

Protective Investigations

“Protective intelligence is an investigative and analytical process used by protectors to proactively identify, assess, and mitigate threats to assets” by Ami Toben!

“The most dangerous risk may, be the one you did not foresee.” Circuit Magazine 2020”

“Proactive is always better and cheaper than being reactive”. UNKNOWN

“It won’t happen to me because it hasn’t happened before.” A dangerous way to think when life is at stake.

The uses of these types of investigations can be varied, but mainly for the following issues:

- Threats - Stalking - False Accusations
- Workplace Violence - Employee Misconduct
- Reputation Due Diligence
- Harassments

What is the value of these types of investigations?

- Peace of Mind & Knowing About Risks/Threats Sooner
- Providing Situational Awareness Needs
- Promoting Better Safety & Protecting All Assets.

We use technology to search the whole internet for any type of postings relating to you, once found we analyze real threats, recommend countermeasures when appropriate and report findings to you.

Protective Consulting

Protective Consulting provides a look at all of yours, your families, and/or business activities daily for routines that poses a risk or threat to safety and security. Humans love routines, and so do criminal elements, threats, and risks.

Think about it, you leave for work at the same time each day, drive the same route each day and come home the same way each night. How long do you think it would take a criminal to watch you before they know exactly how long they must break into your home? Just one example.

But you have an alarm and cameras to safeguard from this, correct? Sorry, the best police response to an alarm is 15 minutes in a city, the camera only shows what happened if recorded. If you want info on locks, contact a locksmith.

Protective consulting looks at all the possible risks/threats. It walks through all this, answers the why needed and collaborates with you, the client, on what is needed and best for your situation.
