A Message from the Vice President

Data-Driven Decisions: The Key to Success

Welcome to the Executive Administration for Academic and Training Affairs Master Dashboard!

As the Vice President, I am thrilled to introduce you to this dynamic tool designed to empower informed leadership, optimize operations, and foster continuous improvement across our network of training sites.

The Dashboard reflects our commitment to data-driven decision-making. It provides a comprehensive view of key performance indicators (KPIs) across all eight academic administrations, allowing you to track progress, identify trends, and make informed choices regarding resource allocation, training development, and strategic initiatives.

This handbook serves as your essential guide to navigating the dashboard's rich functionalities.

The Master Dashboard is more than just a data repository; it's a catalyst for innovation and progress. By harnessing the power of data analysis and fostering a culture of transparency, we strive to continuously elevate the quality of healthcare education delivered across the Riyadh Second Health Cluster.

I encourage you to explore the dashboard's functionalities and leverage its insights to contribute to our shared mission of excellence.

Sincerely,

Dr Osama S. Al Shaya

Vice President, Executive Administration for Academic and Training Affairs
Riyadh Second Health Cluster

A Message from the Academic Operations Administration

Together, We Analyze, We Innovate, We Excel

The Riyadh Second Health Cluster EAATA Master Dashboard, designed by the Academic Operations Administration in line with the strategic vision of the Executive Administration for Academic and Training Affairs, equips you with tools to achieve excellence in healthcare education.

This handbook guides you in utilizing the dashboard's functionalities, enabling informed decisions, optimized operations, and continuous improvement. The dashboard fosters collaboration, real-time data access, and trend monitoring to elevate education quality.

