

Aluminum Pergola

ADVANCED OPENING & CLOSING PERGOLA ROOF SYSTEM

SUN & RAIN PROTECTION

ABOUT US

OUR MISSION AND WHO WE ARE:

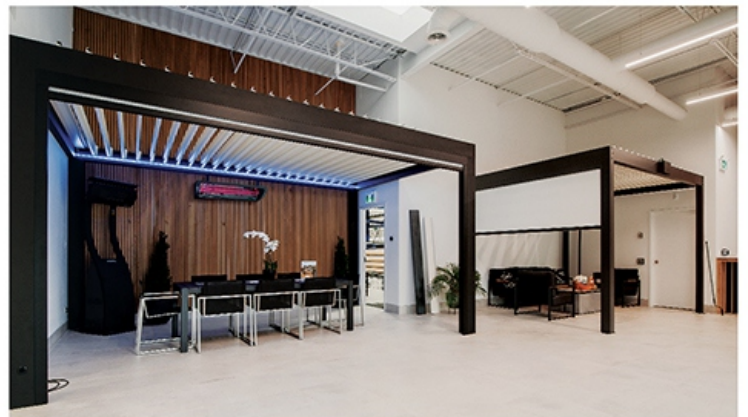

Based in Southern Ontario, with dealers spread across North America, Aluminum Pergola stands as a leading manufacturer specializing in louvered pergolas. With over a decade of expertise in the landscaping realm, we collaborate with homeowners and businesses to deliver sophisticated structures that enhance and optimize outdoor living areas. Our innovative louvered pergolas present a stylish and efficient solution, offering protection from the elements while preserving the enjoyment of outdoor spaces. The dynamic flexibility of our louver system empowers owners to regulate air flow, sun exposure, and rain protection with ease.

HOW IT WORKS:

- Through smart-home application, remote control, or manual operation, our louvers rotate from a fully closed position to opening up at an angle of 135 degrees.
- Fine-tuning the louver position allows for precise regulation of shade and air circulation.
- In the closed position, the louvered roof becomes water-tight and effectively blocks the sun, providing reliable protection for both you and your furniture.
- Rainwater flows from the louvers to the integrated gutters and drains through the upright posts at ground level.

CONSTRUCTION AND COMPOSITION:

- Pergola sizing and placement is customizable to adhere to your vision.
- From residential to commercial use, we'll work with you in order to establish a tailored system that provides maximum use from your outdoor space.
- Comprised of a fully aluminum structure and secured by stainless steel fasteners.
- Powder-coated using TIGER Drylac® textured coating for exceptional durability and UV resistance, our structures come in three colour options: Jet Black, Pure White, and Umbra Grey.
- Designs and assemblies are completed in Canada by our expert team of builders and dealers.
- Minimal seasonal maintenance and cleaning.
- Accessories such as LED lighting, zip screens, heaters, and aluminum walls integrate harmoniously with our pergolas and provide additional use, weather protection, and privacy.

SIZE: 10' x 12'

In addition to customizable sizing, Aluminum Pergola offers a fixed and ready to assemble 10'x12' option. Distinguished by its smaller frame size, this KIT features the same water and sun protection as our custom pergolas along with optional side screens, LED lighting, and privacy walls.

SIZE: 12' x 16'

A 12' x 16' pergola features a manually operated louvered roof with manually operated zip screens. An aluminum slatted wall in umbra grey is combined with wood grain powder-coated panels; creating a combination of nature's surfaces with modern clean lines. Our aluminum walls provide added privacy with the ability to hang up accessories and furnishings.

