2018 Hyundai Kona Gets “Thumbs Up” in Monterey/Pebble Beach as U.S. Sales Surge

by Bill McCallum

Our vehicle of choice for Classic Car Week in Pebble Beach/Monterey was the all-new 2018 Hyundai Kona sub-compact SUV. While the Hyundai Kona is classified as a sub-compact by the auto industry it has more than enough room for baggage and other gear. We needed the cargo space as we moved items around Monterey for our Legends of Auto Gala Dinner. (see page 1 story)

The 1.6L Turbocharged Direct Injection 4 cyl. engine produced enough power for our 2018 Hyundai Kona “Monterey moving van.” The 26 City/29 hiway 27 average mpg gave us a lift in our event budget. With a $28,700 base MSRP the all-new Hyundai Kona is considered a “best buy” in the segment. With Aston Martins, Bentley’s, Jaguars, Lamborghini’s, Maseratis, McLaren’s, Porsches, Rolls-Royces, tooling around Carmel/ Monterey, and Pebble Beach our 2018 all-new Hyundai was still getting it’s share of “thumbs-up” from auto enthusiasts. I suggest a test drive at your nearest Hyundai dealer.

Legends of Auto Gala Dinner in Monterey, CA Honors Current & Past Legends (see page 10)

by Bill McCallum

Our “Legends of Auto Gala Dinner” in Monterey during Classic Car Week was an outstanding success.

I want to publicly thank our Sponsor (Mecum), Legends (see above photo), our guests, our partners, (see page 24), our team from Los Angeles (Gary, Joyce, Lisa,) and our team from Seattle (Barb Chris, Mike, Zach). Thanks to all and see you next year on August 15th. Same time same place. (See page 10)

This year we celebrated the 10 year anniversary of the founding of “Legends of Auto” and on August 15, 2019 we will celebrate the actual 10th annual Legends of Auto Event in Monterey during Classic Car Week. If your an auto enthusiast Classic Car Week and our Legends Event should be on your “bucket list”. Make your reservations today. (see Gary Williams story on page 4 and 9)

Volkswagen Goes “BIG” with 2018 Atlas SUV

2018 Hyundai Kona at Pebble Beach (photo Auto News) 2018 Volkswagen Atlas SUV (photo Auto News) See Story page 8
For over three decades I have been championing the cause for more women in the auto industry. It started with my hiring Sally Hanson over 30 years ago. Sally worked with me prior to joining Auto News when my partners and I owned 6 weekly newspapers in the Greater Seattle area. I recall Sally says in those early days “…I don’t care how fast a car goes from 0 to 60 I care how fast a new car goes from 60 to 0.” Sally was the first female automotive writer on the West Coast over 30 years ago.

We currently have 5 female auto writers and will add two more by year end. (see page 2,3,4) Most automotive magazines have no female auto writers, but a staff of old and young male “year heads” while it is estimated that women either buy or influence 75% of the new car sales in the U.S. each year. To repeat: It’s estimated that WOMEN EITHER BUY OR INFLUENCE 75% OF U.S. NEW CAR SALES in the U.S.

As we expanded throughout the U.S. we created a “Women in the Auto World” special section where we featured: Felicia Fields, Ford VP of HR; Mary Barra, CEO GM; Michelle Christensen, Acura Design; Lisa Barrow, FCA Communications; Muffy Bennett, Car Collector; Jennifer Biggs, Repair Shop Owner; Sarah Deccio, Auto Distribution Mgr.; Valerie Thompson, Motorcycle Record editor.

When you saw the Batmobile, you knew George Barris was somewhere near. Known as the “King of Kustomizers” he would greet you with a radiating smile in his trademark golden yellow jacket. The George Barris Personal Collection for the Barris Kustom Garage Sale was a collector’s dream sale. The massive undertaking of over 60 years of collecting was undertaken by his daughter Joji Barris-Paster.

“She wanted to understand what they were about and what they wanted so he could extend off of it. That’s why you see the garage sale, he would buy everything that pertains to them,” shared Joji. Notable finds included magazines starting in the 1950s, TV show scripts, posters and over 600 Batman toys. Most were connected to cars Barris worked on or merchandise he designed and licensed.

Barris Kustom Industries in Burbank is home to the collection of the Batmobile, The Munsters Koach, K.I.T.T. Knight Rider Car, car models and walls lined with decades of legendary clients. You are walking through automotive history when you walk the Barris Kustom Garage Sale.

The George Barris collection is a lifetime achievement. For over 85 million truck sales since Lexus had a grand touring coupe in its lineup. But when you see the new LC 500 in the flesh, you’re bound to think that it was worth the wait. The LC 500 is absolutely stunning. It turns heads everywhere it goes.

It’s been a long eight years since Lexus had a grand touring coupe in its lineup. But when you see the new LC 500 in the flesh, you’re bound to think that it was worth the wait. The LC 500 is absolutely stunning. It turns heads everywhere it goes.

The Kia Optima Hybrid EX offers a smooth ride with its 2.0 Liter, 4 cylinder hybrid engine combined with a 6 speed automatic transmission. Kia has numerous safety features in the Optima including Traction Control and Tire Pressure Monitoring systems, and Traccion and Hill Assist Control systems. My kids and I enjoyed the plethora of creature comfort features including a Harmon Kardon Pre...
For 2018 Cadillac continues the mid-sized – and small for a Cadillac – ATS Sedan.

While this isn’t a new car, it has been freshened. But the basic sedan stays pretty much the same as it was. But that’s not a bad thing.

The real problem isn’t the car or the brand, it’s the market. I sat at a table of my colleagues recently while we seriously discussed whether sedans will become a tiny segment similar to sports cars and coups. Several postulated that this will happen in the next 10 years or less.

The only hope expressed against this view was that since crossovers have been reshaping moving currently towards the proportions of a, gasp, station wagon. Another point that was made was that larger sedans were already the purview of older was made was that larger sedans were already the purview of older generation. Firstly, the new face features such as the Mercedes CLA, are image-conscious and prefer styles such as the Audi TT to the 420d. Some tate toward cars which they feel reflect their personalities. Some are word-of-mouth recommendations. Most websites, social media outlets, and printed or e-materials, perusing awareness brochures and other research, which includes brand awareness brochures and other

Hello again, Friends and Read-

ers,

I recently came across a 2018 Autotrader article which aimed to analyze a millennial’s approach to car buying. The article was titled, Buying a Car: How Millennials Do it Differently.

Interestingly enough, some millennials wait longer than previous generations to even obtain their driver’s license, however, studies show that millennials are still interested in cars and driving, are likely to consider all brands, especially those that reflect their personality, and as we have discovered over and over, and over again, millennials do their research, which includes brand awareness brochures and other printed or e-materials, perusing websites, social media outlets, and word-of-mouth recommendations from family and friends.

At first, many millennials gravi-
tate toward cars which they feel reflect their personalities. Some are image-conscious and prefer styles such as the Mercedes CLA, the BMW1-series and the Audi

The 2018 Toyota Sequoia, as big and as mighty as the Sequoia trees that it’s named after. The Sequoia is one of the few remaining “body-on-frame” SUVs and is the perfect SUV if you want bulletproof reliability, tons of space for the family, and loads of towing capacity. However, if you’re looking for great fuel economy and tons of technology gadgets, you might want to look elsewhere.

For the 2018 model, Toyota came out with significant changes in the Sequoia. Encompassed in those are: styling updates, a new TRD Sport trim, and a slew of new safety features (forward collision warning, automatic braking, lane departure warning, parking sensors, blind-spot monitoring, and traffic-adaptive cruise control, to name a few). Our test model was the new TRD Sport, which featured more aggressive styling, sport-tuned suspension, a blacked out front grille, mirror caps, and rear badging, darkened rear tail light housing, and black 20 inch rims wrapped in a more aggressive off road tire.
2018 Cadillac CT6 2.0E Plug-in Hybrid RWD

Over the past few years, the Cadillac team of General Motors was busy launching the ATS, a third generation CTS along with emotion-stirring V performance versions for both, a newly styled Escalade, the new XT5 crossover and the large CT6 sedan. Then there was a lull in the production of new product, with the only really new product to roll out in the last two years – the electrified Cadillac CT6 2.0e Plug-in Hybrid. The Hybrid is based on the same platform as the semi-autonomous flagship 2018 Cadillac CT6 Platinum AWD Super Cruise luxury sedan but doesn’t quite measure up to the same status. The Hybrid weighs an additional 121 pounds and carries 3.9 gallons less fuel.

The Cadillac CT6 2.0e Plug-in Hybrid draws its motive force from a 2.0-liter Ecotec, DOHC, 16-valve, twin-scroll turbocharged and inter cooled, inline four-cylinder with CVVT and Direct Injection that produces 265 horsepower and 295 pound feet of torque. Added power comes from one permanent magnet synchronous AC electric motor and one induction AC electric motor with an 18.4 kWh lithium battery pack for a combined output of 335 horsepower and 432 pound feet of torque, delivering energy to the rear wheels via an electronic Continuously Variable Transmission (CVT). The Hybrid cost $13,200 less than the Super Cruise version, but then it’s not quite as plush. It does however, outshine the flagship model in terms of fuel economy – the Hybrid delivers 26-mpg city / 23-mpg highway with combined gasoline and electricity yielding 62 MPGe, with an impressive EV Range of 31 miles, configurable regenerative braking, and pleasing dynamics.

