

# WATER LEVEL SENSOR

Farmbot water level sensors provide remote water level monitoring for: tanks, dams, bores, turkey nests & channels. Works anywhere providing real-time reporting of issues, events & abnormalities in your water system, via SMS & email alerts. The water level monitor is self-installable & immediately operational. Users receive multiple updates per day via phone or email in addition to real-time triggered / actionable alerts.

## PRICING

**Farmbot Monitor with Water Level Probe** RRP \$1,190.00 excl. GST

**Annual Satellite Data & Service Fee**

RRP \$456.00 excl. GST

**Annual 4G/5G/LTE Data & Service Fee**

RRP \$342.00 excl. GST

Works Anywhere

Save time on fuel and labour costs

Easy Installation

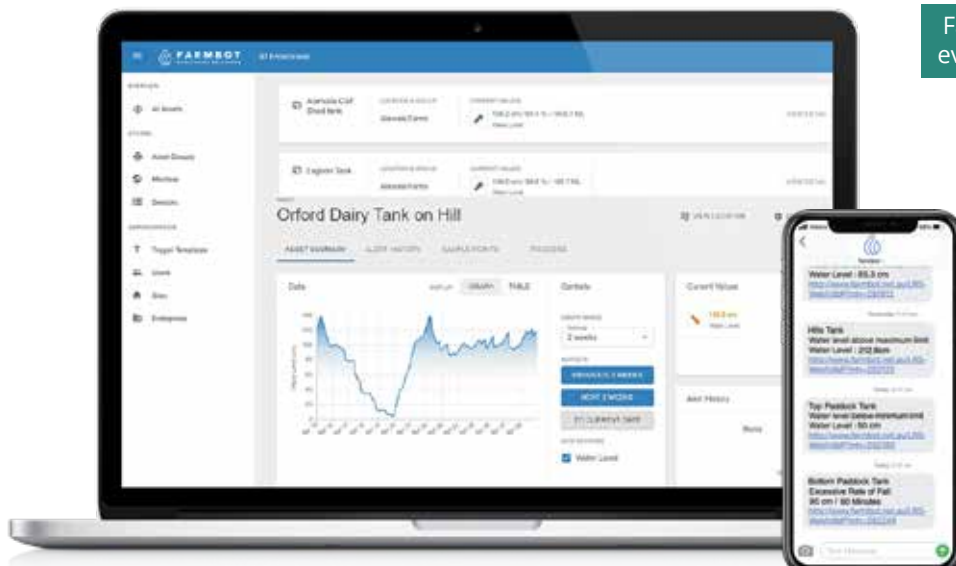

Satellite or Cellular (4G/5G/LTE)

Detect leaks and faults in real-time

## REAL-TIME INSIGHTS

- Simple overview of water levels
- Alerts to MyFarmbot dashboard, email or phone

Farmbot is employed in every corner of Australia

# RAIN GAUGE

The Farmbot Rain Gauge enables you to know your daily aggregate rainfall across your entire farm. You can make informed decisions about farming operations, pasture development and yield potential before you've stepped foot into the field. Users have the capability to receive alerts based on custom triggers and are also able to analyse monthly rainfall comparison data and export to spreadsheets.