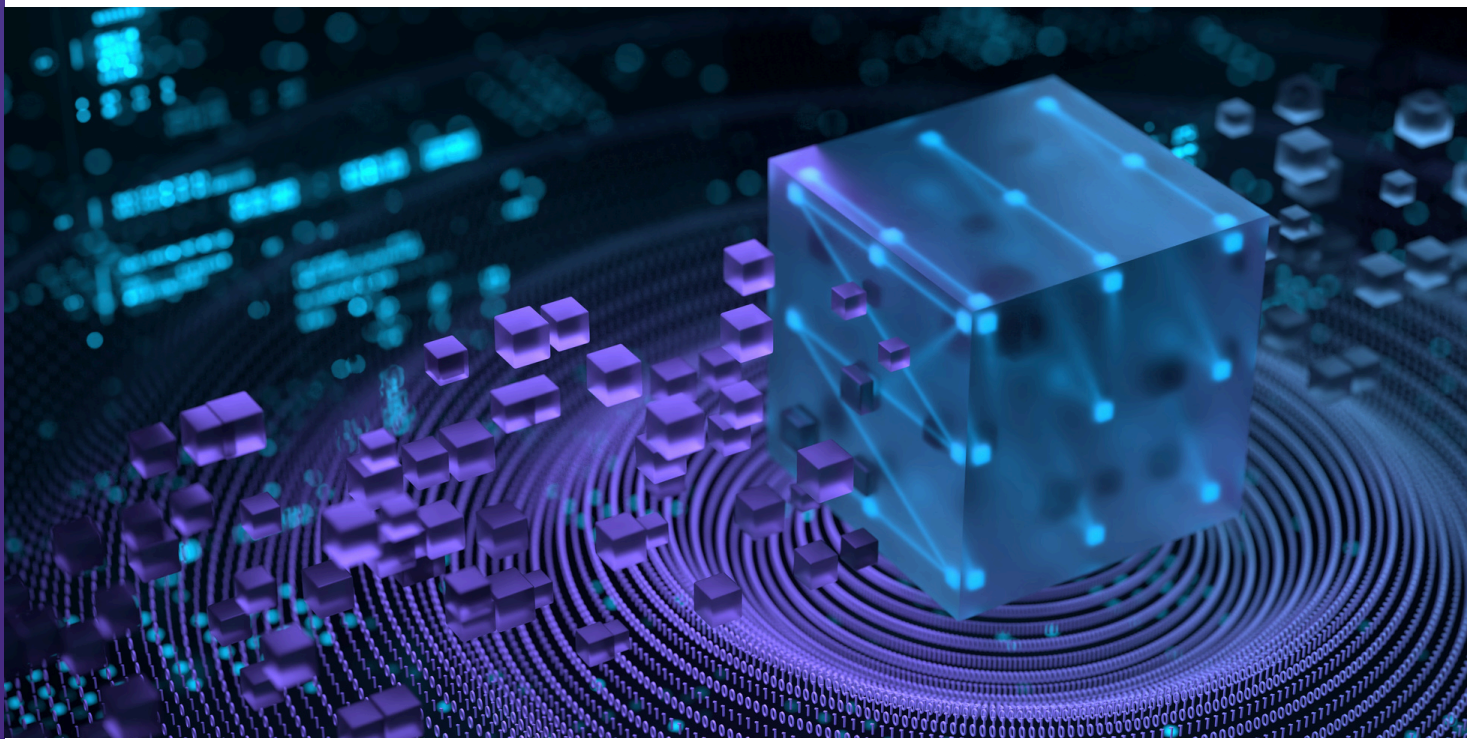

Your active participation is key in our mission of excellence, and we are committed to fostering a data-driven culture that supports our shared goals.

Let's unlock the power of data and propel our training programs to new heights!

Best regards,

Dr Reem M. Al Dhalaan

Director, Academic Operations Administration
Riyadh Second Health Cluster

Introduction

Your Gateway to Academic and Training Excellence

Welcome to the Executive Administration for Academic and Training Affairs Master Dashboard! This comprehensive resource is designed to empower users with the most critical insights needed to effectively manage and optimize our academic and training programs and services.

This dynamic hub empowers you with the tools and information necessary for strategic decision-making, operational control, and seamless communication, all accessible from the comfort of your mobile phone, tablet, or computer by simply clicking the link provided to gain instant access to the interactive dashboard. It provides a centralized view of key performance indicators (KPIs) across various aspects.

By leveraging the data visualizations and analytical tools within this dashboard, you can gain a deeper understanding of our academic and training landscape. This empowers you to:

- **Make informed decisions:** Use data-driven insights to optimize program offerings, resource allocation, and strategic initiatives.
- **Identify areas for improvement:** Proactively identify areas where academic and training programs require adjustments to deliver the best possible outcomes.
- **Track progress and measure success:** Monitor progress towards established goals and measure the effectiveness of academic and training programs.

We encourage you to explore the various functionalities of this dashboard and leverage its rich data to make informed decisions that will propel our academic and training programs to new heights.

Executive Administration Dashboard

Navigate Excellence on the Go

The Executive Administration for Academic and Training Affairs dashboard empowers users with the tools and information necessary for effective leadership, anytime, anywhere. This dynamic platform is designed for effortless access and navigation, making it your ideal companion for strategic decision-making.

Benefits At-A-Glance:

- **Data-Driven Decisions:** Make informed choices about resource allocation, program development, and strategic initiatives based on real data, leading to greater confidence in decision-making.
- **Trends Insights:** Track progress, identify trends, and ensure continuous improvement across training sites and administrations with real-time insights, gaining valuable insights into emerging trends and identifying areas for improvement and new opportunities.
- **Strategic Planning:** Leverage predictive capabilities to anticipate future trends and proactively plan for potential challenges.

- **Intuitive Navigation:** Quickly identify areas excelling and requiring attention through the dashboard's focus on critical KPIs. The dashboard boasts a user-friendly interface, allowing for easy navigation and efficient information retrieval.
- **Improved Transparency:** Increase transparency by providing stakeholders with a clear view of performance across all administrations and training sites. Promote accountability within administrations and departments by tracking progress toward established goals.
- **Resource Utilization:** Monitor resource allocation for academic and training programs, ensuring efficient and optimal use.
- **Streamlined Communication:** Foster clear and consistent communication across departments with a shared platform for accessing and analyzing key performance data. Centralize critical information to facilitate efficient collaboration and communication across the organization.
- **Time Savings:** Save valuable time by streamlining data access and analysis, allowing for quicker decision-making.
- **Effortless Accessibility:** Access the dashboard seamlessly from mobile phones, tablets, or computers, enabling instant insights regardless of location.
- **Clarity at a Glance:** Utilize clear visuals and concise data presentations to readily grasp key performance indicators (KPIs) and make informed decisions.
- **Embedded for Convenience:** Embed the dashboard within any website or platform, providing stakeholders with immediate access to critical information, fostering a culture of transparency, and facilitating efficient communication within the organization.