A transverse hybrid unit, such as the one found in the FWD Chevy Volt was not viable for the longitudinal RWD setup of the CT6, so the Cadillac engineering team found it necessary to develop a totally new gas-electric powertrain. The system combines the CT6’s 2.0-liter turbocharged four-banger with two electric motors housed in the transmission. The 18.4-kWh lithium-ion battery pack provides more than twice what the BMW 740e offers from its 9.2-kWh battery pack. The CT6 plug-in delivers its torque to the ground with the three power sources combining their operation in the transmission that is made up of three planetary gear sets, five clutches, and two motors capable of four variable gear-ratio ranges and three fixed gear ratios. In total, the drivetrain has 11 different operating states, with only eight actually propelling the car and the others applied only in specific, continued on page 7.

Toyota Headquarters is a State-of-the-Art Structure

One thing is for sure the new Toyota Headquarters is a state of the art structure. Toyota is celebrating 60 years in North America and the production of 30 million cars, continued on page 9.

Classic Car Week “You had to be There”

What a show! Since 1950, the United States west coast Concours d’Elegance has set off to duplicate the amazing Concours d’Elegance first continued on page 5.
A Message from the Publisher

I have met a number of Automotive Executives in the 30+ years of publishing Global Auto News. I never met Sergio Marchionne but I will miss his brilliant decisions, and candid comments like, “....I’ll wait for others to develop driverless car technology and when and if they do I’ll buy it from them.” and “....Yes we have a pure electric car, the Fiat E, but please don’t buy one. We lose $12,000 on every car we sell.”

Auto Executives that I have met will go on and on. Jim O’ Sullivan Mazda CEO, John Krakiat, Hyundai CEO, Alex Trotman, Ford CEO, Jacques Nasser, Ford CEO, Alan Mulally, Ford CEO; Mark Fields; Ford CEO; and Bill Ford, Chairman Ford, but there will never be another Sergio Marchionne. Kind regards to Sergio’s family and friends.

Sincerely Bill McCallum, Publisher

Classic Car Week “You had to be There” continued on page 4 established in Europe pre-World War II and which was a showcase of beautiful cars, style and fashion. Each year Pebble Beach Concours d’Elegance attendances are wowed by the passionate setting in beautiful California, where the warm, sunny, breezy feeling of the Monterey peninsula meets the Pacific Ocean and where meticulous renovations of approximately 200 cars are entered in the show-the Car Show of the year. Each compete for the coveted Best of Show title and award where judges weigh meticulous renovation, engineering and style and select their annual winner.

Attendees this year saw special car groups and classics, Cadillac, Mercedes, Pierce Arrows, Rolls Royce, etc. along with other exotics. The year’s Best of Show winner was awarded to an Alfa Romeo: a 1937 Alfa Romeo 8C 2900B Touring Berlinetta, owned by David and Ginny Sydorick of Beverly Hills, California.

The Concours d’Elegance is the highlight culmination the end cap to a week of special and exciting automotive events, like the McCall Motorworks Revival party, which traditionally kicks off the Concours d’Elegance car week and showcases beautiful automobiles and attenders, the annual Legend of Auto Gala, which honors those whom have made significant contributions to the industry and advanced the excitement and passion therein, and the Concorso Italiano, which features more than 100 pieces of Italian origin, as well as elements of Italian style such as fashion, food, art and music on the gorgeous grounds of Black Horse Golf Club.

The list of this special week’s events really does go on and on and as an interested spectator, you can pick and choose those shows and events which you would like to attend.

So even though Pebble Beach, CA inspires golf and those passionate about golf and cars. It’s a wonderful combination. It’s beautiful from top to bottom.”

California Air Resources Board Release Study

The California Air Resources Board released the 2018 issue of its Annual Evaluation of Fuel Cell Electric Vehicle Deployment and Hydrogen Fuel Station Network Development (the ABB report)

Findings include:

- California’s hydrogen fueling network has continued to mature with growth in the number of stations, continued emphasis on a fully retail customer experience, and private investment in station development.
- Auto manufacturer projections for future FCEV deployments have recovered substantially from 2017 projections.
- Sufficient fueling capacity and coverage should be available by 2025 to enable FCEV deployments at a rate two to three times greater than currently-reported plans.

California’s State co-funded hydrogen fueling network is on track to meet or exceed renewable requirements for Senate Bill 1505 #HydrogenNow #DriveH2 Events Pacific Oil Conference 2018 September 4-6 | Los Angeles, CA Global Action Climate Summit September 12 | San Francisco, CA Hydrogen and Fuel Cells North America Conference and Expo September 24-27 | Anaheim, CA Shell Joins CaFCP Executive Board

At the California Fuel Cell Partnership public meeting, Shell was invited to become a member of CaFCP’s executive board. Shell is the first energy company to join the board. Shell and its affiliates within the Shell Group of Companies are taking part in various initiatives to encourage the adoption of hydrogen as a transport fuel. Shell currently operates two hydrogen refueling stations in California.

2019 Dodge Ram 1500 Test Drive Review by Howard Elmer

continued from page 3

by Art Gould

On October 18, 1977 Reginald Martinez ‘Reggie’ Jackson hit three home runs in a row in 3 consecutive pitches from three different pitchers while playing for the New York Yankees in the world series against the Dodgers. This phenomenal feat earned Reggie Jackson the moniker of Mr. October. This right fielder played in major league baseball from 1967 to 1987 for the Oakland A’s, Baltimore Orioles, New York Yankees and the California Angels.

Now-a-days the Mr. October Foundation supports the needs and future for young people through education and opportunities for kids that need a helping hand. Reggie Jackson says, “I feel that the most important requirement in success is learning to overcome failure. You must learn to tolerate it, but never accept it.”

An ever growing legion of fans follow the interests of Mr. October as the 14-time All-Star, 5-time World Series Champion and 2-time World Series MVP continues to be active with charities and one of his loves, collectible automobiles.

Reggie Jackson maintains his private collection of primarily muscle cars. Specializing in General Motors cars, ‘Reggie’ cars are known for numbers matching and special edition examples of the era when they are rare and the age of performance ruled.

Located in the Monterey center of car activities, the collection offers an unusual feature not found in many private collections. You may be able to purchase some of the dozens of cars that Reggie has collected. Although not generally open to the public, the non descript building includes pristine examples of cars, motorcycles and some baseball memorabilia.

Chevrolet’s have always been the center of interest for this baseball Hall of Famer. As a collector, Mr. October really knows his cars. As well informed about his cars, he has become a student of muscle cars as his conversations reflect.

Questions can be answered by contacting Vince of the organization at 811-207-3949. A special opportunity would be to add to your collection with a genuine car from the Reggie Jackson collection.

2018 Lexus LC 500 “test drive” Report by Ed Barrett continued from page 2

The infotainment system features a 10-inch screen on the dash, which is controlled by a touch pad on the console. It’s a sophisticated setup that operates much like your laptop. However, it is not all that intuitive, and can be distracting to use while driving.

Grand touring cars are supposed to come with abundant power, and the LC 500 certainly delivers in this regard. Lexus propels this beauty with a 5-liter V8 that pumps out 471 horsepower. It will race you up to 60 in just 4.7 seconds. Furthermore, the rumbling exhaust note is bound to get your juices flowing. When you start up the LC, all your neighbors will know that you’re on the move. A smooth functioning, 10-speed automatic transfers power to the rear wheels. A gas/electric version, the LC 500h, with 354 horsepower, is also available.

Grand touring cars are not designed to tear up a track. The LC weighs 4,300 lbs., so it’s not nimble like a Porsche. Yet, it is a fine handling car, with precise steering. Moreover, drivers can firm up the adaptable suspension by switching to the “sport” or “sport+” modes for vigorous driving. Although the ride becomes harsher, I think most buyers will be willing to pay that price. Personally, I found the “comfort” mode the best setting in everyday use. Yet, even there, I think there’s still room for refinement.

As you would expect, the LC 500 comes very well equipped with luxury and safety features. A 13-speaker audio system, keyless entry/start, Bluetooth and Enform Remote are standard. This last feature can start the engine, adjust the air conditioning and set driver limits from outside the car. However, if you want more high-huck items, a carbon-fiber roof, a head-up display and intuitive parking assist are all available from the options list.

As for safety technology, this Lexus gives you the whole nine yards. Frontal-collision warning and braking, adaptive cruise control, lane-keep assist, and the Lexus emergency communication system are all included in the base price.

Speaking of price, the entry point for the LC 500 is rather steep, $92,995. The hybrid LC 500h is about $4,500 more. My test car, with a Sport package, a Convenience package, a Mark Levinson sound system and more, had a bottom line of $102,890.

Bags of Power

Cadillac CT6 Hybrid Test Drive Report by Arv Voss

continued from page 4

rare scenarios such as engine-on regenerative braking at high speeds or in transitioning among other operational states. The Cadillac CT6 2.0e Plug-in Hybrid displays an elegant simplistic, design that is less angular less angular design with a lightweight body, excellent handling and road holding attributes. The CT6 is 8.5-inches longer than Cadillac’s CT5 sedan, stretching the sheet metal over the longer, low, broad-shouldered, and muscular body, incorporating straight edges and flatter surfaces rather than arcs in a form that blends the long hood with the high shoulder and expressive wheels. Up front the CT6, displays a broad grille with distinctive textured cross-hatching and the large, prominent Cadillac crest.

Entering the cabin there’s a balance of luxury and functionality. Satin chrome and stained wood trim with delicate carbon-fiber accents, and supple leather seating. The interior ambiance exhibits expert craftsmanship and comfort.

My test 2018 Cadillac CT6 2.0e Plug-In Hybrid came with the exterior finished in a rich Deep Amethyst metallic, with the interior executed in Jet Black with the exterior finished in a rich Deep Amethyst metallic, with the interior finished in a rich Deep Amethyst metallic, with the exterior finished in a rich Deep Amethyst metallic, with the interior finished in Jet Black. The base price was set at $75,095. The final tally rose to $76,090, after adding the Destination charge. There were no other optional costs.

