HIGH ACCURACY THERMOPLASTIC MASKS

eXaCast

**Diverse range of masks adapted to
different types of treatment**

eXaCast Thermoplastics

The masks from the eXaCast, eXaCast Accuracy and Violet series are manufactured with thermoplastic of the highest quality to offer improved immobilisation and reproducibility in treatments. The rigidity and reduced shrinkage guarantee a perfect fit with the patient's contours, ensuring comfort. Mold times vary between the different thermoplastics to adapt to workflows in each centre.

A range adapted to the needs of each centre

AnatGe offers a variety of masks adapted to the needs of our clients and the different types of treatment:

- ▶ Multi-point masks with Anchor Push-pins.
- ▶ Multi-point masks with L-shaped anchor point
- ▶ U-Type Masks and S-Type with with frame (IMRT) and without.
- ▶ SRS Masks compatible with BrainLab systems.
- ▶ V-shaped Masks compatible with ELEKTA systems.

PRECISION: our thermoplastics reach a high level of precision lower than 2 mm.

PATIENT COMFORT: the thermoplastics include non-stick coating to avoid sticking to the patient's skin or hair.

“eXaCast, high quality to obtain the best results.”