## PRICING

\* Requires Farmbot Monitor

Rain Gauge

RRP **\$229.00**  
excl. GST

Annual Data  
& Software Fee

RRP **\$52.00**  
excl. GST

Self-emptying

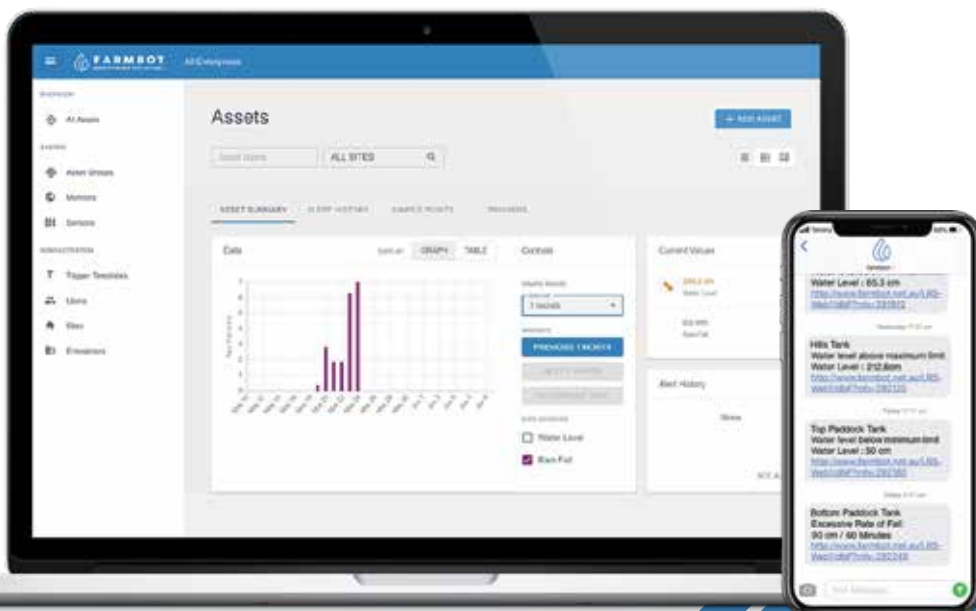

Compatible with any Farmbot Monitor

Rainfall reported in millimeters with a maximum of 1% error

## REAL-TIME INSIGHTS

# DIESEL LEVEL SENSOR

Farmbot Diesel / Fuel level sensors provide remote real-time reporting of issues, events & abnormalities in your diesel tank. Data can be reported as level, volume in litres and percentage full. Users receive multiple updates per day via phone or email in addition to real-time triggered alerts.

## PRICING

Farmbot Monitor

RRP \$1,490.00  
excl. GST

Annual Satellite  
Data & Service Fee

RRP \$456.00  
excl. GST

Annual 4G/5G/LTE  
Data & Service Fee

RRP \$342.00  
excl. GST

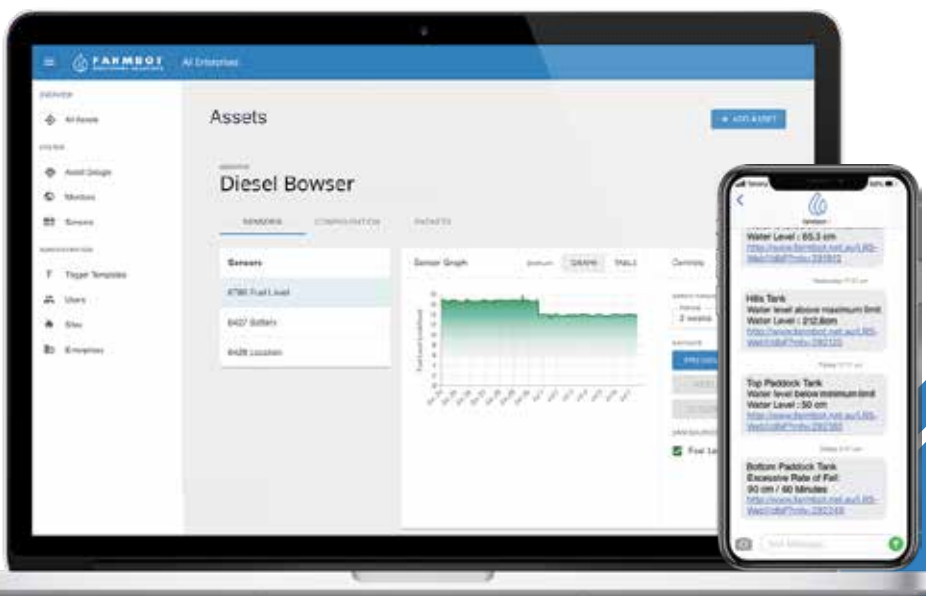

Able to manage fuel/diesel levels

Provides real-time alerts when  
fuel/diesel is being pumped

## REAL-TIME INSIGHTS

# WATER FLOW SENSOR

The Farmbot Monitor can interface with up to 4 flow sensors and provide aggregate flow data for each. The solution records and reports litres-per-minute flow rate data and can help prevent water loss. It can work on a wide range of standard water pipe types with all relevant fittings supplied, including: seals, brass threaded adaptors with nuts, poly compression fittings, reed switch with up to 30-metres of custom cable lengths (pre-connected and wired for immediate plug-in). Like all Farmbot sensors, the flow sensor is end user-installable and immediately operational. Users can receive alerts based on custom triggers and are also able to analyse monthly flow comparison data and export to spreadsheets.

