## Distal Clavicle Excision

	Phase I: weeks 1-4	Phase II: 5-8 weeks	Phase III: 9-12 weeks
Weight-Bearing and Immobilization	<ul> <li>WBAT</li> <li>Discontinue sling at 1-2 weeks (may continue sling while sleeping as needed until 4 weeks after surgery)</li> </ul>		
Aerobic	Stationary bike	Begin walk-jog-run progression	
Range of Motion (ROM) and Strengthening	<ul> <li>Progress PROM to AAROM to AROM as tolerated</li> <li>ROM Goals</li> <li>140° forward flexion</li> <li>40° ER at side</li> <li>No resisted ROM exercises</li> <li>No abduction-rotation exercises</li> <li>No cross-body adduction until 8 weeks after surgery</li> </ul>	<ul> <li>Increase AROM in all planes (may provide passive stretch/assist at end-ranges of AROM)</li> <li>ROM Goals         <ul> <li>160° forward flexion</li> <li>60° ER at side</li> </ul> </li> <li>With arm at side, begin light isometric exercises for rotator cuff, scapular stabilizers, and deltoid (advance to bands as tolerated)</li> </ul>	<ul> <li>Continue to advance from exercises in Phase II</li> <li>ROM as tolerated</li> <li>Advance strengthening as tolerated from isometrics to bands to weights</li> <li>Perform strengthening exercises no more than 3 days per week</li> <li>Begin eccentrically resisted strengthening, plyometrics, and closed-chain exercises</li> </ul>
Other	<ul> <li>Heat before and/or ice after PT sessions as needed</li> <li>Modalities as needed to reduce swelling and for muscle re-education</li> <li>Home Exercise Program (HEP) per discretion of Physical Therapist</li> </ul>		
Goals	<ul><li>Pain control</li><li>Protection of tissue healing</li><li>Minimize joint stiffness</li></ul>	Advance ROM     Begin strengthening	<ul> <li>Restore full and symmetric ROM</li> <li>Advance strengthening</li> <li>Begin plyometrics</li> </ul>
