

# BOLD Selections

## Indica

### Afghan

The classic of all classics and a genetic that needs no introduction. The cannabis world would not be what it is today without the genetic blueprint laid down by this and other landrace genetics. Everyone should try this classic varietal at least once.

Mazaar Landrace

*B-Caryophyllene, Limonene,  
B-Myrcene*

## Indica Dominant Hybrid

### Baby Jokerz

Baby Jokerz is an interesting genetic bred by Compound Genetics. This combination of White Runtz and Jet Fuel Gelato brings two of much hyped modern cultivars together in one frosty package.

White Runtz x Jet Fuel Gelato

*B-Caryophyllene, Limonene,  
B-Myrcene*

## Sativa Hybrid

### Banana Loaf

Banana Loaf is an sativa dominant hybrid that has all the best traits of both its indica and sativa parents. Being considered a more potent strain, it has THC levels that average around 20-25%. Expect gassy/diesel vibes from the El Chapo father as it is based on Headbanger from Karma Genetics.

Banana OG X El Chapo

*B-Caryophyllene, B-Myrcene,  
Limonene*

# BOLD Selections

## Indica Dominant

### Banana Hammock

Bred by Ethos out of Colorado, Banana Hammock is an indica cross of Grape God and Mandarin Sunset. Large dense purple flowers with fruity tropical terpenes smelling of grape and honey. Banana Hammock is potent, usually testing above 20% THC. It's large, colorful colas are certainly a sight to behold.

Grape God x Mandarin Sunset

Terpinolene, B-Myrcene,  
A-pinene

## Indica Hybrid

### Blueberry Scone

Bred by @khushkush, Blueberry Scone is an **indica dominant hybrid** cross between Colorado's Commerce City and the Thai based "The One". This sweet-tasting variety provides long-lasting relief for patients treating symptoms throughout the day and is great for creative outings.

Commerce City x The One

Limonene, B-Myrcene,  
B-Caryophyllene

## Indica Dominant Hybrid

### Blueberry x Mandarin Cookies

Not much is known about this specific cut, but we do know it's big and frosty! This unique cultivar grows like an old school indica with big bushy plants and large individual nugs. The blueberry flavor cuts through with a sweet dough undertone. A unique addition to the BOLD genetic stable.

Blueberry x Mand. Cookies

B-Caryophyllene, Linalool, A-Humulene

# BOLD Selections

Sativa Dominant Hybrid

Blue Dream

Blue Dream, a **sativa dominant hybrid** originating in California, has achieved legendary status among West Coast strains. Crossing a Blueberry indica with the sativa Haze, Blue Dream balances full-body relaxation with gentle cerebral invigoration. Novice and veteran alike enjoy the level effects of Blue Dream, which ease you gently into a calm euphoria.

Blueberry x Haze

*B-Myrcene, A-Pinene,  
B-Caryophyllene*

Sativa Hybrid

Cali Kush  
Haze

Cali Kush Haze is a sativa-dominant hybrid originating in Canada by way of California. Cali Kush Haze was bred by Crop King Seeds and is a great example of a “haze” terpene profile. The high terpene content can also help newer patients experience a true “entourage effect” when used.

Amnesia Haze X OG Kush

*Terpinolene, Cis-B-Ocimene,  
Limonene*

Hybrid

Chem  
Squeezy

Bred by Free World Genetics, and not found very easily outside of the Colorado market, Chem Squeezy is slowly on the rise. When it comes to flavor, you can expect to experience notes of pine, rubber, lemon and orange.

Lemon Squeezy X Free World  
Genetics

*B-Myrcene, B-Caryophyllene,  
Limonene*

# BOLD Selections

Hybrid

## Cookies and Chem

Bred by Green Point Seeds, Cookies and Chem is a **hybrid** cross between Cookies and Cream and the classic Stardawg. This sweet-tasting variety provides long-lasting relief for patients treating symptoms throughout the day, but high doses can induce an early night's sleep. Cookies and Chem brings together a proven resin producer in the Cookies and Cream and increases the yield and vigor by crossing to the sought after Stardawg male to create a boutique cross with commercial yields.

Cookies and Cream x Stardawg

*B-Caryophyllene, Limonene,  
B-Myrcene*

Sativa Dominant

## Copper Chem

Copper Chem may be the epitome of the Chem Dawg line. This sativa from GreenPoint Seeds combines the classic Chem 4, of Chem Dawg fame with the solid building blocks of the Star Dawg male. This genetic creates large sweet-smelling colas with notable diesel/chem notes on the nose. A great example of what a "Chem" should smell like.