SUMMARY: The 2018 Cadillac CT6 2.0e Plug-In Hybrid handles equitably with other luxury sedans, delivering ample power from its hybrid system. The hybrid travels from 0-60 mph in an impressive 5.2 seconds, providing passing power across a broad speed range. The electric steering is responsive in all modes, working with the suspension. Regardless of the driving mode selected, the CT6 Hybrid delivers a firm and stable ride quality.

The CT6 Hybrid delivers athletic handling characteristics in spite of its length and overall mass. The low positioning of the battery pack contributes to the positive stability and outstanding road-holding ability. The electric motors are capable of powering the sedan up to 78 mph, with the four-cylinder gas motor only firing up to provide additional power. Driving with one-pedal driving may be accomplished by combining the lowest regenerated mode with the automatic brake-hold function.

The Cadillac CT6 hybrid possesses virtually all the same safety, connectivity and infotainment features as the rest of the CT6 lineup.

Bottom line, the 2018 Cadillac CT6 Plug-In Hybrid RWD is a pleasant step up, and is now a solid and impressively agile luxury sedan with the added advantages of electrification. Trade-offs found in most hybrids include reduced trunk space, which is four feet less at 11 feet. Compared to BMW’s 7-series, the CT6 is perhaps not as visually striking, nor is the interior quite as plush, but these factors are made acceptable by its significantly lower price.

SPECIFICATIONS: 2018 Cadillac CT6 2.0e Plug-in Hybrid RWD
Base Price: $75,095
Price as Tested: $76,090
Engine Type and Size: 2.0-liter Ecotec, DOHC, 16-valve, twin-scroll turbocharged and inter cooled, inline four-cylinder turbocharged 4-cylinder with CVVT and Direct Injection.
Horsepower (hp): 265 @ rpm
Torque (ft./lbs.): 295 @ rpm

Electrical Motor:1 permanent magnet synchronous AC motor and 1 induction AC motor. 18.4 kWh lithium battery pack.
Combined output: 335 horsepower and 432 pound feet of torque.

Saleen Displays S1& S7 at Legends Gala in Monterey

Saleen Automotive, Inc. has re-asserted its dominance in the supercar market with the unveiling of the 1300-horsepower Saleen S7 Le Mans (LM) Edition at the recent LA Auto Show. The S7R race version has won at every major race track in the world, including Daytona, Sebring, Nurburgring, and the prestigious 24 Hours of Le Mans. The S7 LM Edition commemorates that seven-year run of consecutive racing victories of its Saleen S7 Supercar. The S7 street version has also starred in several Hollywood blockbusters, including being driven by “God” in Bruce Almighty.

Steve Saleen previously announced the planned build of this extraordinary supercar. The car unveiled at the recent LA Auto Show is the fulfillment of the first of the special edition S7 LM’s, “True to our form, we are bringing back America’s only true supercar,” said Steve Saleen, CEO of Saleen Automotive. “We are celebrating our winning heritage and advancing the performance DNA that Saleen was built around.”

A 7.0L twin-turbo engine, rated at 1300 horsepower, will power the new S7 LM supercar. Each one is hand built at Saleen’s Corona, CA, headquarters. The S7 LM’s transmission is a longitudinal, 6-speed all-synchro meshed with limited-slip differential. It also has a metallic clutch with 8.0-inch twin-disc hydraulic actuation bow-through shift rails. The S7 LM has an all-new, exclusive Black/Silver paint scheme with clear-coated carbon fiber. It will ride on Saleen forged, five-spoke, Le Mans-style wheel design equipped with center locking wheel nuts with automatic safety locks. Fronts are sized at 19 X 9.5-inches with rears at 20 X 12.0-inches. These sleek, stylish wheels will be shod with high-performance tires; 275/30/ZR19 front and 335/30/ZR20 rears.

The chassis is comprised of 4130 Lightweight Steel Space frame with Honeycomb Composite panels. The S7 LM has advanced wind tunnel developed aerodynamics including integrated split-channel airflow throughout the car, full under-side aerodynamics, advanced design front tray and side skirts, full-body-width rear spoiler, and heat-rejecting tinted glass.

The S7 LM is well equipped with safety features including, but not limited to, integrated roll protection, aluminum honeycomb impact-absorbing panels, 3-point seat belts with automatic pre-tensioner, and aluminum honeycomb front crash structure with integrated rear crumple zones.

Interior convenience and comfort treatments feature a high-volume flow-through ventilation system, A/C, rear view video camera with interior LCD display, 240 MPH speedometer, race-inspired central-mounted digital tachometer with STR-style shift lights, fully adjustable tilt and telescoping steering column, power windows and door locks, keyless remote for doors and rear trunk, variable intermittent windshield wipers, electric heated front windshield, remote engine hatch and fuel filler door releases, and the latest in sound systems. Standard interior trim includes black Alcantara with multi-tone leather and suede. The S7 LM is also equipped with performance sport seating, aluminum and color accents, custom-fitted driver seating position, and a dual leather and Alcantara suede steering wheel. Also included is the special LM-edition trim.

The Saleen S7 LM is priced at $151,000/$0,000. With a mere seven in production, this is the ultimate collector supercar.
2019 Chevy Silverado “test drive report” continued from page 2

The High Value segment includes the ‘Work Truck’ with vinyl or cloth seats and availability of the Regular cab. Remember, this is how all pickup trucks were originally offered. “Custom” is the next High Value truck with crew-cab (four door) body, LED tail lamps and integrated dual exhaust.

And finally in the High Value category is the Custom Trail Boss with off-road equipment including 2-inch suspension lift and the Z71 OffRoad Package, including locking rear differential, skid plates, Rancho shocks, 19-inch wheels and off-road tires.

Rounding out the eight models of the new Silverado is the High feature group: LTZ features chrome accents on the bumper fascia, grille, mirror caps and door handles. Leather interior trim is standard.

The ultimate Silverado is the High Country. It has its own exclusive front grille design with two-tone chrome finish, body-color accents plus chrome assist steps from wheel to wheel. It also includes the new power tailgate as standard equipment.

The work end of the Silverado is the pickup box. The 2019 Silverado offers the most cargo volume in every bed size. The short box offers 63 cubic feet of volume. Most of that volume was created by widening the maximum width of the bed floor nearly seven inches.

The Silverado now has 12 fixed tie-downs, with strength doubling the volume. Most of that volume was created by widening the maximum width of the bed floor nearly seven inches.

The expedition, which used INFINITI’s all new midsize QX50 SUVs to prospect for fossils. The combination of satellite imagery and using technology to push the boundaries of seeking new knowledge. Roy Chapman Andrews was the first explorer to use motorized vehicles to increase the amount of ground he and his team could cover. He would be proud of what we accomplished.

Paleontologists who were able to analyze an enormous amount of data collected from satellite and drone imagery to pinpoint high probability locations for fossilization, based on geological and sedimentary markers. The team could then travel quickly to the sites in a fleet of INFINITI SUVs to prospect for fossils. The combination of satellite and drone imagery was an essential tool for the team to work together—has never be done before. This represents a new, more efficient method of discovering dinosaur fossils.

The expedition was used INFINITI’s all new midsize QX50 SUV, as well as the larger QX60 and QX80 SUVs, endured a heavy sandstorm that blew away two support tents, 110-degree weather, scorpions, leopards and a host of other challenges moving a large caravan across the Gobi’s forbidding terrain.

“The use of satellite images and digital mapping will be re-written to account for these new findings and discoveries,” said Michael Barth, Founder and Chairman, The Explorers Club Hong Kong Chapter, supported by INFINITI Motor Company, announced a breakthrough in paleontological methodology through advanced mapping technology, and a discovery of many significant findings after a 20-day expedition in the Gobi Desert that revisited the route of Roy Chapman Andrews’ ground breaking explorations nearly 100 years ago. The 35-person multidisciplinary team of paleontologists, geologists, archaeologists, scientists and The Explorers Club members found possible evidence of three new dinosaur species, more than 250 new fossil discoveries, and over 660 previously unreported fossils, and hundreds of fossilized bones, including those of mammals, which were not previously known to have existed in the area. The paleontologists were able to discover and analyze hundreds of fossils, and validate the findings and will explore the newly discovered sites over the next several years if not decades.

Paleontologists were able to analyze an enormous amount of data collected from satellite and drone imagery to pinpoint high probability locations for fossilization, based on geological and sedimentary markers. The team could then travel quickly to the sites in a fleet of INFINITI SUVs to prospect for fossils. The combination of satellite and drone imagery was an essential tool for the team to work together—has never be done before. This represents a new, more efficient method of discovering dinosaur fossils.

“Custom” is the next High Value truck with crew-cab (four door) body, LED tail lamps and integrated dual exhaust.

And finally in the High Value category is the Custom Trail Boss with off-road equipment including 2-inch suspension lift and the Z71 OffRoad Package, including locking rear differential, skid plates, Rancho shocks, 18-inch wheels and off-road tires.

RST includes the High Volume trio of models with a street performance appearance for the LT. Additional features include full LED lighting and up to 22-inch wheels.

In Trail Boss adds off-road equipment to the LT including a 2-inch suspension lift and the Z71 OffRoad Package, including locking rear differential, skid plates, Rancho shocks, 18-inch wheels and off-road tires.