Unlock Insights at Your Fingertips

Explore the Power of Interactive Navigation

The intuitive interface allows you to navigate to specific sections and resources seamlessly using the interactive buttons on the dashboard. Each section is designed for a distinct purpose:

Icon	Purpose
	Interactive Navigation: Use the titled tabs on the homepage to swiftly navigate to specific areas of interest within the various consoles and maps.
	Dashboard Handbook: Download a comprehensive instruction guide by simply clicking the icon to learn more about the dashboard's functionalities and available resources.
	Strategic Plan: Click the icon to access the 2024 Strategic Plan and gain insight into the Executive Administration's goals, helping you align your strategies accordingly.
	Monitor Progress: Compare this year's performance with previous reports. Click the icon to track progress towards improvement initiatives.
	Connect and Collaborate: Click the icon to easily access the Executive Administration Directory. This directory connects you with any administration or department within the Riyadh Second Health Cluster, fostering collaboration and streamlined communication.
	Interactive Map: Click on the icon to be redirected to Google Maps, where you can gain insights into training site locations.
	Quarter Report: Clicking on the number corresponding to the quarter you're interested in (e.g., for the second quarter) should filter the reports or data to show information specific to that quarter.

Icon	Purpose
	Risk Report: Click on the icon to access detailed information on academic operations risks, including insights into various risks, their impacts, and mitigation strategies.
	Need Help? Encountering issues while using the dashboard? Click the icon for assistance.

Please note: This dashboard provides a public view of key data and resources related to academic and training administration for informational purposes only. While data cannot be directly manipulated or modified by users, except through proper channels by contacting the Academic Operation Administration.

Homepage

Navigate the Central Hub with Clarity

The homepage for the Executive Administration of Academic and Training Affairs interactive dashboard equips users with the tools and information necessary for effective navigation.

Unlocking Powerful Insights

This homepage provides a clear overview of the dashboard's key functionalities:

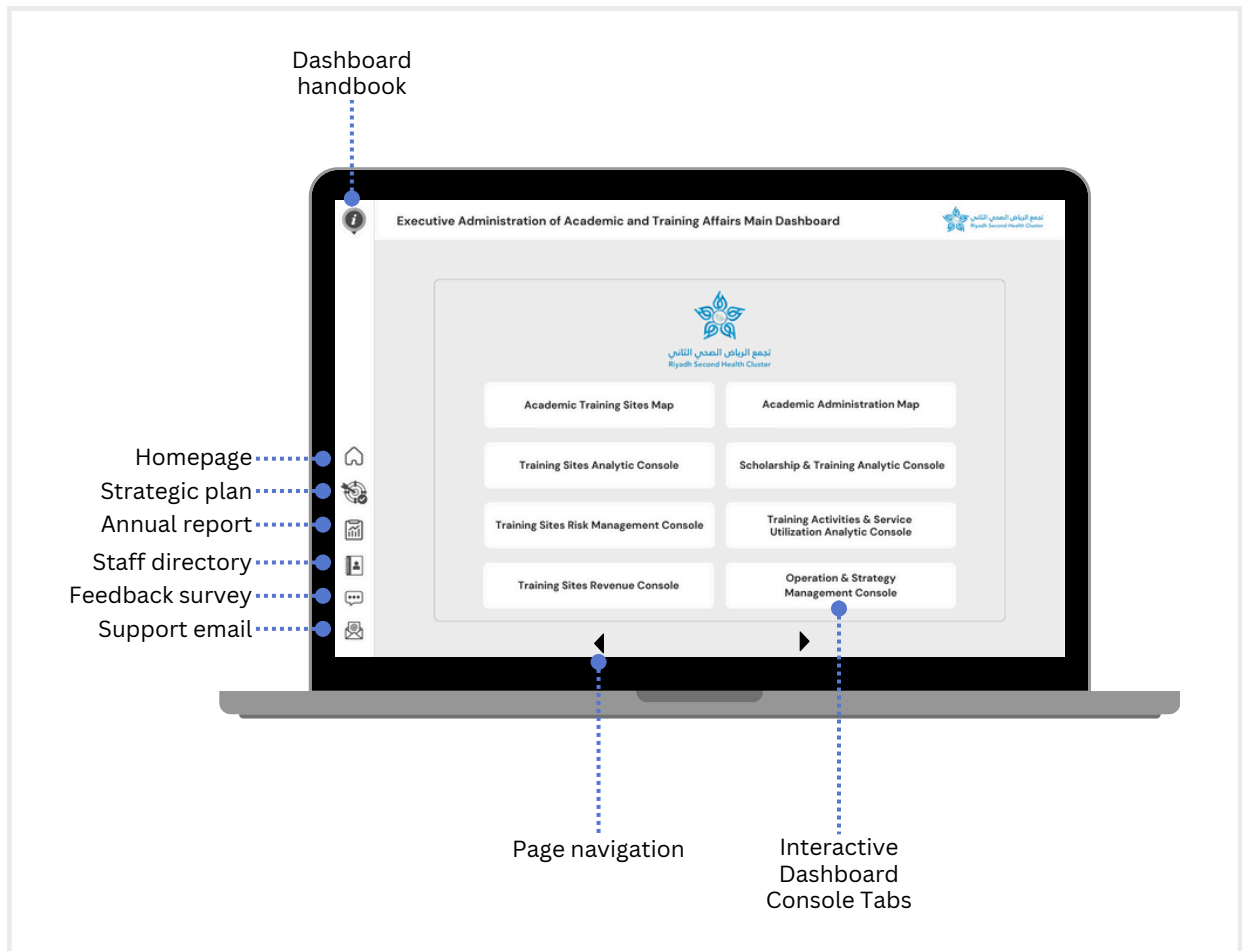

- **Academic Training Sites Map:** Gain a comprehensive view of all academic and training sites and their locations.
- **Training Site Analytic Console:** Delve into performance data to identify trends and optimize your training programs within the Riyadh Second Health Cluster training sites.
- **Training Sites Risk Management Console:** Explore operational risks, impacts, and mitigations for training sites, and oversee current progress.
- **Training Sites Revenue Console:** Gain detailed, transparent oversight on training site revenue and growth patterns to assist in revenue generation decisions.
- **Map of Academic Administrations:** Visually explore the various academic administrations.
- **Scholarship and Training Analytic Console:** Track KPIs to optimize scholarship programs, SCFHS initiatives, and hospital-based training.
- **Training Activity and Service Utilization Analytic Console:** Uncover trends in training activities and service usage to ensure smooth operation and meet performance goals.
- **Operation and Strategy Management Console:** Uncover broader trends and insights on an executive level, informing strategic decision-making.

Understanding the Dashboard Architecture

An informative illustration on this homepage maps out these sections, clearly defining their roles. This visual representation showcases how each component works together to facilitate efficient operations and empower informed, timely decisions.

Click on the corresponding icons or buttons to explore each section of the dashboard and unlock its full potential. Leverage data-driven insights to guide your leadership and ensure the continued success of your academic and training initiatives.

Academic Training Sites Map

A Comprehensive Network

The Executive Administration for Academic and Training Affairs oversees a robust network of training sites affiliated with the Riyadh Second Health Cluster dedicated to fostering excellence in healthcare education. Here, you'll find a comprehensive overview of our geographically diverse locations.

Extensive Reach:

- **14 Major Training Sites:** We boast a network of 14 strategically located training sites across eight cities, excluding numerous associated primary care centers.
- **Riyadh Hub:** Seven training sites are situated within the dynamic city of Riyadh, offering convenient access to a wealth of educational opportunities.
- **Cluster Presence:** The remaining training sites are strategically distributed across various postural cities, ensuring cluster-wide coverage.

Unified Approach:

- **Strategic Focus:** Regardless of location, all training sites adhere to a consistent strategic approach. This ensures a uniform commitment to quality and seamless operation.
- **Quality Monitoring:** We prioritize the consistent monitoring of our training sites, allowing us to identify areas for improvement and continuously enhance the quality of services and training delivered.
- **Expert Guidance:** Our dedicated team provides ongoing guidance and support to all training sites, ensuring they deliver exceptional healthcare education across the network.