Chem 4 X Stardawg

*B-Myrcene, Limonene,  
B-Caryophyllene*

Indica Dom Hybrid

## Corey's Rainbow Bridge

Corey's Rainbow Bridge is a Indica--dominant hybrid. CRB sports a classic Kush look and smell with notes of pine, soil, and sweet chocolate coming through on the nose.

Stardawg x Hashplant x  
Petrol Rainbows

*Limonene, B-Myrcene, B-  
Caryophyllene*

# BOLD Selections

Indica Dom Hybrid

## Cream Cake

If you're on the hunt for any amazing dessert-like strain with plenty of tranquil effects, you've found it with Cream Cake. The flavor follows the name with this bud, offering a sweet and sugary creamy vanilla cake taste accented by hints of fresh fruity berries and a touch of woody pine. The aroma is almost the same, although it does have a notable earthy diesel effect to it, to

Ice Box Pie x Early Orange

*B-Caryophyllene, Limonene,  
Linalool*

Hybrid

## Cookies And Cream

Bred by Exotic Genetix, Cookies and Cream is a hybrid cross between Starfighter and an undisclosed GSC phenotype. This sweet-tasting variety provides long-lasting relief for patients treating symptoms throughout the day, but high doses can induce an early night's sleep. Cookies and Cream took first place in the hybrid category of the 2014 Denver Cannabis Cup.

Starfighter x GSC

*B-Caryophyllene, Limonene,  
B-Myrcene*

Hybrid

## Double Stack

Combining two genetics sought after for both their potency and terpene profiles, Double Stack by Compound Genetics is sure to please even the most jaded connoisseur. Heavy gas and diesel tones from the Jet Fuel mix with the sweet funky nose of the Apple Fritter to create a real taste sensation!

Apple Fritter X Jet Fuel Gelato

*Limonene, B-Caryophyllene,  
Linalool*

# BOLD Selections

Sativa Hybrid

## Durban Poison

Durban Poison is a true classic in the world of cannabis genetics. This long-standing sativa was first found and stabilized in and around Durban South Africa. "Durban" soon spread throughout the cannabis world via the Netherlands and onto the Americas. This true landrace sativa features a unique terpene profile that is only found in true Durban.

South African Landrace

*Terpinolene, B-Myrcene,  
B-Pinene*

Sativa Hybrid

## Ecto-Cooler

Ecto-Cooler is a sativa-dominant cross of a unique East Coast Panama Chunk female to the classic Chem 91. A large yielder, with dense, trichome covered colas. Very pink and purple hues can be seen with a proper flush. Comes from GreenDream in Boulder Colorado and is not widely available commercially.

East Coast Panama Chunk x Chem 91

*B-Myrcene, Limonene,  
B-Caryophyllene*

Indica Dominant Hybrid

## GG4

GG4 has truly taken the US cannabis world by storm. This California creation was spread widely after phenotyping and stabilizing the genetic was completed. This **hybrid** cross of Chocolate Diesel and Chem Sister created a large yielding diesel style cultivar with pest resistance galore. There is no wonder why the large yields and heavy tones of pine, skunk, and tar create a unique and highly sought after cultivar.

Chocolate Diesel x Chem Sister

*B-Caryophyllene, Limonene,  
B-Myrcene*

# BOLD Selections

Indica Hybrid

## Granddaddy Purp

Granddaddy Purp is the best known, most sought after and very well loved “Purple” strain in the US, and for good reason. This strain is known for both its body and head highs. Most patients report feeling less pain, sleepy, appetite loss, and stress relief.

Purple Urkle X Big Bud

*B-Myrcene, Limonene,  
B-Caryophyllene*

Sativa Hybrid

## Green Crack

Green Crack (aka Cush) brings a classic **sativa hybrid** to the patients of Arkansas. This old school cross of Skunk #1 and Afghani genetics should be equally uplifting as it is relaxing and just as manageable as it is potent. The structure of this strain is nothing short of breathtaking with almost every plant displaying long spears of bright lime green buds and heavy trichome coverage. Great for day-time activities and clear headed, focused work situations.