The High Volume group includes three models:

- LT features chrome accents on the bumpers, front grille and mirror caps. Chevrolet bowtie in the grille and on the hood.
- RST includes the High Volume trio of models with a street performance appearance for the LT. Additional features include full LED lighting and up to 22-inch wheels.
- Trail Boss adds off-road equipment to the LT including a 2-inch suspension lift and the Z71 OffRoad Package, including locking rear differential, skid plates, Rancho shocks, 18-inch wheels and off-road tires.

The High Value segment includes the ‘Work Truck’ with vinyl or cloth seats and availability of the Regular cab. Remember, this is how all pickup trucks were originally offered. “Custom” is the next High Value truck with crew-cab (four door) body, LED tail lamps and integrated dual exhaust.

And finally in the High Value category is the Custom Trail Boss with off-road equipment including 2-inch suspension lift and the Z71 OffRoad Package, including locking rear differential, skid plates, Rancho shocks, 18-inch wheels and off-road tires.

Rounding out the eight models of the new Silverado is the High feature group: LTZ features chrome accents on the bumper fascia, grille, mirror caps and door handles. Leather interior trim is standard.

The ultimate Silverado is the High Country. It has its own exclusive front grille design with two-tone chrome finish, body-color accents plus chrome assist steps from wheel to wheel. It also includes the new power tailgate as standard equipment.

The work end of the Silverado is the pickup box. The 2019 Silverado offers the most cargo volume in every bed size. The short box offers 63 cubic feet of volume. Most of that volume was created by widening the maximum width of the bed floor nearly seven inches.

The Silverado now has 12 fixed tie-downs, with strength doubling the volume. Most of that volume was created by widening the maximum width of the bed floor nearly seven inches.

The expedition, which used INFINITI’s all new midsize QX50 SUVs to prospect for fossils. The combination of satellite imagery and using technology to push the boundaries of seeking new knowledge. Roy Chapman Andrews was the first explorer to use motorized vehicles to increase the amount of ground he and his team could cover. He would be proud of what we accomplished.

Paleontologists who were able to analyze an enormous amount of data collected from satellite and drone imagery to pinpoint high probability locations for fossilization, based on geological and sedimentary markers. The team could then travel quickly to the sites in a fleet of INFINITI SUVs to prospect for fossils. The combination of satellite and drone imagery was an essential tool for the team to work together—has never be done before. This represents a new, more efficient method of discovering dinosaur fossils.

The expedition was used INFINITI’s all new midsize QX50 SUV, as well as the larger QX60 and QX80 SUVs, endured a heavy sandstorm that blew away two support tents, 110-degree weather, scorpions, leopards and a host of other challenges moving a large caravan across the Gobi’s forbidding terrain.

“The use of satellite images and digital mapping will be re-written to account for these new findings and discoveries,” said Michael Barth, Founder and Chairman, The Explorers Club Hong Kong Chapter, supported by INFINITI Motor Company, announced a breakthrough in paleontological methodology through advanced mapping technology, and a discovery of many significant findings after a 20-day expedition in the Gobi Desert that revisited the route of Roy Chapman Andrews’ ground breaking explorations nearly 100 years ago. The 35-person multidisciplinary team of paleontologists, geologists, archaeologists, scientists and The Explorers Club members found possible evidence of three new dinosaur species, more than 250 new fossil discoveries, and over 660 previously unreported fossils, and hundreds of fossilized bones, including those of mammals, which were not previously known to have existed in the area. The paleontologists were able to discover and analyze hundreds of fossils, and validate the findings and will explore the newly discovered sites over the next several years if not decades.

Paleontologists who were able to analyze an enormous amount of data collected from satellite and drone imagery to pinpoint high probability locations for fossilization, based on geological and sedimentary markers. The team could then travel quickly to the sites in a fleet of INFINITI SUVs to prospect for fossils. The combination of satellite and drone imagery was an essential tool for the team to work together—has never be done before. This represents a new, more efficient method of discovering dinosaur fossils.

INFINITI QX50 & QX60 LEAD GOBI DESERT DINOSAUR EXPEDITION

The Institute of Paleontology and Geology of Mongolian Academy of Sciences, together with The Explorers Club Hong Kong Chapter, supported by INFINITI Motor Company, announced a breakthrough in paleontological methodology through advanced mapping technology, and a discovery of many significant findings after a 20-day expedition in the Gobi Desert that revisited the route of Roy Chapman Andrews’ ground breaking explorations nearly 100 years ago. The 35-person multidisciplinary team of paleontologists, geologists, archaeologists, scientists and The Explorers Club members found possible evidence of three new dinosaur species, more than 250 new fossil discoveries, and over 660 previously unreported fossils, and hundreds of fossilized bones, including those of mammals, which were not previously known to have existed in the area. The paleontologists were able to discover and analyze hundreds of fossils, and validate the findings and will explore the newly discovered sites over the next several years if not decades.

Paleontologists who were able to analyze an enormous amount of data collected from satellite and drone imagery to pinpoint high probability locations for fossilization, based on geological and sedimentary markers. The team could then travel quickly to the sites in a fleet of INFINITI SUVs to prospect for fossils. The combination of satellite and drone imagery was an essential tool for the team to work together—has never be done before. This represents a new, more efficient method of discovering dinosaur fossils.

The expedition was used INFINITI’s all new midsize QX50 SUV, as well as the larger QX60 and QX80 SUVs, endured a heavy sandstorm that blew away two support tents, 110-degree weather, scorpions, leopards and a host of other challenges moving a large caravan across the Gobi’s forbidding terrain.

“The use of satellite images and digital mapping will be re-written to account for these new findings and discoveries,” said Michael Barth, Founder and Chairman, The Explorers Club Hong Kong Chapter, and expedition organizer. “The coop with INFINITI was a good match with the Hong Kong Chapter of The Explorers Club, as we share a passion for exploration and using technology to push the boundaries of seeking new knowledge. Roy Chapman Andrews was the first explorer to use motorized vehicles to increase the amount of ground he and his team could cover. He would be proud of what we accomplished, and thrilled that we were able to inspire meaningful discoveries.”

“The Explorers Club is known for its famous firsts: first to the North Pole, the South Pole, the top of Everest, the bottom of the ocean, and back to the moon. I’m proud to name an expedition, Executive Director of The Explorers Club. “We are very excited to partner with INFINITI, which has a great reputation for pioneering the world’s first productions variable compression ratio engine in its all-new QX50. We share a passion for discovery and for scientific advancement.”

Key Facts:
- Hind leg of an Orichost type dinosaur from 65 million years ago
- Turtle intact from 70 million years ago
- Neck vertebra of a dinosaur with a long neck and tail from the same period
- The arm of an orichost-like dinosaur from 70 million years ago
Montana State Student Loves His Subaru Forester by Zach McCallum

continued from page 4

its slightly larger profile than the Subaru Outback and great safety features. It packs more size than the Outback with the downside of slightly inferior gas mileage. The main advantages of any modern Forester are its large cubic space. Louis and I have been camping, shooting, and fishing in his car. For a college student who likes the outdoors, the Forester by Subaru is a top option.

Kia Sorento at Cougar Crest Estate Winery in Walla Walla, WA (photo by Sally Hanson)

Sally travels to Cougar Crest Estate Winery in a Kia Sorento

continued from page 3

drive enjoyable are the Smart Cruise Control with Stop and Go to help maintain a predetermined distance from a vehicle in front of you, Driver Attention Warning, Lane Keeping Assist, Blind Spot Detection and Forward Collision Warning.

The designated driver deserved an extremely comfortable 14-way power adjustable driver’s seat with perfect lumbar support. Soft nappa leather seating is throughout the vehicle. The interior fit and finish is beautiful and especially noticeable on the doors accented with double stitching and chrome. The attractive dashboard includes an excellent control layout with easy to operate touchscreen, tuning and volume knobs along with clearly marked air controls. The console was designed with trays to hold many small items like keys, phones and coins with a compartment in the middle large enough to stash a small purse. Cup holders are located in all doors as well as the console.

The three-row, seven person seating is perfect for a group to tour the wineries. Since it is a squeeze for adults to fit in the third row and that seating doesn’t accommodate long legs, you will want to find two short, flexible friends to sit in the third row. All passengers have available cap holders and wireless charging ports are included for occupants of the three rows of seating. A panoramic roof with a sun shade gives the Sorento’s passengers plenty of light and offers skyward views.

Our destination in Walla Walla was the Cougar Crest Estate Winery which is located on Frenchtown Road off Highway 12 in the Westside wine region of the Walla Walla valley. We had fond memories of visiting the winery in their early years at the beginning of this century when they were located at the Walla Walla Airport. Ten years ago the winery moved into a beautiful new building that contains a subterranean wine cellar and is made from Rastra blocks, a recycled material consisting of recycled polystyrene mixed with concrete. The environmentally friendly building exemplifies the sustainable practices the winery practices from vineyard to production.

An impressive tasting room is located in the building which is decorated with beautiful wood, fireplace, and plenty of seating for sipping wonderful wines.

Cougar Crest Estate Winery’s vineyard acreage totals 110 acres and is spread out over four different wineries in the Walla Walla Valley. 

Toyota’s New Plano, Texas Headquarters is a State-of-the-Art Structure

continued from page 4

The campus has multi-story covered parking structures to protect vehicles during the hot months and heavy weather days that Texas is noted for. On the back of the building is a large and long video wall about the size of a football field with an eye-catching display.

This video wall backs up to a major freeway just next to the 4 billion dollar Legacy Center that is the new home to Liberty Mutual Insurance and other major companies that have moved to North Texas in the last year. The headquarters with a vast array of solar panels and other environmental features, shows how much effort was put into this facility. The center of the structure is surrounded by black glass and a water-wise atrium. The new headquarters includes several restaurants for employees. This address affords easy access to employees living in North Texas. This 100 – acre campus has lots of room to grow in the future. With around 4,000 employees in this facility, you would never know it.