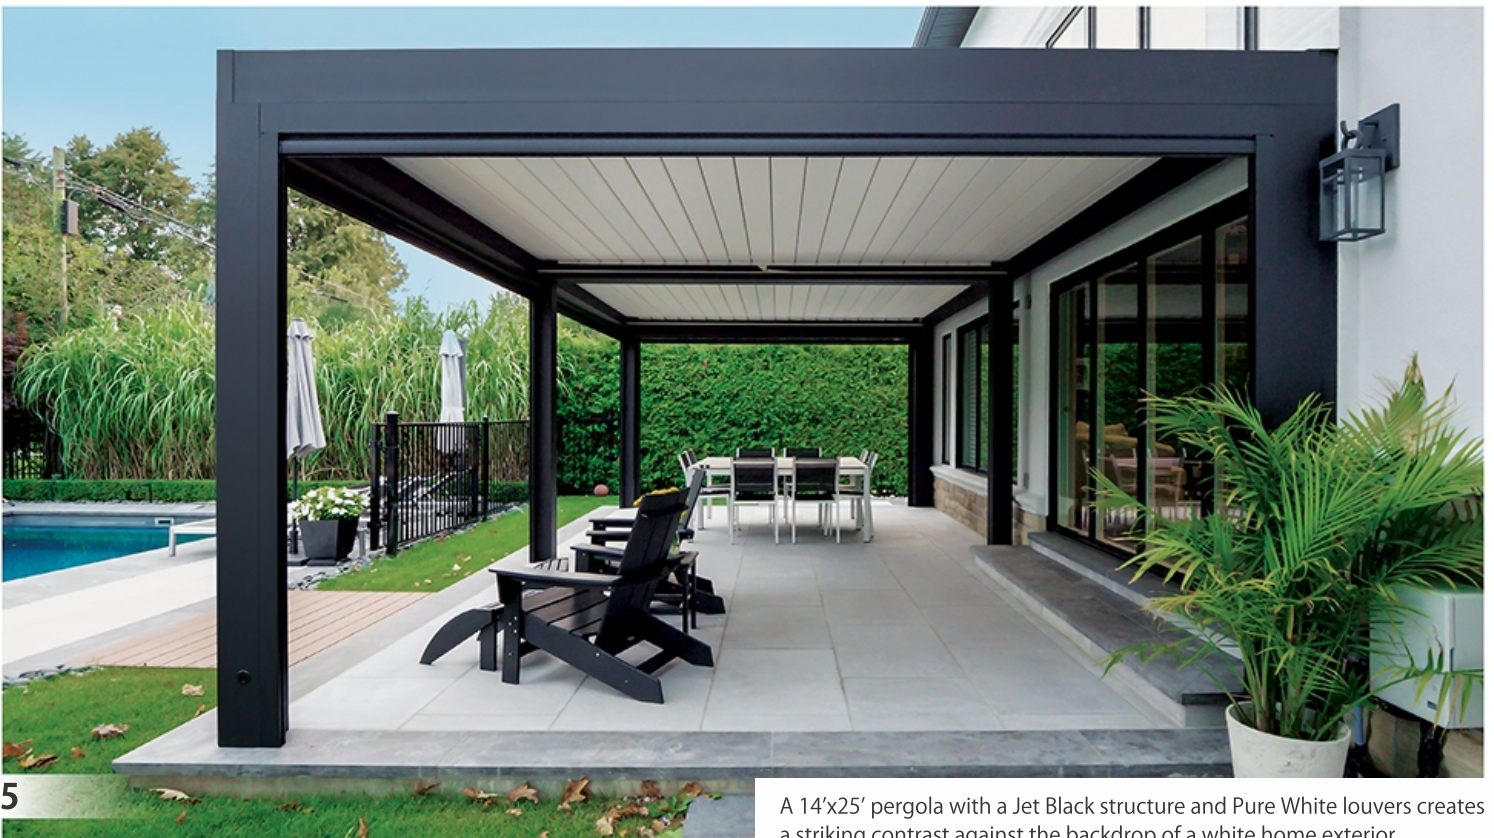

SIZE: 17' x 30'

This 30'x17' pergola houses a massive living area that features an outdoor kitchen, dining area, and fireplace. Warm white LED lighting illuminates the space for after-hours entertainment and open-air comfort.

SIZE: 14' x 25'

5

A 14'x25' pergola with a Jet Black structure and Pure White louvers creates a striking contrast against the backdrop of a white home exterior.

SIZE: 12' x 14'

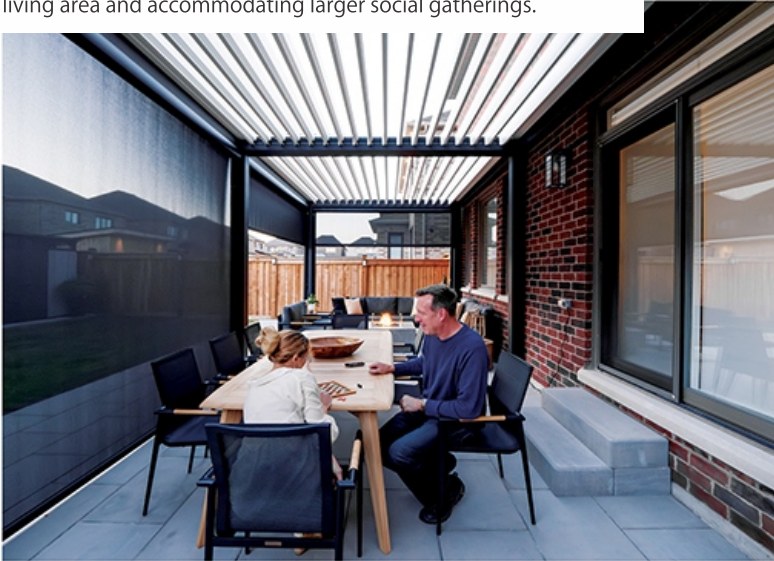

A 12'x14' pergola creates a new comfortable outdoor dining area with LED lights in neutral white, three motorized retractable zip screens, and an aluminum wall that allows for TV integration.