Skunk #1 x Afghani

*Myrcene, Caryophyllene,  
Limonene*

Indica Hybrid

## Georgia Cry

Georgia Cry is a sweet and sedating union of Georgia Pie and Cali Sunset. Smelling of grape soda, citrus fruit, and blueberry muffins, Georgia Cry is quickly gaining fame for its taste and bag appeal. This **indica dominant hybrid** is a great example of the new school of genetics coming out of California.

Georgia Pie x Cali Sunset

*B-Caryophyllene, Limonene,  
A-Humulene*

# BOLD Selections

Sativa-Dom Hybrid

## Golden Goat

Golden Goat needs no introduction. A classic sativa from the Denver medical market this uplifting plant packs a punch. Crossing the old Romulan sativa with an Island Sweet Skunk in Topeka Kansas, this globe trotting genetic will leave users satisfied with its sweet candy nose and piney citrus flavor.

Romulan x Island Sweet Skunk

Terpinolene,  $\beta$ -Caryophyllene,  
Cis- $\beta$ -Oocimene

Sativa Hybrid

## Glass Slipper

A cross between Cinderella 99 and Pineapple 99, Glass Slipper is a **sativa dominant hybrid** described to have a sweet, somewhat fruity terpene profile. A classic sativa hybrid, the old school Cindy 99 by Brothers Grimm has been a staple of the commercial and medicinal scenes for many years. Expect hints of grapefruit and a sweet, creamy finish on the nose when opening the jar.

Cindy 99 x Pineapple 99

Limonene,  $\beta$ -Myrcene,  
 $\beta$ -Caryophyllene

Indica-Dom Hybrid

## Headband Cookies

Bred by Ethos Genetics out of Denver Colorado, Headband Cookies is a poly-hybrid mix of all its parents best parts. Headband Cookies is a potent mix of (ChemD X i95 ) X Mandarin Cookies (Headband Cookies X i95) X California Black Roze. Certainly a mouthful, this mix will give you a full cerebral high, with minty earthy smells and taste.

(ChemD x Mand. Cookies) x  
(Headband x CA Black Rose)

$\beta$ -Caryophyllene, Limonene,  
A-Humulene

# BOLD Selections

Indica Dom Hybrid

## Holy Roller OG

Holy Roller OG is an indica-dominant **hybrid** originating in Colorado and bred by Crate Digger Seeds. Crossing Holy Grail Kush with the sought-after Earth OG by Apothecary Seeds. With a sweet floral aroma and funky, lingering back end. This OG genetic is a great example of the look, smell, and bud structure of a “clone only” OG.

Holy Grail Kush x Earth OG

B-Myrcene, B-Caryophyllene,  
Limonene

Hybrid

## Jungle Breath

Bred by Jungle Boys, Jungle Breath is a **hybrid** cross between Motorbreath and one of their main males, Jungle Cake. This sweet-tasting variety provides long-lasting relief for patients treating symptoms throughout the day, but high doses can induce an early night's sleep. The nose tends towards the funky with a pungent finish reminiscent of the “breath” female lineage.

Motorbreath x Jungle Cake

B-Caryophyllene, Limonene,  
B-Myrcene

Indica

## Jungle Wi-Fi

Jungle WiFi is a **Indica hybrid** genetic bred in California. Crossing an OG cross of WiFi Cake with the sought-after Jungle Cake, this genetic boasts a large bud structure and can exhibit heavy trichome production. A very indica forward head high gives way to relaxed muscles and is great for both daytime and night.

Wifi Cake X Jungle Cake

B-Myrcene, Limonene,  
B-Caryophyllene

# BOLD Selections

Indica Hybrid

La Bomba

La Bomba is an upcoming genetic bred by Compound Genetics. This combination of Wedding Cake and Jet Fuel Gelato brings two of much hyped modern cultivars together in one frosty package.

Wedding Cake x Jet Fuel  
Gelato

Limonene, Linalool,  
B-Myrcene

Indica Dominant Hybrid

LA  
Kush Cake

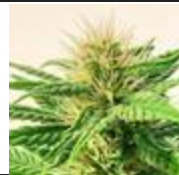

This Blend of Wedding cake and Kush Mints is known for its delightful smells of vanilla, earthy peppermint, and subtle hints of citrus. A clone only cultivar originating in California. LA Kush Cake is a great example of the new style of **Hybrid** that is taking over the West Coast scene.