There are six main buildings housing Toyota’s financial division, the Lexus brand and a technology and engineering research center. Office space is designed to be flexible in the event a change is needed. Amenities include a Starbucks, health center, a credit union and a convenience store run by Walmart.

Another great feature is there are several food stations, one including sushi. A new addition to the current Plano campus will be a museum with vintage cars from the early years and vehicles throughout their success in the U.S. At some point, the general public will be able to tour the museum.

Near Toyota’s Plano headquarters a state of the art Toyota dealership is being built, no doubt it will help Toyota service company and employee vehicles.

This year will also bring an $80 million dollar engineering center in Kentucky; part of the “One Toyota” Project. The 235,000 square foot facility will house more than 600 Toyota engineers with room to grow.

2018 Cadillac ATS Test Drive Report by David Schmidt

Please Join Us for the 10th Annual Legends of Auto Gala - August 15, 2019

Mission Statement
To recognize and award individual accomplishments, that have significantly advanced the auto industry around the world and to help develop the next generation of auto industry leaders.

About Legends of Auto
The “Legends of Auto” is a prestigious event in which we take time to honor key contributors of the automotive industry. Below are some pictures of our recent events.

Honored Members of Legends of Auto

George Barris
Bert Boeckmann
Bob Bondurant
Sandra Button
Corky Coker
Tom duPont

Ken Gross
Dan Gurney
Lee Iacocca
Craig Jackson
Lyn St. James

Parnelli Jones

Twin Turbo V6
Event Honors George Barris Creator of Movie Cars

continued from page 2
tive and Hollywood entertain-
ment history with photographs of George and their custom

cars including Steve McQueen,

Clint Eastwood, Clark Gable,

Frank Sinatra, The Beach Boys,

John Wayne, Elvis Presley, John

Lennon and Yoko Ono, Cher, Bo

Derek and Farrah Fawcett.

AN: What was most surprising
from the sale?

JBP: Amazing how a car

customizer touched so many

people’s lives.

AN: Who do you remember
most?

JBP: What’s really cool is when

you’re sitting in your shop and

Billy Gibbons comes by and he’s

just a true gentleman and enhu-

siast as well. He has his own hot

rods. He just came by to spend
time with us... The stories about

Elvis and what a polite man he

was... Even Cher would bring a

shoe and say I need to paint my

Ferrari this color.

AN: What was your dad’s best
advice?

JBP: I don’t want to hear the

word can’t. There’s nothing you

can’t do and I don’t want to hear

that word.

AN: What would he want his

legend to be?

JBP: In his wildest dreams,

about how we sold his Batmobile

at Barrett Jackson for a record-

breaking sale, the highest paid
tv car that beat the James Bond
car. To be able to experience that

with your family is... he just never

stopped.

Barris Kustom Industries and

Joji Barris can be seen attending
car shows, judging, charity

work, restoring the Barrister and

Specialty Equipment Market

Association (SEMA).

Curing Kids Cancer Gala Raises More Than $110,000

Guests enjoyed a stellar evening

that included a new venue, The

Metropolitan Club, exceptional

silent auction items and one-
of-a-kind live auction pieces.

Auctioneers from Mecum Auctions

were in attendance to facilitate the

exciting live auction.

Additions to the evening besides

the location were a delicious

signature cocktail, dessert bar

and live music from Atlanta. After

mixing and mingling, Gala goers

also had a fun time in the photo

booth.

“...the evening was wonderful.

...the guests enjoyed their time at

the new venue, enjoying delicious

food and drinks and participating in

our live and silent auctions. Most

importantly, guests helped us raise

more than $110,000 for childhood

cancer research,” said Lauren

Korthoff, Program and Event

Director for Curing Kids Cancer.

Honorary chairwoman Michelle

“Buttercup” Davis went above and

beyond to secure auction items,

invite guests and assist with the

evening. Curing Kids Cancer

honored Buttercup, Dr. Maryam

Fouladi, Gala guest speaker and

medical director of the brain tumor

center at Cincinnati Children’s

Hospital Medical Center, and

Tony Barnhart, Gala host and SEC

football analyst.

Curing Kids Cancer would

like to thank our Gala sponsors

for a spectacular evening: The

Metropolitan Club, Malvern Bank,

iHeartRadio, Modern Luxury,

Children’s Healthcare of Atlanta,

Photography by Zelda and Atlanta

Dance Party.

Curing Kids Cancer’s third annual gala raised more than $110,000 for cutting-edge childhood cancer therapies.
Marysville Toyota (NOW OPEN) Serves N.W. WA for Sales & Service Needs

by Bill McCallum

Marysville Toyota has only been open for two months and customer reviews on Google are all claiming “...... the negotiation-free sales process to be the best in the Northwest for buying a new Toyota.” The all-new Toyota Dealership is located off of I-5 between Marysville and Smokey Point Boulevard. (Marysville Toyota.com)

The all-new 40,000 square foot facility on 6 acres was built to service customers between Everett and Mt Vernon, but it is all ready drawing new customers from the Northwest part of the state. Marysville Toyota stresses service for trucks, suv’s and cars with 10 factory trained technicians, state-of-the-art equipment, 18 service bays and a comfortable waiting lounge. (see photos)

Marysville Toyota’s Mission Statement is: “Buy the easy way. Get the vehicle you want in full transparency, nothing hidden. We advocate for you. Our non-commissioned, experienced consultants are focused on getting you the right vehicle, at the right price with the right terms. We keep things simple and stress-free. One person, negotiation-free sales process. One excellent experience. You’re in control and you select the vehicle that fits your life style and budget.”

I would say it’s well worth a trip up I-5 or down I-5 for a visit to Marysville Toyota if you’re in the market for a new or pre-owned Toyota or looking a friendly place to have your current vehicle serviced. ALSO VISIT - marysvilletoyota.com or call (360) 651-0200

To receive the “Estate” designation, the winery and vineyards have to be in the same A V A, have to be controlled or owned by the winery and the wine has to be made from start to finish at the winery.

As you should assume from the name of the winery, the husband and wife team of Deborah and David Hansen graduated from Washington State University. Deborah received her degree in Pharmacy and David in Veterinary Medicine. They began their careers in the San Francisco area where the art of wine making became their passion while visiting California wineries. Starting in 1980 with fruit orchards, the Hansens have been in agriculture ever since, establishing their first vineyard in 1997.

Having won numerous gold medals in many competitions and acclaimed best of class wine by prestigious magazines, our favorite varietals offered at Cougar Crest Estate Winery include Malbec, Merlot, Syrah and Cabernet Sauvignon.

Parking at Cougar Crest Winery was made easier with the Park Distance Warning, Rear Cross Traffic Collision Warning, and the Surround View Monitor that gives a 360 degree view of the vehicle’s relationship to the surrounding area.

The Sorento’s cargo space is easily accessible with the hands-free Smart Power lift gate opening when it senses your smart key—with no hands or feet required. The lift gate can also be adjusted to your height preference making closing the hatch easier and to avoid opening so high that it hits the ceiling in your garage. Another nice feature is a remote release that lets you fold down the second row seats while standing at the rear of the vehicle to expand space as you pack the vehicle. Cargo netting and tie downs are conveniently arranged for cargo when the third seat is down. The Sorento offers ample space to purchase many cases of wine at the Cougar Crest Estate Winery.

And what common thread links the Kia Sorento and Cougar Crest Estate Winery? Both are class acts that are definitely worth the drive.
Pirelli and Prada Partner for Luna Rossa’s New America’s Cup Challenge

Pirelli has signed an agreement with Luna Rossa Challenge for the constitution of a partnership aimed at the development of a multi-year project which will lead to Luna Rossa’s participation in the next edition of the America’s Cup, set for New Zealand in 2021.

Pirelli and Prada will be co-titled sponsors of the vessel and will detail their plans at a soon to be organized event.

Now in its 36th edition, the America’s Cup is the oldest trophy in the history of sport, which sees the participation of the most technologically advanced boats in the world.

The project will entail, over the 4-year period 2018-2021, a series of regattas, events and activities with the two brands as protagonists. In 2019, the first two regattas of the America’s Cup World Series will take place in the Mediterranean; in 2020 another three World Series regattas will be held in Europe, the United States of America and Asia; from January 2021, always in Auckland, there will be the Prada Cup, Challenger selection regattas, followed by the 36th edition of the America’s Cup Presented by Prada, scheduled for March 2021.

A3, which make luxury brands more affordable for the millennial buyer, however, some millennials are more likely to consider up and coming models from import brands such as Kia and Mazda, as well as other German and Japanese models, because of their popularity. It was also noted that as they age, Millennials seem to become more practical in their automotive tastes.

Based on their study, Autotrader found that Millennials are looking for experts to help answer their questions when they finally make it to the dealership. Some want quick, efficient purchases and come with their minds practically made up, based on their research noted above, but some want to feel, touch, drive and some time and space to make their final decision.

They appreciate help and expertise in a kind, professional and non-pressure type of way.

Millennials pride themselves on smart purchases their way, their time line. Read them, be helpful and patient with them, and let them steer you to which car they want to purchase.

Coming up is my highly anticipated article with a reputable Washington State mechanic in business for over 30 years. He will discuss his advice for Millennials in both car buying and maintenance.

SHOWCASE REVIEWS

HONDA FIT 5DR SPORT

The Honda Fit subcompact hatchback has been a steady seller for Honda. Value based at $17,500 as tested the Fit is also good in the MPG dept.