SIZE: 12' x 27'

A 12'x27' pergola directly against a home creates a comfortable transition from indoor to outdoor living. Ideal for expanding your living area and accommodating larger social gatherings.

SIZE: 12' x 16'

A pool-side 12'x16' pergola provides shade and comfortability. Two aluminum feature walls further enclose the space enhancing shade and adding privacy. Our aluminum walls offer numerous customization options, including the installation of TV mounts.

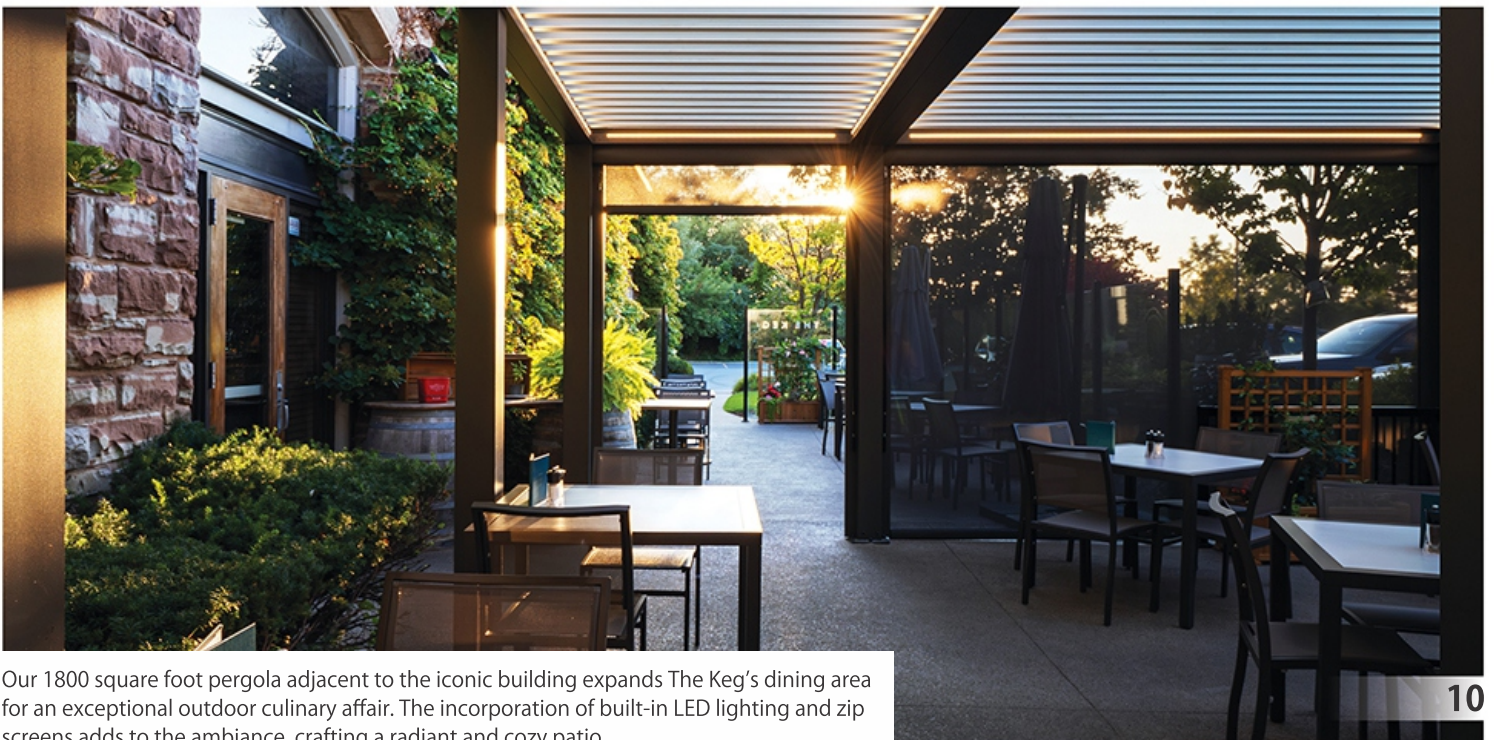

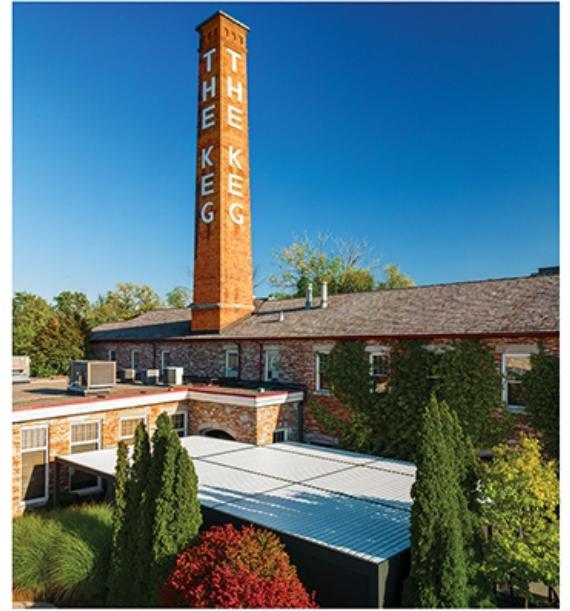

SIZE 1,800 sq.ft.

Aluminum Pergola collaborated with the The Keg in St. Catharines, Ontario to elevate and facilitate an outdoor dining experience for both patrons and staff. Our team approached this project with great esteem, particularly considering the site's rich historical background.

8 SECTIONS

Our 1800 square foot pergola adjacent to the iconic building expands The Keg's dining area for an exceptional outdoor culinary affair. The incorporation of built-in LED lighting and zip screens adds to the ambiance, crafting a radiant and cozy patio.

SIZE: 20' x 30'

Nestled amid the stunning natural scenery of the Niagara Escarpment region, our pergola complements the renowned and award-winning vineyard of Rosewood Winery.

