expansion and 198,000 square-foot battery pack assembly facility to form Volkswagen’s hub for EV production and engineering here in the region. Volkswagen will test and optimize Georgia-manufactured battery cells at the new lab. This testing will include batteries for the Volkswagen ID.4 all-electric SUV, scheduled to begin U.S. production in 2022.

Besides increasing its engineering capabilities in the region, the

engineering lab is also part of Volkswagen’s effort to localize all aspects of vehicle development and production - which lowers production costs and development cycles. Current battery testing and validation takes place in two labs in Germany, Braunschweig and Wolfsburg, along with Shanghai and Changchun, both in China. Testing and validating battery components in Chattanooga will allow engineers to more quickly apply lessons learned to local production.

“Testing batteries in the U.S. at this world-class lab helps us get vehicles to market faster, at lower cost and better tuned for U.S. customers,” said Dr. Wolfgang Demmelbauer-Ebner, EVP and Chief Engineering Officer, Volkswagen of America. “It also lets us ensure the safety and reliability of our batteries in conditions U.S. customers encounter every day.”

“Volkswagen of America continues to be an industry leader and core to our Tennessee economy,” said Tennessee Governor Bill Lee. “I am pleased that VW selected Tennessee as the site of its newest battery lab in the world and the only

lab in the U.S. This is a significant development for our growing tech scene and our Tennessee workforce is ready for the challenge.”

“I’m proud that Chattanooga was chosen as the site to undertake this critical effort to ensure the safety of electric vehicle batteries,” said Congressman Chuck Fleischmann. “It’s an investment in the future of automotive systems that will keep Tennessee in the forefront of car manufacturing in the United States.”

“This will be the first lab of its kind that VW will build in the U.S., and it means a great deal that they chose to build it in Tennessee,” said Commissioner Bob Rolfe, Tennessee Department of Economic and Community Development. “This expansion shows that Tennessee is not only a leader in the automotive sector, but it is also an outstanding place to conduct high tech R&D.”

VW engineers will test battery components, the integration of the battery with the vehicle and look for more ways to integrate locally produced components into the production process. The lab will include pressure and immersion testers.

State of Washington Extorts Hybrid Owners by Sally Hanson

continued from page 10

I am helping the air stay cleaner, reducing noise pollution, paying more gasoline taxes than many other gasoline-only vehicles, and paying an extra fee to renew my tabs! Such a deal.

After driving my Toyota RAV4 for three and a half years on many road trips often navigating through snowy mountain passes in the winter as well as travel up and down the very steep hill to our neighborhood with snow on the

road, I appreciate Toyota’s proven hybrid technology and understand why the RAV4 continues to be a leader in the compact-crossover SUV segment.

You can definitely see me coming in my Electric Storm Blue RAV4 and contrary to the belief of some hybrid skeptics, I do not hold up traffic due to lack of power. The 2.5L 4-cylinder engine delivers 194 net horsepower with CVT offering outstanding acceleration. My Limited model also features

electronic on-demand all-wheel drive with intelligence (AWD-i) which includes an electric motor that delivers instant torque to the rear wheels when you need more traction. The hybrid gauge cluster helps you track when the system is charging and providing power to the drive wheels. To help increase the efficiency of your drive, you can also view the hybrid energy monitor on the 7” touch screen display to determine the operation of the gas engine, electric motor generator and hybrid battery. This offers real-time information showing how the power is being routed to the drive wheels or how the battery is being charged.

The hybrid fee that was part of House Bill 2042 was intended to promote electric vehicles by financing electric-car charging stations, which non-plug-in hybrids will never use. The new fee was supposed to fill gaps in the state-wide charging networks, by offering e-fueling stations every 40 to 70 miles on major highways. Another thorn in my side involving this bill is that the State of Washington must not consider Interstates 90 and 82, U.S. Highways 395 and 12, and State Highway 26 major highways in Eastern Washington because charging stations are not popping up east of the Cascade Mountain Range.

With owners of plug-in vehicles already paying \$150 into the state roads fund in lieu of gasoline taxes when they renew their car tabs, they also have to pay the \$75 electrification fee bringing up their total to \$225 for their help in keeping our environment cleaner.

WOW – think how ripped off the plug-in vehicle drivers must feel! Where are the new charging stations?

New Nutrient Dense Haskap!

Sweet Prairie Haskap Juice and Powder Mix is a first to market, high potency, nutrient-dense juice made from the Haskap berry. Our powder, made from the nutraceutical-dense skins of the berry – is quickly gaining attention as the most highly impactful superberry in North America.

The health benefits of haskap are lengthy. It is the highest ranked berry on the ORAC scale (measures a berry's effectiveness at reducing oxidative stress).

The haskap berry has 3x more antioxidants than a wild blueberry, the highest reported anthocyanins of any fruit, stronger immunity, and anti-viral properties than elderberry, and classed as the most efficient berry at reducing inflammation in the body. Very high levels of polyphenols, bioflavonoids, and quercetin, as well as high levels of c3g; an extremely powerful compound that works on cognitive function related to memory improvement, focus, and clearing of brain fog, as well as cardiovascular issues and blood sugar levels.

You only need two tablespoons a day of our juice (one serving) or

1 teaspoon a day of our powder to get the health benefits included – there are twelve servings in one bottle. Taking it in the morning gives a boost in energy, mental clarity and mood.