Wedding Cake X Kush Mints

Limonene, Linalool,  
B-Caryophyllene

Indica Dominant Hybrid

Luxar Dos

Luxor-Dos packs a flavor wallop with its smell closely resembling ripe fruit and gas/diesel, in the best way possible. Tight, colorful buds excite the senses. This high potency strain is ideal for hard heady conversations, lazy days and daily stressors.

Cherry Dosidos X Jet Fuel  
Gelato

Limonene, B-Caryophyllene,  
Linalool

# BOLD Selections

Hybrid

Mac Stax

Mac Stax is the perfect hybrid, meaning it is just as much Indica as it is Sativa. You will experience the heavy cerebral high, and the full body high. You will get the best of both worlds with this mix. Also known as Miracle Alien Cookies, the scent resembles citrus and spices, while the taste is closer to earthy tones.

Alien Cookies X Colombian X  
Starfighter

B-Myrcene, B-Caryophyllene,  
Limonene

Indica Dominant Hybrid

Marshmallow  
OG

Bred by Compound Genetics, Marshmallow OG is a **hybrid** cross between Jetfuel Gelato and a Chem D x Triangle Kush Male. Marshmallow OG is a great hybrid for and packs a great OG/Kush taste. Tastes range from gassy funk to creamy chocolate tones in the more Triangle Kush leaning phenos.

Jetfuel Gelato X (ChemDx TK)

Limonene, B-Myrcene, B-  
Caryophyllene

Indica Hybrid

Member  
Berry

Bred by Ethos Genetics, Member Berry is best for nighttime use as it does have typical indica effects. The Skunk Berry female used in this cross packs a sweet tart terpene profile that is heavy on linalool and limonene. A delicious cultivar for those looking for a sweet treat.

Skunk Berry X Mandarin Sunset

B-Myrcene, Limonene,  
B-Caryophyllene

# BOLD Selections

Indica Hybrid

Mendo  
Breath

This rare find from the California scene brings on the average potency and turns it into a full cerebral and body high. As you slip into a happy sedation and full hazy euphoric state you might notice an aroma of earthy fresh hints and a taste of sweet vanilla and caramel.

OGKB X Mendo Montage

*Limonene, B-Myrcene,  
Linalool*

Sativa

Mr. Clean

Mr. Clean is a sativa cultivar bred by Exotic Genetix, this mix of Lime Skunk and The Cube will bring a new burst of flavor to the BOLD lineup. This strain smells of limes, and tart candies with a more sativa like bud structure. Mr. Clean has proven to be a winner in the BOLD lineup.

Lime Skunk x The Cube

*Terpinolene, Limonene,  
B-Myrcene*

Hybrid

Purple  
Milk

A breeders cut from Compound Genetics, Purple Milk combines Horchata and Grape Gas to create a smooth grape-y delight that is sure to please. Purple Milk turns a dark indigo during late flower and produces large, dense colas.

Horchata x Grape Gas

*B-Caryophyllene, Limonene,  
Linalool*

# BOLD Selections

Hybrid

Pinata

Pinata is a potent hybrid that gives you the best of both the Indica and Sativa worlds. This Swamp Boys creation out of Florida brings together serious resin producers to create a new school hybrid that any “cookies” fan could enjoy. Expect dense pinecone nugs and dank floral tones on the nose.

Wedding Cake x White OG

*B-Myrcene, Limonene,  
B-Caryophyllene*

Indica Dom Hybrid

Pura Vida

A cross between LA Pure Kush and Appalachia, Pura Vida is a **indica dominant hybrid** described to have a nice cerebral effect with a sweet, earthy, OG profile. Bred by Bodhi seeds out of California; Pura Vida packs a punch in its tight, compact nuggets. The Appalachia male was one of Bodhi’s main males for many years and combines the popular Green Crack with Tres Dog.  
LA Pure Kush x Appalachia

*Terpinolene, Limonene,  
B-Myrcene*

Indica Dominant Hybrid

Queen  
Mother  
Goji

A selected Goji OG phenotype by Bodhi Seeds of California. Queen Mother OG combines one of Bodhi’s males with an interesting indica selection hand sourced by Bodhi while on an excursion to Nepal. Released to select dispensaries in California, the three selected Gojis made their way to Colorado and on to Arkansas.

Nepali OG x Snow Lotus

*B-Caryophyllene, Limonene,  
A-Humulene*

# BOLD Selections

Indica Dominant Hybrid

## Rainmaker

Rainmaker from Ethos Genetics has quickly become a patient favorite in Colorado and is now available in Arkansas. This Citral Skunk and Mandarin Sunset cross packs a delicious skunky, funky nose with a tight and frosty bud structure. The taste is better experienced than described.

