MTT

SoLo B is MTT's solution for reliably positioning and precisely guiding most ER Ultrasound probes during needle based prostate ultrasound procedures.

Key Features

- Quickly installed with three easy steps
- Fixed to an OR bed rail or utilized with an optional floor stand
- Extremely mobile with small footprint
- Easily sanitized with wipe disinfection (mechanical arm) and autoclaving (stepper) if required
- Simply stored in a post-procedure case
- Stable and robust system

Our system is compatible to most ultrasound units. The probe can be fixed in the cradle in 2 simple steps.

Our reliable universal articulating arm can be operated with only one hand. Probe positioning is precise, quick and easy.

With additional fine tuning functions the probe can be elevated and swiveled

Additional functionality also available. Ask for SoLo A!