Equipped with motorized louvers and manually operated zip screens, this 20'x30' structure provides a comfortable outdoor seating area for visitors to savor exceptional wines while enjoying idyllic views of the estate.

SIZE: 12' x 20'

Both decorative and practical, a 12' x 20' aluminum pergola adds the finishing touch to serving as an entertainment and seating space. An added 7' x 16' room enclosed by our aluminum wall panels conceals pool hardware and equipment from view.

SIZE: 12' x 14'

SIZE: 16' x 25'

Manufactured in Canada, our louvered roof system is reinforced to endure winter conditions. This 16' by 25' accommodates a hot tub and is segmented into two sections, offering additional overhead control. The supplementary zip screens add extra privacy and protection from cold and snow.

SIZE: 20' x 20'

Our structure can span up to 20'x20' on four standalone posts when split into two louvered sections. LED lighting lengthens pergola use after sunset and 4 zip screens act as an insect deterrent while enclosing the structure for additional privacy.

SIZE: 14' x 18' and 5' x 16'

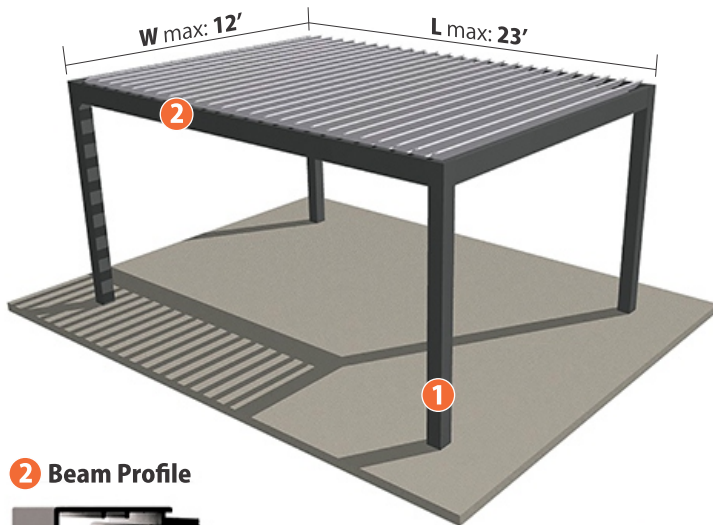

Featuring our Jet Black colour for both louvers and frames, two distinct pergola styles adorn a single backyard; a 5'x16' cantilever design over an outdoor kitchen and a 14'x18' freestanding pergola covering a sitting area.
