

### Population Profile

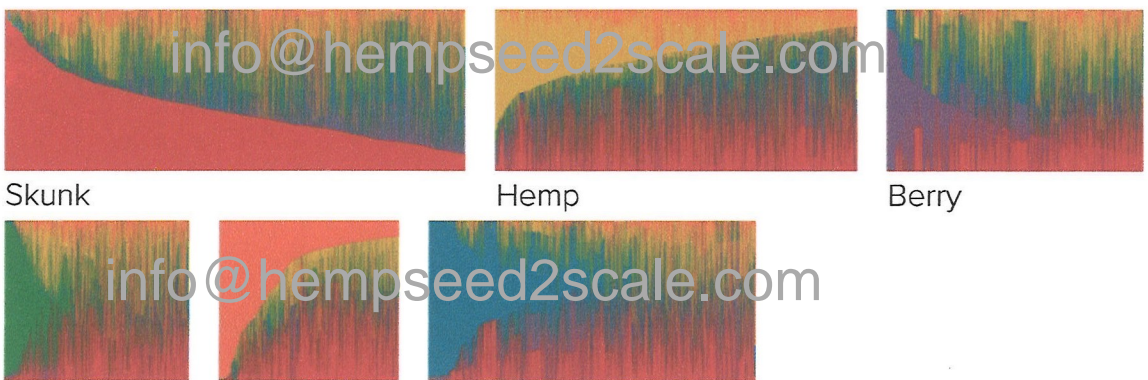

ACDC Plus has heritage similar to varieties in CBD, with a smaller component of genetic variation similar to varieties in Skunk, Hemp, Berry, Landrace.

The standalone bar depicts the observed heritage of ACDC Plus. The majority color within the reference bars dictates primary subpopulation heritage (Red - Skunk, Blue - OG Kush, Green - Landrace, Purple - Berry, Yellow - Hemp, Orange - CBD). The subpopulation reference bars are generated from all of the representative samples in the Phylos Galaxy. Population structure will continue to evolve as more samples are added to the Galaxy.