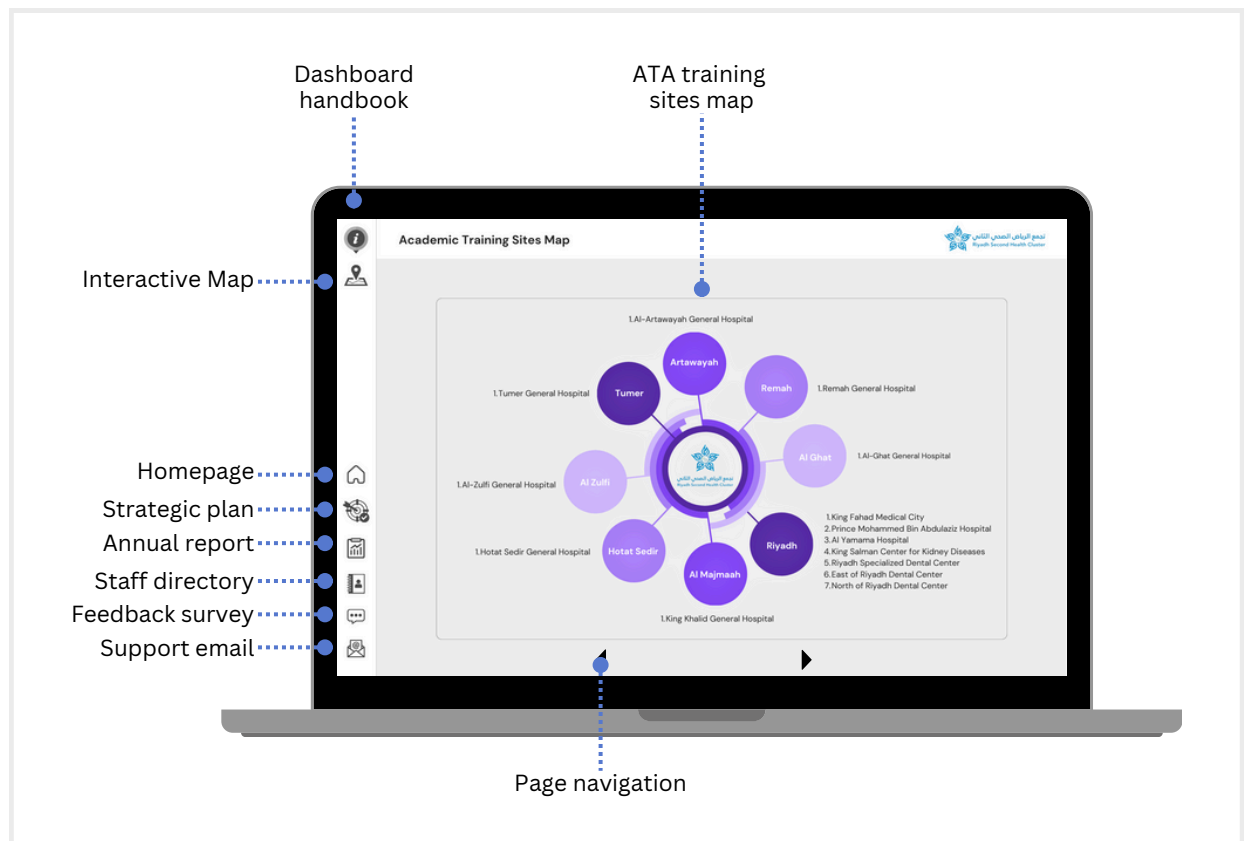

Navigating the Network:

For a detailed breakdown of individual training site locations and contact information, please refer to the dedicated section within the dashboard and directory icon. This comprehensive resource will equip you with the knowledge needed to navigate our extensive network.

Investing in Success:

The Executive Administration for Academic and Training Affairs remains steadfast in its commitment to excellence. We are dedicated to providing a robust network of training sites that empowers healthcare professionals across the Riyadh Second Health Cluster.

Illustration of Training Sites Map Key Features:

Training Sites Analytic Console

Unlocking Performance Insights

The Training Sites Analytic Console empowers you to delve into the performance of our extensive network of training sites. This interactive tool provides a wealth of data, enabling you, as a stakeholder, to gain valuable insights and inform strategic decision-making.

Detailed Site-by-Site Performance:

This section dives deeper into comparative analysis, showcasing the total performance of training sites for a chosen timeframe (typically displayed by month). You can compare and contrast the performance of various training sites as well across seven key variables:

- **Number of SCFHS CPD Accredited Programs:** Track the number of CPD programs offered at each site that are accredited by the Saudi Commission for Health Specialties (SCFHS).
- **Number of SCFHS CME Hours:** Monitor the total number of SCFHS Continuing Medical Education (CME) hours delivered by each training site.
- **Number of Learners in SCFHS CPD Programs:** Analyze the number of participants enrolled in SCFHS CPD programs at each training site.
- **Number of Life Support Courses:** Track the total number of life support courses offered by each site.
- **Number of Learners in Life Support Courses:** Monitor the number of participants enrolled in life support courses at each training site.
- **Number of Clinical Attachments:** Analyze the number of clinical attachment placements facilitated by each training site.
- **Number of Students and Interns:** Track the total number of students and interns hosted by each training site

The console allows for ongoing customization. New variables can be integrated based on stakeholder input to provide a more comprehensive view of training site performance.