## PRICING

\* Requires Farmbot Monitor

Flow Sensor  
(33mm-50mm)

RRP \$899.00  
excl. GST

Annual Data  
& Service Fee

RRP \$52.00  
excl. GST

The flow sensor can be combined with other sensors such as line pressure, water level & rain gauge

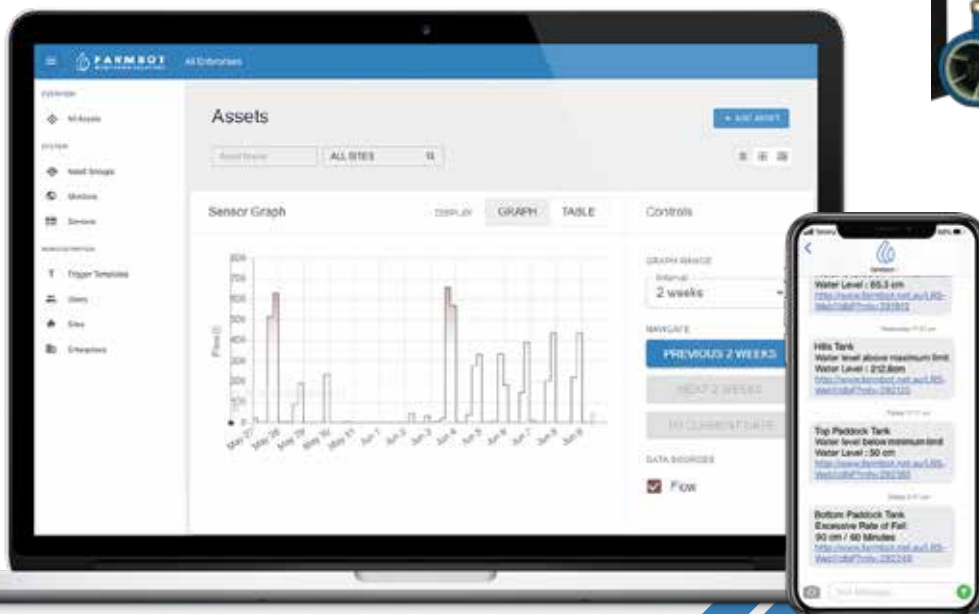

Helps pin point leakage and blowouts in extended reticulation systems quickly

\* smaller/larger flow monitoring sizes available on request

**Farmbot Provides:**

# LINE PRESSURE SENSOR

The Farmbot line pressure sensors provide insights into the pressure levels & changes in any line. Detailed data allows a better understanding of pumps, controllers, valves and the overall reticulation system. It facilitates the early detection of faults, problems or impending failures. The line pressure sensor can monitor any line (water, gas, and other liquids) up to 2500 kPa / 25 BAR in standard form. Users have the capability to receive alerts based on custom triggers and are also able to analyse monthly pressure comparison data and export to spreadsheets.

## PRICING

\* Requires Farmbot Monitor

Line Pressure Sensor

RRP \$499.00  
excl. GST

Annual Data  
Software Fee

RRP \$52.00  
excl. GST

The line-pressure sensor can be combined with other sensors such as flow, water level & rain gauge

Determines pump issues, fluctuations, problems and impending failures

Monitor water, gas, & other liquids

Monitors up to 0-2500 kPa/25 BAR

## REAL-TIME INSIGHTS

The line pressure sensor provides kilopascal unit data of line pressure. The sensor includes: ¼ Inch BSP male fitting, snubber valve and a cable length of 10m. Custom cabling available on request.