Citral Skunk x Mand. Sunset

*B-Myrcene, Limonene,  
Linalool*

Indica Dom Hybrid

## Runtz Muffins

Runtz Muffin was bred by Barney's Farm to be a conglomeration of all the hype genetics of the moment, and it delivers. Runtz Muffin packs a fantastic nose with fruit punch, citrus, and sweet candy up front and a piney loam back end that will keep you coming back for more. Expect tight "cookie" like buds and great colors throughout the herb.

Zkittlez x Gelato #33 x  
Orange Punch

*B-Caryophyllene, Limonene,  
A-Humulene*

Sativa Leaning Hybrid

## Sour Berry Blue

One of the tarest and tangiest strains in existence, Sour Berry Blue has quickly become a rare delicacy sought out by fine cannabis connoisseurs everywhere. A cross of the High Times award-winning strain Alpha Blue paired with a carefully selected Sour Strawberry BX3 male from B.O.G. Seeds, this sativa-leaning hybrid has been bred for flavor and vigorous growth. If candy-like terpene profiles are your thing, this strain is for you.

Alpha Blue x Sour Strawberry

*B-Caryophyllene, Limonene,  
Linalool*

# BOLD Selections

Sativa

## Super Lemon Haze

After taking home the High Times Cannabis Cup 1st place in 2008 and 2009, Super Lemon Haze became a celebrity in the industry. Being Super Silver Haze's sister, the strain is also known for its citrus smell, energetic feelings and refreshing flavors. Classic Lemon Haze flavors for the most discerning patient.

Lemon Skunk X Super Silver Haze

*Terpinolene, Cis-B-Ociemene,  
B-Myrcene*

Indica Hybrid

## S'mores

S'mores is another exotic from California that has made its way into the BOLD genetic stable. This genetic is an interesting cross of the venerable Stardawg with a closely held California cultivar named Pink Panther. This hybrid genetic is bred by Virgin Seeds and is a great choice for patients who want a flavorful hybrid with interesting fruit and earth flavors.

Stardawg x Pink Panther

*B-Caryophyllene, B-Myrcene,  
A-Humulene*

Sativa Hybrid

## Sour Diesel

Sour Diesel is a classic sativa known for its pungent aroma and energy inducing effects. Legend has it that this genetic was developed in the 1990's based on mexican sativa seedstock that made its way up the east coast to New England. BOLD has sourced a well known example of the genetic and has begun dialing in the strain to Arkansas' unique climate.

*Caryophyllene, Myrcene,  
Limonene*

# BOLD Selections

Indica

## Strawberry Shortcake

Strawberry Shortcake an Indica strain that lives up to its name. The aroma and taste while partaking is described as extremely sweet. This strain is perfect for nighttime use when you have nothing else to do.

White Wookie X The White

*B-Caryophyllene, B-Myrcene,  
A-Humulene*

Indica Hybrid

## Stardawg F2

This F2 selection is a mix of all the best things about Stardawg. Bred by GreenPoint Seeds of Colorado. This cultivar is one of BOLD's newest from-seed projects. We expect some really interesting results from this genetic in the coming months. Expect a VERY different terpene profile than you are used to with Stardawg.

Forbidden Fruit X Mendo Royal X  
CA Black Rose

*B-Myrcene, A-Pinene,  
Limonene*

Indica Dominant Hybrid

## Stargazer

While medicating with Stargazer you will taste the flavor lemony pine and earthy diesel mixed with the smell of fresh cracked pepper from the terpene Beta Caryophyllene. This selected phenotype of StarDawg F2 is new to BOLD and offers a unique into the inner workings of the Stardawg lineage.

Warlock x AK-47 x Sensi Star

*Terpinolene, B-Myrcene,  
Limonene*

# BOLD Selections

## Indica Dominant Hybrid

### Strawberry Guava

2nd Place Winner of Chalice's 2017 hash competition for Best Non-Solvent and 1st Place winner for Highest Terpenes in a non-solvent. This Terpene rich goddess is made up of Oni Seeds' 14er Selection of Strawberry banana (Crockett) and Papaya. The Papaya has an excellent terpene profile from mangos, papayas and melons with a heavy funky/rotting fruit to an almost super sweet candy spearmint finish with its Afghani father, vigorous growth, great yield and a quick finish (8-9 weeks).

