

HYRROKKIN ARKI

# Who We Are

Hyrrokkin Arki is a leader in architectural metal and glass fabrication providing comprehensive services in the design, manufacturing and implementation of architectural detailing. With a team of acclaimed architects, designers and craftspeople, Hyrrokkin Arki offers an unprecedented approach combining cutting edge design and customization with consultation all the way through installation. With over 2 decades of design innovation, our state-of-the-art facility allows for complete control of the production process resulting in unsurpassed attention to detail along with competitive pricing.

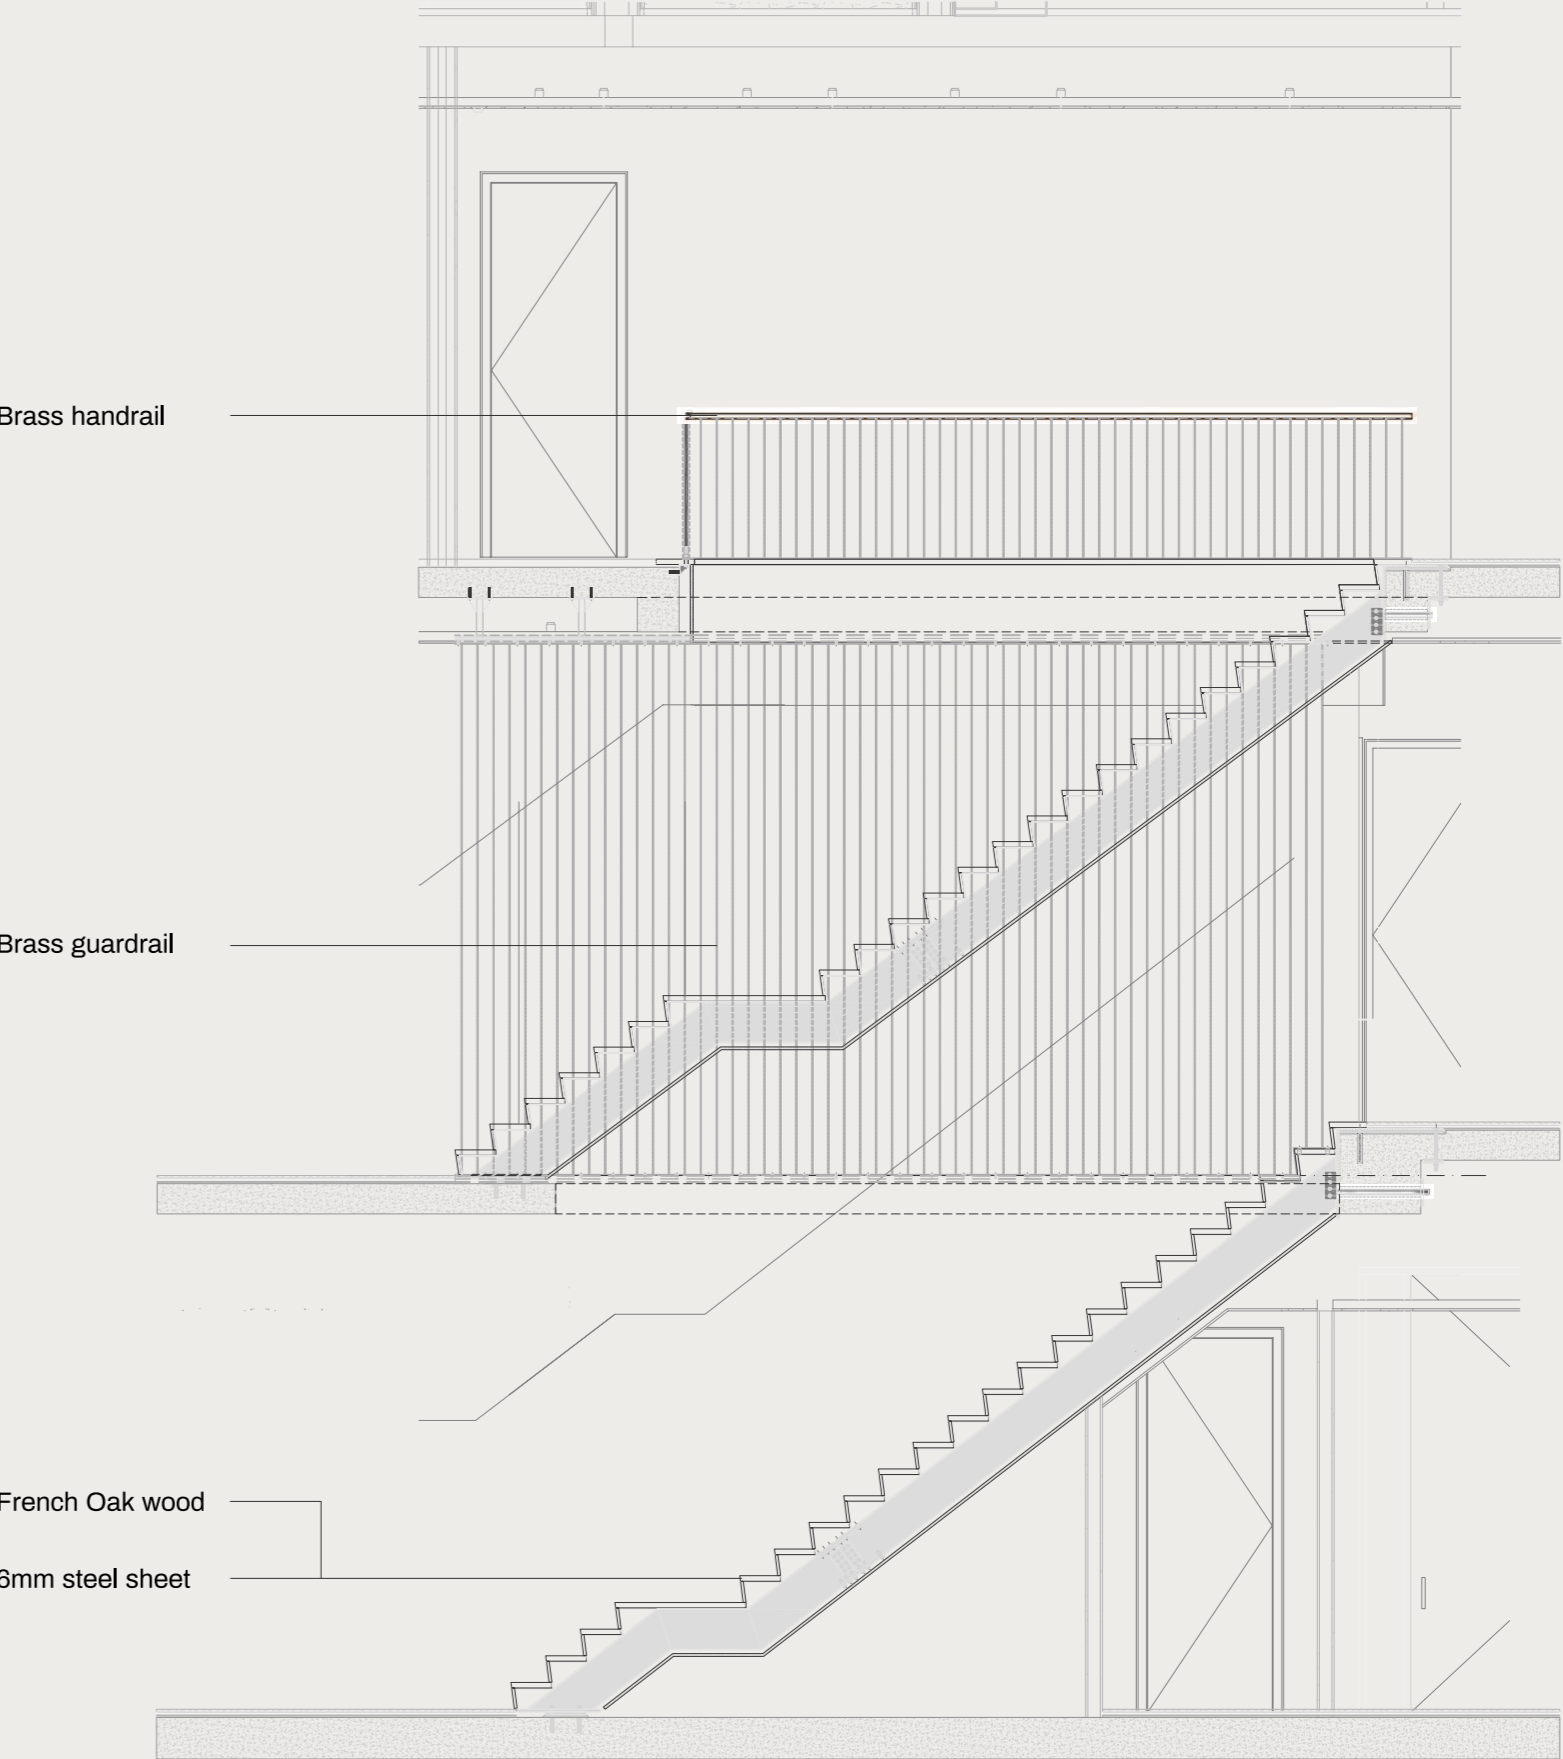

# Our Approach

Our obsession with material finishes, seamless assemblies and value contributes to the unparalleled integrity of our finished products, and has attracted international luxury brands such as Lanvin and Dior, as well as numerous high-end residential developments in New York City.

# Advantages of Working with ARKI

- 1** Fabrication shop with a strong design sensibility, owned and operated by a collaborative of architects and product designers, allowing for superior integration of design and production.
- 2** Development and production allows for high-end designs and turnkey solutions with adaptive project management at competitive rates.
- %** Unprecedented customization and turnkey solutions eliminate the need to coordinate between various trades. The integration of multiple materials within a single finished product all done in-house, streamlining production

# Working with ARKI

- 1** Quick pricing turnaround -  
HA will present a bid within 7 to 10 days of receiving request
- 2** HA will provide a development consultancy to achieve the architect's vision while proposing value engineered and cost-efficient solutions
- 3** Free prototyping -  
Within acceptable limits and proportions, HA will provide 1:1 prototypes prior to project commitment
- 4** Testing tolerances -  
Every unit is fully assembled prior to shipping to confirm specified tolerances, then disassembled to ship