The flavor profile is a tart sweetness and resembles a taste combination of blueberry, raspberry and cranberry, offering a rich purple color. There are 2lbs of crushed haskap berries in every bottle – nothing else – no added sugar – not even water. The powder is comprised of the skins of the berries after they have been crushed, providing off the charts nutraceutical benefits.

Haskap berries are in ancient Japanese tradition called “the berry of long life and good vision”. In Tibet, haskap leaves are used to steep in broth for medicinal purposes.

Please check out our Instagram and website for more information on the specific conditions SPH can help with, plus ideas on the many ways you can use our berry juice and powder, from cooking to cocktails. @sweetprairiehaskap or www.sweetprairiehaskap.com.

Courtney Kramer Joins Auto News

Courtney Kramer worked professionally in film, tv and theatre as an actor for nine years, until 2005 when she wrote “Mental the Musical”, which premiered in Vancouver and went on to play at

the Cherry Lane Theatre in New York, before moving to a six month run in Los Angeles. Following the close of the show, Courtney decided to put her broadcast journalism degree to good use. She worked

as an entertainment publicist at famed Wolf Kasteler for two years before she began a news anchor career in Vancouver, eventually landing a top anchor position at 640AM talk radio in Los Angeles. She later continued her radio career in Canada, until her move to Carmel in 2014 where she had her beautiful baby girl Peyton later that year. Two years after the birth of her second daughter, Courtney decided to pursue a career in health and wellness. Seeing an unmet need for natural anti-inflammatory and true antioxidant rich products, she created Sweet Prairie Haskap, a company she developed with farmers in Canada to produce a concentrated juice of the Canadian Haskap berry – one of the most nutrient dense berries in the world. Today she is a proud mom to seven year old Peyton and four year old Sayler, who start Santa Catalina School in the fall. She currently runs Sweet Prairie Haskap while providing marketing support for Global Auto News.

Location	4 Full Day Rentals (or 8 Half-day)	at our Car Price
Big Sur	\$1,280	\$400/day
Carmel	\$1,200	\$600/day
Pebble Beach	\$2,500	\$800/day

Mazda CX-9 Review

Mazda's market share continues to grow in the West and other parts of the country. It happens when you combine styling, performance, and economy, The 2022 Mazda CX-9 has all three and much more.

Mazda has upgraded it's entire lineup in the styling department. The stylish CX-9 3-row SUV has a price range of \$34,160 to \$46,805 and is easy on the pocket book when it comes to MPG. (22 mpg overall rating)

Our test vehicle was powered with a 2.5-liter 4 turbo (227 hp) mated with a 6-speed Automatic transmission.

We were surprised how both the exterior and interior styling blended to create a quiet ride with more room for luggage and family gear.

For the tech crowd who likes their tunes both Android Auto and Apple Car Play compatibility is standard.

Safety features include AEB with pedestrian detection and BSW.

Legends of Auto to Honor Henry Ford Family, Galpin Auto Group, Bill Pierre Auto Group & Rick Case Auto Group Families

by Bill McCallum

When you start on a journey sometimes you have no idea when or where it will end. That's where I was 40 years ago when the idea of an auto newspaper was born. I was publishing 2 weekly newspapers at the time "Uptown News" in Bellevue WA and the Coal Creek Newcastle News to the South. Both papers had a small auto section and were growing. I wasn't a car guy but I grew up in the business with family members involved with new car dealerships. I discussed the idea of an auto newspaper with Jim Hammond, the founder of the Puget Sound Auto Dealers Association and the original organizer of the Seattle Auto Show. He said "go for it" and you can count on my support. Thus Puget Sound Auto News was born. A few years later we expanded to Eastern WA, and Oregon and changed the name of the paper to NorthwestAuto News.

With California being the largest new car market in the U.S. that was the next big step in our expansion and another name change to Auto News of America.

Enter Jay Leno. I first saw Jay at a comedy club on Sunset Blvd. shortly after we started circulating our paper in LA. Jay was the "car guy" that inspired me to expand our reach to include car collectors and collector car auctions. (see back page ad) I watched Jay's first TONIGHT show and attended his last TONIGHT show in person. (see front page photo)

Next chapter. From our launch in Calif. we build a network of over 1,000 retail automotive distribution locations in four more states. (Ariz, Nv, Id, & Mt) and changed the name of our paper to GLOBAL AUTO NEWS and launched our online program. (www.autonewsonline.com) Currently we have added a digital platform sending out e-mail "fast blasts" reaching over 500K auto enthusiasts, media & PR firms, OEM's and car collectors.

On August 18th, 2022 we will celebrate the 10 year anniversary of LEGENDS OF AUTO during Car Week in Monterey, California. (see page 26). Legends of Auto was created with the help of Mark Fields (former CEO of Ford see photo on page 15) and Bert Boeckmann, Founder of Galpin Auto Group. The idea was to create an event honoring individuals from all segments of the auto industry with the mission statement "To recognize and award individual accomplishments, that have significantly advanced the auto industry around the world and to help develop the next generation of auto industry leaders."

We hope you will Join us as to continue our journey and look for our next issue where we will announce some of the Legends to be honored on August 18th, 2022 in Monterey, CA. Travel safe.