BASE PRICE: $17,500
TYPE: sub-compact
ENGINE: 1.5L 4 cyl
TRANS: 6 speed manual
HORSEPOWER: 130 hp
MPG: 29 city / 36 hiway

KIA RIO EX 5DR

The fourth generation KIA RIO offers more room and a new infotainment center with voice recognition. Good MPG and priced right for a sedan.

BASE PRICE: $18,700
TYPE: Sedan
ENGINE: 1.6L 4 cyl
TRANS: 6-Speed AT
HORSEPOWER: 130 hp
MPG: 28 city / 37 hiway

TOYOTA RAV4 HYBRID

The Toyota RAV4 has been a top seller and a segment leader for years. The popular small SUV has all the bells & whistles. It’s also a hybrid.

BASE PRICE: $32,185
TYPE: Small SUV
ENGINE: 2.5L DOHC 4 cyl
TRANS: AWD-i
HORSEPOWER: 194 hp
MPG: 34 city / 30 hiway

TOYOTA CAMRY

Toyota Camry is Toyota’s best selling sedan and has also been a top selling car in the United States in recent years. Price right with many free options

BASE PRICE: $34,950
TYPE: Sedan
ENGINE: 3.5L
TRANS: 8 sp CVT
HORSEPOWER: 261 hp
MPG: 22 city / 32 hiway

INFINITI QX80 4WD

The Infiniti QX80 AWD is the “Big-Daddy” in the Infiniti SUV lineup. All the bells and whistles that go with a luxury SUV.

BASE PRICE: $67,850
TYPE: SUV
ENGINE: 5.6-LITER V8
TRANS: 7-Sp AT
HORSEPOWER: 400 hp
MPG: 15 city / 19 hiway

MITSUBISHI ECLIPSE CROSS

The Eclipse compact SUV is a new offering from Mitsubishi. Priced below the Outlander it offers many of the same options.

BASE PRICE: $27,895
TYPE: SUV
ENGINE: 1.5 L
TRANS: 6 sp Sport
HORSEPOWER: 161 hp
MPG: 25 city / 28 hiway

2018 Toyota Sequoia “test Drive Report”

continued from page 3

Driving Dynamics:
In regards to driving dynamics, the Sequoia is able to perform both in the city, and off road. The large seats are extremely comfortable and the rear cabin can easily seat adults in the middle and rear rows. The cabin was very quiet at high speeds, and the vehicle cruises comfortably down the road as if you’re riding in a luxury car. As to be expected, parallel parking in a city setting can be cumbersome in the Sequoia, but a rear view camera and parking sensors are there to assist you. Not to mention the turning radius is superb for a vehicle of its size and stabilizer bars in the front and rear keep body roll to a minimum.

Once off road, the Sequoia easily traveled down trails with its Bilstein shocks, offering a comfortable ride that a baby could sleep through. The 10 inches of ground clearance allows you to pass over small obstacles with ease. I didn’t try any trails extreme enough, but there are multiple 4wd modes and a locking center differential on the TRD Sport for all of your off road adventures.

Interior:
The interior, as mentioned, is massive and luxurious. The large 10-inch adjustable heated leather seats in the front and large knobs make the Sequoia ideal for driving to your annual skiing trip. The TRD Sport features second row captain’s seating and an sliding capacity of 7, while the third-row seats there is 18.9 cubic feet of space, fold down the third row with the push of a button and the space increases to 66.6 cubic feet, fold down the second row, and you have a huge 120.1 cubic foot area to work with. We used the Sequoia to bring all of the materials we needed to our Legends of Auto venue, and we didn’t even need to fold all of the seats down!

The ride for our first Golf Course Ride & Drive Feature of the season is the 2018 Toyota 4Runner TRD Off-Road SUV. This popular SUV is powered by a 4.0L DOHC 24-valve V-6 delivering 270 HP and 20 mpg on the highway when you’re not off-roading. The Star Safety System option includes Vehicle Stability Control and 10 airbags. We recommend Bear Creek Golf Course at Winthrop, WA as part of your Northwest hiking, cycling, camping, fishing, hunting, river rafting, or your road-trip vacation in Eastern, WA. For additional information: Call (509) 996-2284 or visit www.bearcreekgolfcourse.com

- Family fun.
- Great for shows and entertainment.
- Corporate Events, birthday parties.
- Safe environment for shows wanting families to attend.
- Educational, interactive, team building.
“Chanterria McGilbra MBA”
founder of Prancing Ponies

by Bill McCallum

Chanterria McGilbra, MBA defines what it means to be a Women in the Auto World. Chanterria is the founder of the Prancing Ponies Foundation, Prancing Ponies Leadership Academy, Prancing Ponies Car Show and the Prancing Ponies Rally. I first met Chanterria at the second annual Prancing Ponies All-Women Car Show this year in Carmel where they honored our Legend Lyn St. James.

With Lyn’s help we invited the Prancing Ponies participants to our Legends of Auto Gala Dinner in Monterey during Classic Car Week. (see page 1 story)

A statement in the 2018 Prancing Ponies All-Women Car Show Program says it all .... "The women who are brave enough to participate in our Car Show lay the foundation for future generations of girl auto enthusiasts to do the same. It’s why our mission is “Empowering Women - Inspiring Girls’ to ‘Create Women Leaders One Girl at a Time.’"

Following the ground-breaking Prototype 9 concept first revealed at the 2017 Pebble Beach Concours d’Elegance, INFINITI has ‘looked back to go forward’ with the Prototype 10. A future vision realized by INFINITI designers, Prototype 10 evokes the spirit of early Californian speedsters, and is informed by some of the most iconic car designs of all time. This is the first project to come to fruition under the direction of Karim Habib, INFINITI’s new Executive Design Director, and it hints at how the brand’s design teams will evolve the appearance of its production cars. A project spanning the globe, the Prototype 10’s creation has been overseen by INFINITI’s Japan design center, designed digitally in the UK, and crafted by hand in San Diego, California.

The new concept is resolutely forward-looking in terms of its aesthetics and is a natural evolution of the form language first seen in the INFINITI Q Inspiration and Prototype 9. The monoposto (single-seat) cockpit is consistent with INFINITI’s driver-focused approach, and is indicative of the new opportunities created for INFINITI by adopting electrified powertrains and flexible vehicle platforms. “We all feel a certain degree of passion when talking about roadsters and speedsters. We are equally passionate about the potential that electrification holds for the future of our cars — a daring speedster is the perfect study for our designers to explore an electrified future and ignite such excitement.” Roland Krueger, President, INFINITI.

“The INFINITI Prototype 10 echoes the layout and design of early speedsters. This period saw the creation of some of the most evocative car designs of all time, where power was celebrated through high-powered single-seat competition cars. Our new concept speaks of an electrified future, something which is reflected in its form and details. It is appropriate that we found inspiration in an optimistic bygone era in which cars were characterized by the simple love of driving.” Karim Habib, Executive Design Director, INFINITI.

The new concept follows two other design studies revealed by INFINITI in the last 12 months: the Prototype 9 – first revealed in 2017 – and the INFINITI Q Inspiration Concept, unveiled at the 2018 North American International Auto Show in Detroit. Where Prototype 9 – a sleek, open-wheeled, electric retro-roadster — imagined an alternative history for INFINITI, the Prototype 10 is resolutely focused on what the future holds for the brand. Utterly daring in its bold execution, the new concept is inspired by the spirit of early speedsters, its form and function evoking driving pleasure and thrilling performance.
FCA U.S. Marks Opening of New Mopar Parts Distribution Center

Line-X to Enable Extreme Impact and Weather Resistance for Curry Supply Commercial Vehicle Line-Up

LINE-X – a global leader in versatile protective coatings – announced on Tuesday a new channel of communication and enhancement for its industrial coatings business.

"When I was introduced to the LINE-X product, the opportunity to make our products even more compelling – including extended vehicle life and the ability for us to customize colors and surfaces. Even more, the continued support, training and customer service that LINE-X has provided us has been second-to-none."

"As a leading manufacturer of the most resilient protective coatings, LINE-X offers its industrial and manufacturing customers new ways to leverage the many unique features of our products in demanding environments. LINE-X is a leader in providing state-of-the-art training and world-class support to all of its industrial clients."

"We’re excited that LINE-X can help Curry Supply offer our customers a wide variety of options with color-matching capabilities and other style preferences. Over time, Curry Supply products will continue to look great after years of extreme conditions and hard use. In addition to using LINE-X on their new vehicles, Curry Supply has also incorporated LINE-X protective coatings into their commercial vehicle reconditioning and restoration service."

"Curry Supply manufactures some of the very best construction and service vehicles available anywhere – and we believe that the addition of extreme protection from the LINE-X coating system and harsh conditions – makes them an even more formidable force in the construction, maintenance and service industries," said Dennis Weese, president of LINE-X. "Adding in truly unique style and customization options is incredibly important today, and our most recent LINE-X developments are a testament to that."

"Curry Supply protects some of the most well-organized and hardworking fleets, but the vehicles are also exposed to a variety of conditions on a daily basis, from extreme weather to corrosive environments. In addition to the extreme operating conditions, Curry Supply also offers vehicle-information applications, which is a new channel of communication and preference. That’s what LINE-X Protective Coatings bring to the table. We’re excited that LINE-X can be such a big part of taking Curry Supply products to the next level."
The Qt Company and Toradex announce partnership to accelerate software development

The Qt Company, the provider of the leading device creation framework Qt, today announced a software development partner- ship with Toradex, the preferred computing solution provider focusing on low to medium volume projects in the embedded industry.