Strawberry Banana x Mango x Afghani

*Limonene, Myrcene,  
Caryophyllene*

## Sativa Hybrid

### Sumo Grande

With Sumo Grande being a (90/20) Sativa hybrid, you will not feel many of the Indica effects because the heavy Sativa will take over. These effects will take you on an uplifted high that will leave you feeling creative, tingly, and ready for a snack.

Sensai Star X Sour Diesel X  
Hong Kong X Nina Limone

*Terpinolene, B-Myrcene,  
Cis-B-Ocimene*

## Hybrid

### White 99

White 99 is a hybrid genetic originating in Florida and has quickly spread throughout the cannabis world. Crossing Cinderella 99 with the sought-after The White by Krome. This genetic boasts a tight bud structure and can exhibit beautiful coloration late in flower with a proper flush. A very sativa forward head high gives way to relaxed muscles and is great for both daytime and night.

Cindy 99 x The White

*Limonene, B-Myrcene, B-  
Caryophyllene*

# BOLD Selections

Hybrid

## Wolverine

Bred by 3rd Coast Genetics out of Michigan; Wolverine is a **hybrid** cross between Animal Cookies and Third Coast's main male, Pure Michigan. This gassy variety provides long-lasting relief for patients treating symptoms throughout the day, but high doses can induce an early night's sleep.

Animal Cookies x Pure Michigan

*B-Caryophyllene, Limonene,  
A-Humulene*

# BOLD TICAL Selections

Indica hybrid

## Glitter Bomb

Another Compound Genetics creation that has made its way into the TICAL genetic stable Glitter Bomb is an interesting cross of an OGKB B. Headband mother and Compound's flagship Grape Gas #10. Glitter Bomb packs on the new school taste and jar appeal. Expect dense buds and grape flavors!

OGKB Blueberry Headband x  
Grape Gas #10

*B-Caryophyllene, Linalool,  
B-Myrcene*

Indica Hybrid

## Glue Ball

Glue Ball brings a solid mix of old school and new school to Arkansas. Original Glue x Snowball cross should be equally uplifting as it is relaxing and just as manageable as it is potent. This GG4 based genetic exhibits the same sticky sweet nose but packs a more indica style effect that leaves one wanting more.

Original Glue x Snow Ball

*B-Myrcene, Linalool,  
B-Caryophyllene*

Indica Dominant Hybrid

## Heavy C.R.E.A.M

Bred by Free World Genetics, Heavy Cream, smells like you're walking through an orange orchard. This is no surprise because its parents are Orangino 2.6 X Creamsicle OG. Free World Genetics themselves best describe the buds as "Chemy Citrus Cream".

Orangino 2.6 X Creamsicle OG

*B-Caryophyllene, B-Myrcene,  
A-Humulene*

# BOLD Selections

Sativa

## Acapulco Gold

Acapulco Gold needs no introduction. A full on sativa and one of the most important breeding strains in the world. Acapulco Gold has a legacy of being compared to a 5 star meal and is becoming harder to find. An aroma of earth and pepper with a hint of burnt toffee greets the patient upon first opening the jar.

*B-Caryophyllene, Limonene,  
B-Myrcene*

Indica- Dom Hybrid

## Hash Plant

Bred by Sensi Seeds, Hash Plant is known for her short growing span, aroma and special genetic lineage. As one of the original indica genetics widely available on the international scene, Hash Plant will delight patients both old and new. Experience one of the building blocks of modern commercial cannabis.

*Caryophyllene, Pinene,  
Linalool*

Sativa-Dom Hybrid

## Panama Red

This sativa dominant strain quickly picked up attention in the 1960's for its speedy and intense effects, not to mention a great name which spread through the culture up and down the West Coast. With it's main terpene being Pinene, you can expect a scent of pine needles, parsley, and rosemary.

*Pinene, Myrcene,  
Caryophyllene*

# BOLD Edibles

## Chocolates

BOLD uses Dutch and Belgian chocolate and custom made molds and tempering work stations to create consistent and flavorful chocolates. The utmost care is taken when dosing these chocolates to ensure an even efficacy across all batches.

By Arkansas state law all edibles must be dosed to 10mg of THC per dose. BOLD is continuing to develop delivery methodologies that will help all patients of Arkansas find a solution that works for them.

