IMPORTANT SAFETY INSTRUCTIONS:

- Only use Ice Genie™ Cube Maker as described in the manual
- Always store in a clean and dry place
- Ice Genie™ Cube Maker is **top rack** dishwasher safe
- Keep away from extreme heat
- Ice Genie™ Cube Maker is **NOT** microwave safe
- Made with BPA free material

COMPONENTS

Inner Cylinder

Outer Chamber

Tight Seal Lid

USING THE ICE GENIE™ CUBE MAKER

Step 1

Step 1: Insert the Cylinder into the Chamber. (Make sure the Cylinder reaches the bottom, creating a seal between the Cylinder and Chamber)

Note: Feel around the base of the chamber to see if the cylinder is properly seated.

Step 2

Step 2: Fill water into the channel at the top of the Chamber. Fill until water reaches just above the top row of cubes.

Note: Pour out any water that overflows into the upper channel.

Step 3

Step 3: Snap the Lid onto the Ice Genie™ Cube Maker. Place into freezer until all the water is frozen. (4-6 hours)

Step 4: Once frozen, remove Ice Genie™ Cube Maker from the freezer. Remove the Lid, then firmly squeeze the Chamber on all sides.

Step 5: Remove any loose ice that has formed on the upper Chamber. Twist the Cylinder left/right until it is free. Then pull upward to remove it from the Chamber. If the Cylinder is difficult to remove, wait 30 seconds and repeat step 4/5.

Step 6: Once Cylinder is removed, squeeze the Chamber, releasing all the ice cubes into the middle area.

ADDITIONAL BATCHES

Step 1: After all the ice cubes are released, put the Cylinder back into the Chamber by pushing it into the Ice Genie™ Cube Maker. Move the cubes out of the way by twisting the Cylinder back and forth as you work the cylinder all the way down.

Note: Feel around the base of the chamber to see if the cylinder is properly seated.

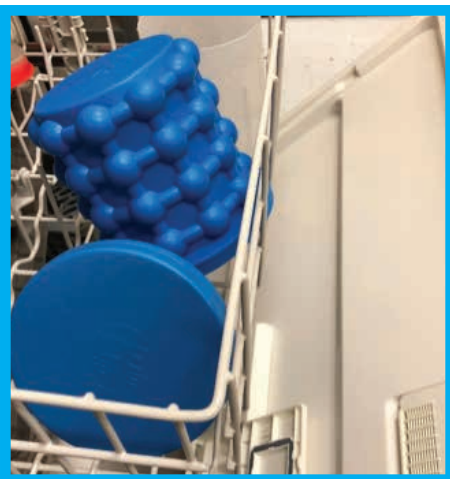

After the Cylinder is fully seated in the Ice Genie™ Cube Maker, simply refill the channels of the Chamber, leaving the already made cubes in the center of the Cylinder.

Once the Chamber is fully filled, repeat steps 3-6.

Ice Genie™ Cube Maker can store up to three batches of ice at a given time.

CLEANING

Ice Genie™ Cube Maker can be cleaned by hand with warm soapy water and a sponge. Rinse thoroughly before use. The Ice Genie™ Cube Maker can also be washed in the top rack of a dishwasher.
