

MJK UV SANITATION LIGHTING

OFFICE, HEALTH CARE, SCHOOLS

MJK Lighting is at the forefront of UV sanitizing light technology. We currently offer multiple options for UV sanitation in Schools, Offices Retail stores, Warehouses, Transit facilities, Hospitals, Adult living facilities, Multi-family residential properties and any indoor public or private gathering spaces. We offer the spectrum of UV sanitation lighting to safely minimize exposure to harmful bacterial and viral germs. We focus on continuous sanitation of air circulation in a target space to eliminate up to 99.8% of harmful germs. All Wave lengths can effectively sanitize your desired space. We will assist our clients in evaluating their sanitation needs on a case by case basis. MJK Lighting will determine the correct sanitation application to effectively sanitize working and living spaces achieving a clean and safe environment.