## Available flavors:

- Milk
- Dark
- Caramel Pretzel (Milk chocolate, Caramel, crushed pretzels)
- Dark Espresso (Dark Chocolate, espresso powder)
- Blueberry Muffin (White chocolate, Freeze Dried Blueberries)
- Candy Cane (White chocolate, Crushed Candy Canes)
- Strawberry Shortcake (White chocolate, freeze dried strawberries, Biscoff Cookie Crumbs)
- Pumpkin Delight (Milk chocolate, Pumpkin Spice)
- Key Lime Pie (White Chocolate, Lime extract, Processed Biscoff, Food Coloring)
- Cookie Monster Madness (White chocolate, processed oreos, food coloring)
- Cosmic Coma (White chocolate, brownie bits, chocolate fudge brownie liquid, food coloring, rainbow candy chips, edible glitter)
- Peanut Butter (Milk Chocolate, Peanut butter)
- Strawberry Blend (Dark Chocolate, white chocolate, freeze dried strawberries)
- Orange Raspberry (Dark Chocolate, Orange Extract, freeze dried raspberries)
- Cookie Dough (White Chocolate, brown sugar, chopped cookie dough bites, Vanilla extract)
- Cereal Milk (White Chocolate, Red velvet flavoring, orange extract, processed multicolor marshmallows)
- S'mores (Dark Chocolate, Processed white marshmallows)

# BOLD Edibles

## Available 10 Pack Flavors:

- Grape
- Kiwi
- Lemon
- Mango
- Orange Cream
- Raspberry
- Strawberry
- Strawberry Cream
- Watermelon

## Gummies

BOLD creates gummies based on Indica, Sativa, and high CBD genetics. Both using full spectrum cannabis oil as well as distillate. Food grade flavorings and industry standard production methodology create a tasty and consistent product.

### Ingredients:

- Pectin
- Sugar
- Sodium Citrate
- Water
- Tapioca
- Bitter Blocker
- Powder Flavor
- Liquid Flavor
- Potassium Sorbate
- Malic Acid

## Available 25 Pack Flavors:

- Grape
- Orange Cream
- Strawberry
- Watermelon

## Available Multi Dose Flavors:

- Black Forest Cake
- Cereal Killerz

# BOLD Edibles

## Available Honey

Locally sourced Honey, heated in a warm water bath, dosed with distillate, and blended beautifully for 2 hours.

### Ingredients:

- Honey
- Distillate

# Distillate vs. Full Spectrum

## What's in your cartridge?

### The Entourage Effect

The Entourage Effect refers to the theory that cannabinoids and terpenes have a beneficial reaction when used in conjunction. The diverse chemical availability in whole plant medicines such as Full Spectrum carts is remarkable in its own right, but research looking into how cannabinoids and terpenoids work together adds another level of intrigue.

### Distillate:

Distillate is, at its core, concentrated THC and CBD. If distilled properly all other compounds are removed from the concentrate. This includes terpenes and other flavonoids that may have medicinal and beneficial properties for patients. Think of distillate as moonshine. If a patient is looking for only the highest THC levels, distillate will win every time. This does not mean that distillate is always a better option. Terpenes (both botanically and cannabis derived) are added back into the distillate to give it a flavor; which means distillate will always be lacking in the “entourage effect”

### Full Spectrum:

BOLD is able, through a proprietary post extraction methodology, to retain all of the terpenes and flavor compounds present in the cannabis flower. This creates a full spectrum experience much closer to taking a “dab” of a concentrate. While these cartridges may not be as “clear” as a distillate cart they provide a much more full body effect and are a good choice for a patient trying a cartridge for the first time.

# BOLD Concentrates

## Concentrate examples:

BOLD uses Butane and Propane for all hydrocarbon extractions. This allows for less plant fats and lipids to be transferred to the final product.

## Available Consistencies:

- Sugar
- Terp Sugar
- Budder
- Crumble
- Diamonds In Sauce
- Diamonds And Sauce

## Concentrates

BOLD uses Hydrocarbon extraction methodology for all concentrate creation. BOLD's processing team works with industry leading extraction equipment and research grade solvents to create only the safest and most flavorful concentrates for the state of Arkansas.

# BOLD Ice Water Extract

## Concentrate examples:

BOLD uses industry standard methodology to separate trichomes from plant material using ice, water, and agitation.