With today’s technology envi- ronment, companies looking into developing embedded devices are concerned with keeping costs at a minimum while getting their product to market quickly and providing their end user with the best experience. Through this partnership, The Qt Company and Toradex have committed to providing their customers with the best experience and support, when choosing the software and hardware to use with their next project.

“The expanded partnership with Toradex will help our customers focus on accelerating software development with the Qt commercial framework and Toradex’s proven SoMs (System-on-Modules), so the customer can get to market much faster. We are confident that this partnership creates an excellent opportunity to bring the collective benefits of Qt and Toradex to a global market,” said Patrick Yi, Head of Global Channel Sales, The Qt Company.

“Qt has been a preferred cross-platform software framework with development tools for embedded customers. In fact, Toradex has been providing our industrial SoMs with Qt’s development platform for many years, and thanks to that we have been sharing several key customers together. We are excited to announce an even closer partnership which will allow our customers to develop and deploy Qt applications easier than ever before,” said Samuel Imgruen, Vice President, Global Sales, Toradex. The integration of Boot2Qt with Toradex Easy Installer provides an unmatched experience to get started with Qt on industrial grade Arm System-on-Modules (SoMs). The device side debugging with Qt Device Creation, a highly popular choice for embedded devices, is further simplified thanks to the new collaboration.

About The Qt Company
Qt Group (Nasdaq Helsinki: QTOM) is a global software company with a strong presence in more than 70 industries and is the leading independent technology behind millions of devices and applications. Qt is used by major companies and developers worldwide, and the technology enables its customers to deliver exceptional user experiences and advance their digital transformation initiatives. The company’s net sales in the year 2017 totaled 36.3 MEUR, and it employs some 300 people. To learn more, visit http://qt.io.

About Toradex
Toradex is a Swiss-based company with offices around the world, offering Arm®-based System on Modules (SoMs) and customizable Single Board Computers (SBCs). Powered by NXP® and NVIDIA® SoCs, the pin-compatible SoMs are ideal for demanding edge computing applications. Toradex SoMs offer scalability in terms of price, performance, power consumption and I/Os. Complemented with direct online sales and long-term product availability, Toradex offers direct premium support and ex-stock availability with local warehouses. Toradex SoMs come with a free production-quality Linux BSP based on the Yocto Project. For more information please visit https://www.toradex.com/

Pirelli and Prada Partner for Luna Rossa’s New America’s Cup Challenge

continued from page 15
This will be Luna Rossa’s fifth tilt at the Trophy and in this edition, that is, the first challenger of the last edition’s winning team, Emirates Team New Zealand, that will be the Challenger of Record, is the ideal partner for this new America’s Cup challenge. With over half a century’s experience at the highest levels of high technology world sports, it will be an important asset at the heart of our project. In this sense it is correct to speak of a real and true collaboration between the Team and Pirelli,”

“Pirelli – said Marco Tronchetti Provera, Executive Vice Presi- dent and CEO of Pirelli – chose to be a part of this project because it represents both a sporting and technological challenge, able to bring Italy and the Pirelli brand to the attention of the entire world. The America’s Cup, as Formula 1 is to motorsport, is the most prestigious sailing competition, with a great history and tradi- tion. It embodies values and is for a public of impassioned fans that perfectly match Pirelli’s, enabling the company to continue enriching its brand, reinforcing its positioning in high technology with clients around the world and its relationship with consumers through traditional channels and all the new digital platforms.”

Dodge Selects Nexen Tire as Tire Supplier for the launch of the New 2019 Dodge Challenger R/T Scan pack “1320”

All-New Nexen N’FERA SUR4G Drag Spec Tire Co-Developed with Dodge/SRT to Deliver Unrivaled Drag Strip Performance

Although the name Nexen Tire might not roll off your tongue like a handful of other tire brands, auto-makers and enthusiasts alike are looking to this “next generation” tire manufacturer as America’s Fastest Growing Performance Tire Brand.

Recently, Dodge selected Nexen Tire for the debut and launch of the new 2019 Dodge Challenger R/T Scat Pack 1320, designed to deliver pavement-pounding fun on the dragstrip. The tire, called the Nexen N-FERA SUR4G Drag Spec was designed together with Dodge and is exclusive to Dodge and the Challenger R/T Scat Pack 1320. The tire has been tested around the country on multiple tracks to ensure maximum performance regardless of surface.

For more information, contact nexeinfo@godriven360.com.

Pirelli Joins United Nations Road Safety Trust Fund

Pirelli is the first tire company to join and obtains seat on Advisory Board

With Cyber Car, Pirelli brings intelligent tires into the safety mix

Pirelli has become the first tire company to join the United Nations Road Safety Trust Fund, pledging a contribution of $600,000 (2018-2019) to help the fund in its efforts to make a significant impact in global road safety. At the same time, the company’s Chief Sustainability and Risk Governance Officer, Filippo Bettini, was nominated to have a seat on the fund’s Advisory Board.

As a leading tire maker, Pirelli’s foremost concern is to increase driving safety, principally through the application of innovative technologies. Contributing to the fund, and thus to the United Nations Sustainable Development Goal of halving the number of worldwide road accident deaths by 2020, is a natural and complementary extension of the company’s own mission.

“I welcome this important pledge from Pirelli to the United Nations Road Safety Trust Fund. With momentum building, I call on the support of other donors so that we may scale up the resources urgently required for action to address the critical road safety situation”, stated the UN Secretary-General’s Special Envoy for Road Safety, Jean Todt.

“The Road Safety fund promotes the United Nations is an important initiative which Pirelli is pleased to support and which we quickly joined when the opportunity of participating was proposed by the UN Secretary-General’s Special Envoy for Road Safety, Jean Todt.”

Pirelli and McLaren have started a new chapter in their long-standing technical partnership, which will be one of the most challenging in history. Namely, Pirelli has developed multiple P Zero performance levels on and off track for the new McLaren Senna, a special car with unique characteristics.

The new tires that will equip the British hypercar are extreme versions of both the Pirelli P Zero Trofeo and P Zero tires. The P Zero Trofeo tire developed for the Senna, when equipped as a track tire, can also be used for the road. In the same way, the P Zero tire – by nature more of a road tire – is additionally suitable for use on the track.

To come up with the best-quality product, Pirelli’s engineers relied on an extensive shared history with McLaren – especially its tire development for the P1 – and most importantly, lessons learned from motorsport.

The McLaren Senna is an explicit sports car, reminiscent of a GT3 race car on the road. This is thanks to massive power (800 horsepower), an extremely light carbon fiber chassis, a sophisticated race-derived suspension system and cutting-edge aerodynamics.

These headlining characteristics required made-to-measure tires capable of withstanding extreme acceleration and aerodynamic loads.

Pirelli paid particular attention to materials to reach the targeted objectives, choosing those most suited to state-of-the-art performance, with light weight and optimal design ensuring perfect reliability and strategic durability.

All of these elements combined guarantees perfect balance and road holding, with precise turn-in, impressive stability and maximum traction under all driving conditions, as well as reduced braking distances.

In particular, the innovative tire design with its asymmetric profiles and sidewalls delivers optimal lateral grip and maximum cornering forces between front and rear axles.

---

**About Nexen Tire America Inc.**

Inspired by Nexen’s global family of drivers to engineer superior performing tires – from championship-winning Formula DRIFT drivers, rock-climbing off-road enthusiasts to everyday commuters – Nexen Tire utilizes proprietary technology and the highest quality standards in the industry to guarantee world-class products backed by unrivaled customer support for the life of each tire. As a worldwide leader in high-performance, passenger, SUV / light truck and winter offerings, the company is second-to-none in research, development and state-of-the-art manufacturing.

And as part of a select group of tire manufacturers worldwide that are specified on original equipment vehicles, Nexen delivers premium products at a sensible price.

---

**Road Safety**

Pirelli, sister company to McLaren, has committed to quantified assistance to the United Nations’ Road Safety Trust Fund.

The Road Safety fund promotes the United Nations Sustainable Development Goal of halving the number of worldwide road accident deaths by 2020. This is a natural and complementary extension of the company’s own mission.

Pirelli paid particular attention to materials to reach the targeted objectives, choosing those most suited to state-of-the-art performance, with light weight and optimal design ensuring perfect reliability and strategic durability.

All of these elements combined guarantees perfect balance and road holding, with precise turn-in, impressive stability and maximum traction under all driving conditions, as well as reduced braking distances.

In particular, the innovative tire design with its asymmetric profiles and sidewalls delivers optimal lateral grip and maximum cornering forces between front and rear axles.
ACME AUTO DETAIL

Redmond based Acme Auto Detail is owned and operated by the Antonio Castillo family. Antonio has been in the auto industry since 1999 first working with new car dealerships then opening and owning his own shop in Redmond. Acme details cars, trucks, SUV’s and boats from Renton to Everett including the entire Eastside. Acme Auto Detail is open Monday thru Friday 8 am to 6 pm and Saturday’s 9:30 am to 5 pm and appointments are suggested. Acme Auto Detail offers courtesy shuttle service with pickup and delivery. Mobile service is also available. Antonio said “.....we specialize in high quality details.” If you are looking for an eastside detail shop call Acme Auto Detail (425) 885-2423 or visit www.acmeautodetail.net

MONTEREY TOURING VEHICLES (MTV)

Carmel Valley residents, Rob and Heather Gardner have turned a classic car collecting hobby into business. The business, Monterey Touring Vehicles (MTV) uses the Gardner’s 30 classic cars as a rental fleet for tourists and local residents to tour Carmel, Monterey, Big Sur and the world famous Pebble Beach 18 mile drive. The Gardner’s said “.....we thought these cars need to be driven and why not let our clients have fun driving them.”