## Available Consistencies:

- Dried Powder
- Temple Balls
- Various micron consistencies
- Food Grade (coming soon)

## Temple Balls

BOLD Temple Balls are the classic solventless hash that you remember from the 70's, 80's and 90's. BOLD bases their methodology on the Afghan/Pakistani method of rolling, pressing, and molding separated ice water extract into activated extract that harkens back to the coffee shops of Amsterdam.

# Dry Sifted Solventless Hash

**BOLD's homage to the history of hashish**

- Solventless extract
- Kief is separated from flower and further separated by sieve
- Strain Specific batches
- Kief selected from freshly cured cannabis flower
- Can be used as a supplement to joints or bowls

# BOLD Hash & Moonrocks

## Dry Sifted Solventless Hash

BOLD's homage to the history of Hashish

- Solventless extract
- Kief is separated from flower and further separated by various micron sieve
- Strain Specific batches
- Kief selected from freshly cured cannabis Flower
- Can be used as a supplement to joints or bowls

## BOLD Moonrocks

The next generation Moonrock

- Strain specific Flower/strain specific Oil/strain specific Kief
- Created using full buds from Flower batches
- Only strain specific Hydrocarbon Extract used in production
- Can be used on its own in a bowl or used to supplement flower in joints, cones, or bowls

# Why isn't my cartridge full?

## What's really going on with BOLD vape carts

### Why isn't my cart full?

- Extracted oil absorbed in the ceramic heating element.
- Air pressure in the cart lowers the oil level.
- The cart reservoir is designed to be larger on purpose.

### Ceramic Core:

BOLD uses ceramic core (C cell) cartridges for all vape products. These cartridges are designed to hold more oil and create fuller hits using a larger atomizer than most other cartridge designs.

According to C Cell these ceramic cores can pull in up to 150 milligrams of oil, giving the appearance that the cart is underfilled.

### Pre-priming the cartridge:

This larger, more absorbent ceramic core allows the oil to be “pre-primed” in the core allowing for full use of the cartridge right out of the box. No heating or priming necessary!

# Live Resin Carts/Concentrates

## The true essence of cannabis, extracted

- Fresh Frozen Flower - cut down and frozen within 4 hours
- Full Spectrum Extract utilizing Butane/Propane Extraction
- Strain Specific Batches
- No additional additives in C-Cell Carts
- Higher Terpene Content Preservation

\*Due to higher viscosity of live resin products additional wicking into ceramic C-Cell core is possible. This may cause the appearance of “not full” carts. Please rest assured that all material is present in every BOLD Cart.

# Liquid Gold (Canna-Cough)

## Cannabis infused edible alternate

### Ingredients:

- High fructose syrup
- Water
- Compounding pharmacy base
- Propylene Glycol
- Citric Acid
- FD&C Red No.40
- FD&C Blue No. 1
- Sodium Benzoate (Preservative)
- Xanthan Gum
- Carrageenan Gum
- Prpanediol 1,3
- Cannabis Extract

# BOLD Dabbable Sauce Syringe

## Quick Facts:

*Dose: 1 gram dabbable syringe*

*Methodology: Full Plant Cannabis Extraction using Hydrocarbon. Sauce fraction mechanically separated*

## Dabbable Syringe

BOLD's Full Plant Extract is created with maximum therapeutic benefit in mind. BOLD utilizes all parts of the cannabis plant to create a dabbable/edible oil that contains only cannabis terpenes, flavonoids, and cannabinoids to help achieve the desired "entourage effect"

These syringes are fully decarbed making them a great choice for use in at home edible creation.

# CRC: Color Remediation Column

## What is CRC?

CRC stands for “Color Remediation Column” and is a catch all term for the use of in-line filtration methodology utilized with Hydrocarbon extractions. These in-line filter housings hold a variety of different adsorbents based on the procedures of the group using them. These powders catch undesirable materials such as chlorophyll, sulphur, plant fats, and lipids to create a smoother, higher potency concentrate.

### 24k BOLD

The 24k BOLD designation is reserved for concentrates that reach a certain level of potency. This designation does not indicate if the concentrate has been run through any kind of filtration.

**Dabbables: 80% total THC and above**

**Cartridges: 90% total THC and above**

### White BOLD

White BOLD is the designation given to BOLD concentrates that have been highly remediated to create a refined look.

The White BOLD designation is based on visual characteristics. Concentrates can be both White BOLD AND 24k BOLD.