The Monterey Touring Vehicle (MTV) fleet includes; a 1965 Ford Shelby Cobra, 1985 Chevy Corvette, 1970 Pontiac Firebird, 1985 Porsche 550 Spyder, 1957 Chevy Bel Air, 1971 Cadilac Eldorado, 1978 Volkswagen Bug Convertible, 1949 Willy’s Overland, 1978 Citson 2CV, and a 1981 Delorean to name a few. You can rent a classic car for 1/2 a day (4 hrs.) or a full day (8 to 24 hrs.) Prices range from $200 (1/2 day) to $800 (full day). Seattle Consumers Can Now Buy New, Pre-Owned Cars 100% Online with Home Delivery, Five Day Return Period, No Hassles

Harnish Auto Family among 48 National Dealerships Partnering with National Tech Marketplace Joydrive to Revolutionize Car Buying

- Consumers want alternatives to the traditional dealership model, and dealers want to evolve with consumer expectations.
- Joydrive allows customers to shop and buy new and used cars online, with home delivery, five day return period, and other perks -- no dealership visit necessary.
- Joydrive will soon be the nation’s largest digital store with nearly twice Carvana’s inventory.
- Journalists are invited to give Joydrive a “test ride.”

Harnish Auto Family is among 48 National dealerships partnering with tech marketplace Joydrive to offer local consumers a way to buy new and pre-owned vehicles 100% online with home delivery and a five-day return period -- no dealership visit necessary.

Harnish Auto Family joins cutting-edge dealers around the country as part of Joydrive’s unique and fast-growing marketplace of more than 7,000 new and pre-owned cars. For Seattle consumers, it’s a leap into the future. Many auto industry analysts have predicted the changes that Joydrive offers, including Mike Jackson, CEO of AutoNation, who has promised, “disruption and revolution are coming.”

“Other dealers are selling cars today the same way they sold them 40 years ago, even though the world has transformed and many consumers clearly want an alternative,” says Chris Brown, Vice President of Subaru of Puyallup, part of the Harnish Auto Family. “We are giving consumers what they want, with our same stamp of quality and care by partnering with a company that has designed an easy, transparent and mobile-friendly solution.”

Adds Joydrive founder Hunter Gorham, “The data clearly show that customers want a different purchasing model — less than one percent prefer the current car buying process. The most canny and farsighted dealers are joining us to give consumers what they most want -- a new buying experience. We’re making buying a car easy and even fun.”

How Joydrive Works

Joydrive is a digital marketplace that facilitates transactions between customers and a highly select network of dealers. By providing customers access to a marketplace, Joydrive can offer a wide selection of brands, vehicles, purchasing and financing options and ensure the experience is consistent and transparent across all dealers. Additionally, by embracing the deal, Joydrive can offer many customers delivery in as fast as one day and follow-up service as needed.

Joydrive, which maintains offices in Seattle and Dallas, and which will be nationwide by the end of the year, works in three easy steps (click here for a video), and journalists are invited to take a test drive with a representative:

1. Buy Online: The entire process can be completed online, from vehicle selection to delivery. After securing a vehicle with a $500 fully refundable deposit, a user-friendly dashboard shows all details of the transaction including trade-in, Vehicle Service Contracts, financing options and delivery scheduling. Of Joydrive’s completed transactions to date, approximately 40% included a trade-in and 60% included financing.

2. Home Delivery: Communicating through the dashboard, customers coordinate the vehicle delivery date and time with their licensed dealer representatives. Because vehicles are located on dealer lots, delivery can occur as fast as one day.

3. 5-Day Return Period: Buying a car can be the largest transaction customers make, so Joydrive and their dealer members offer a 5-day return period or up to 250 miles to ensure customers love their purchase. Customers can drive the car how they will actually use it. To date, less than two percent of Joydrive’s transactions have been returned.

About Harnish Auto Family

The Harnish Auto Family includes Subaru of Puyallup, VW of Puyallup, Chevrolet Buick GMC of Puyallup and Chevrolet of Everett. They are one of the top dealer groups in Washington and are highly respected in their community and industry.

**“Empowering Women – Inspir-ing Girls”**

**HISTORIC CAR SHOW**

This is the first time since its inception that Women will have their own car show during the #MontereyCarWeek! Thanks to the City Council of Carmelby-the-Sea, we are excited to be a part of hosting our second all-woman car show on August 22nd but we know we would not be here if it weren’t for so many courageous women car enthusiasts that have endured before us and we want to thank you all!

This year we will honor Professional Women Race Car Drivers! There will be a special appearance by the Professional Race Car Driver LYN ST. JAMES! Amongst her many career wins she is also been an important role model for women in the racing world, mentoring race car drivers like Danika Patrick – who is the only woman to qualify for Indy 500 this year! We are thrilled to have Lyn be honored at this year’s Car Show! She exemplifies why Prancing Ponies Foundation exists... Women supporting the ‘Creation of Future Women Leaders One Girl at a Time’!

**CAR SHOW WITH A CAUSE “Empowering Women – Inspir-ing Girls”**

The idea for the Prancing Ponies Foundation, Rally, and Car Show stems from an experience in San Francisco where I was at a stop sign next to a bus stop watching 3 teenage girls and reminiscing about my own experience as a teenager. The girls suddenly grew silent and I noticed they were looking at me. One of the girls said ‘Miss, I like your car’ and I said ‘I expect you to get one too’. Our eyes locked and I’ll never forget her little face as she slowly nodded in agreement.

Lyn St. James Honored at Prancing Ponies Car Show & Legends of Auto Gala During Classic Car Week

Lyn St. James at the Prancing Ponies Car Show in Carmel, California

**Over 4,225 New & Pre-Owned Choices EVERY DAY!**

The finest new car franchises = Truly great trade-ins

With the new car brands that the O’Brien Auto Group has, like a Portland Kia dealership and a Toyota-Scion dealerships, we take in a bunch of quality trade-ins every day. Our customers are constantly trading up to a new vehicle leaving us with a tremendous selection of well-maintained, one-owner pre-owned vehicles—many still with factory warranties including Certified Pre-Owned. Stop by one of our stores or shop us online. From commuters to luxury, we’ve got what you’re looking for!
Mecum Monterey 2018
Daytime Auction Reaches $47 Million in Overall Sales

10th Anniversary Auction Achieves 38-Percent Growth in Sales Over 2017

Mecum Auctions outdid itself again with a 38-percent increase in total sales at its 10th annual Daytime Auction held in Monterey, California. With quality, rarity and diversity punctuating the vast Mecum lineup, the 2018 auction hurdled past last year’s totals as overall sales reached an impressive $47 million and marked the anniversary event as the highest-grossing Monterey auction in Mecum’s 10 years on the peninsula. In all, 394 exceptional autos changed hands in just three days, Aug. 23-25, and even individual sales prices reflected the strength of the auction’s stellar lineup.

Including everything from prewar luxury motorcars to racing legends and modern hypercars, top sales at the Daytime Auction fittingly represent the astonishing cross-section of multimillion-dollar investment-grade autos offered throughout the three-day event. The auction’s top seller was an absolutely stunning 1933 Duesenberg Model J Convertible Sedan (Lot S111) that brought $3.19 million. The auction’s diverse lineup was further highlighted by the sales of a 2003 Ferrari Enzo (Lot S126) that sold for $2.2 million. Another Duesenberg to land among top sales was the 1929 Model J Convertible Sedan (Lot S116) of the Reading/Adams/Academy of Art University Collection. The car brought a $1.15 million sale, taking the prestigious school’s entire seven-car offering to $2.82 million overall as all vehicles in the group hardened sold.

Unique sales that drew substantial attention from the public included the $1.127 million sale of the Indy 500-winning 2012 Dal- lara DW12 Honda Indy Car (Lot S90). The car was offered with an unusual engine lease agreement that will allow the new owner to take possession of the car’s race-winning power plant—something that is virtually unheard of in the world of factory-sponsored racing. The 1987 Porsche 959 Komfort (Lot F109.1) offered on Friday was another vehicle that became an attraction unto itself, and its sale at $467,500 demonstrated that its unbridled potential was unquestionably evident. The 1985 Moderna GT Spyder California (Lot S189) featured in “Ferris Bueller’s Day Off” demanded serious attention as well, and heated bidding brought its final selling price to $407,000.

The complete top 10 collector-car sales at the Mecum Monterey 2018 auction include:

- 1933 Duesenberg Model J Convertible Coupe Disappearing Top Roadster (Lot S93) at $3,850,000
- 2014 Ferrari LaFerrari (Lot S93) at $3,850,000
- 2014 Ferrari LaFerrari (Lot S111) at $3,190,000
- 2003 Ferrari Enzo (Lot S126) sold for $2.2 million
- 1929 Model J Convertible Sedan (Lot S116) sold for $3.19 million
- The 1985 Moderna GT Spyder California (Lot S189) sold for $467,500
- Doug’s Porsche 928 (Lot S48.1) that brought $2.86 million and a 1989 Porsche 962 (Lot S126) that sold for $2.2 million.

Other key highlights included a 1933 Duesenberg Model J Convertible Coupe Disappearing Top Roadster (Lot S93) offered on Friday that sold for $3.85 million. A 1987 Porsche 959 Komfort (Lot F109.1) offered on Friday that sold for $467,500. The 1985 Moderna GT Spyder California (Lot S189) featured in “Ferris Bueller’s Day Off” that sold for $407,000. Doug’s Porsche 928 (Lot S48.1) that sold for $2.86 million and a 1989 Porsche 962 (Lot S126) that sold for $2.2 million.