Strategic Decision-Making:

By leveraging the insights gained from the Training Sites Analytic Console, stakeholders can make informed decisions regarding resource allocation, training program development, monitoring performance, and overall network optimization.

Performance Trends:

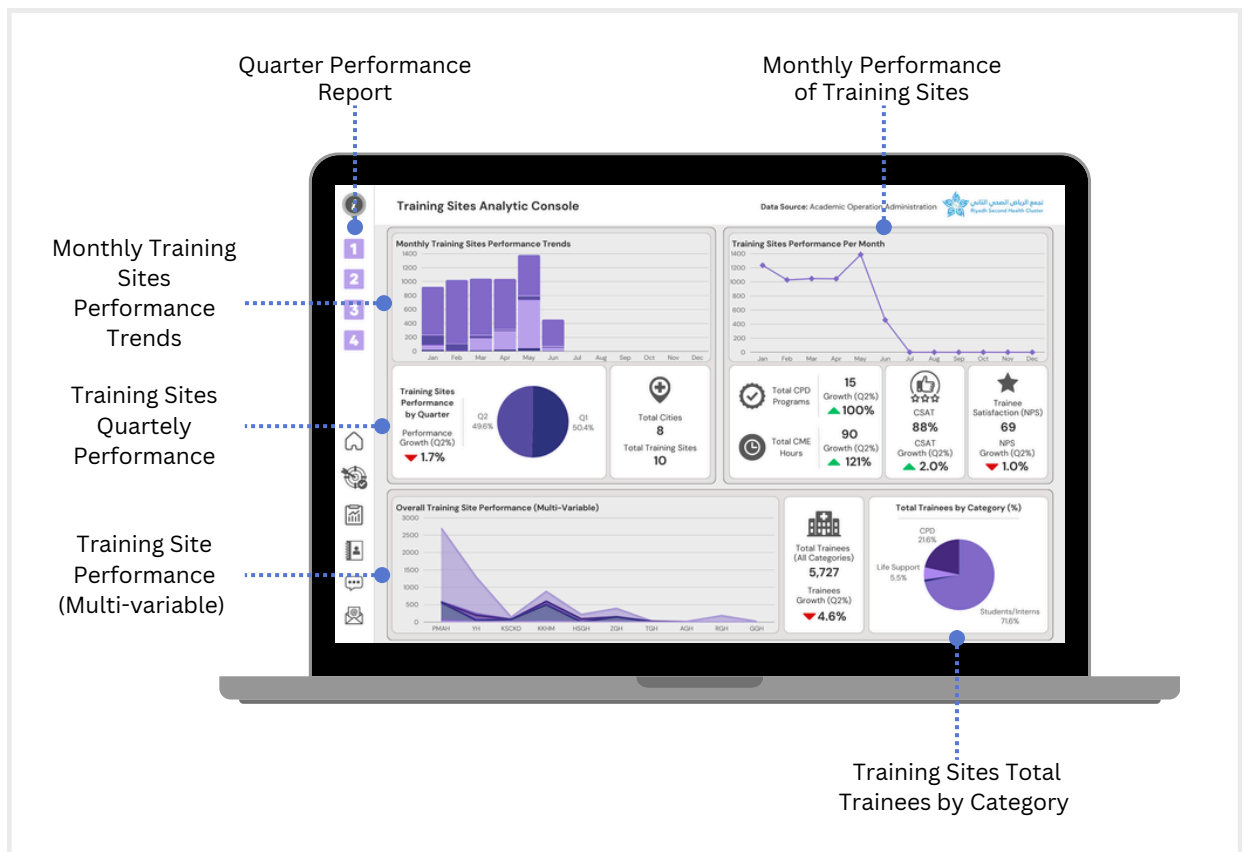

- The console allows filtering and sorting data based on specific needs, facilitating deeper exploration of performance trends.
- Visualization tools such as charts and graphs are integrated to provide a clear and concise representation of data.

Investing in Excellence:

The Training Site Analytic Console serves as a powerful tool for continuous improvement. By actively monitoring performance across our network, we strive to ensure the consistent delivery of high-quality healthcare education at all training sites.

Illustration of Training Site Analytic Console Key Features:

Data Includes: Ten Training Sites (Dental Sites under Dental Academy & KFMC under Administrations), Metric Cards, CSAT and Trainee NPS

Academic Operation Administration Data:

To avoid redundancy, AOA data is presented within the Training Site Analytic Console and excluded from the Administration Analytic Console.

Training Sites Risk Management Console

Empowering Proactive Risk Management

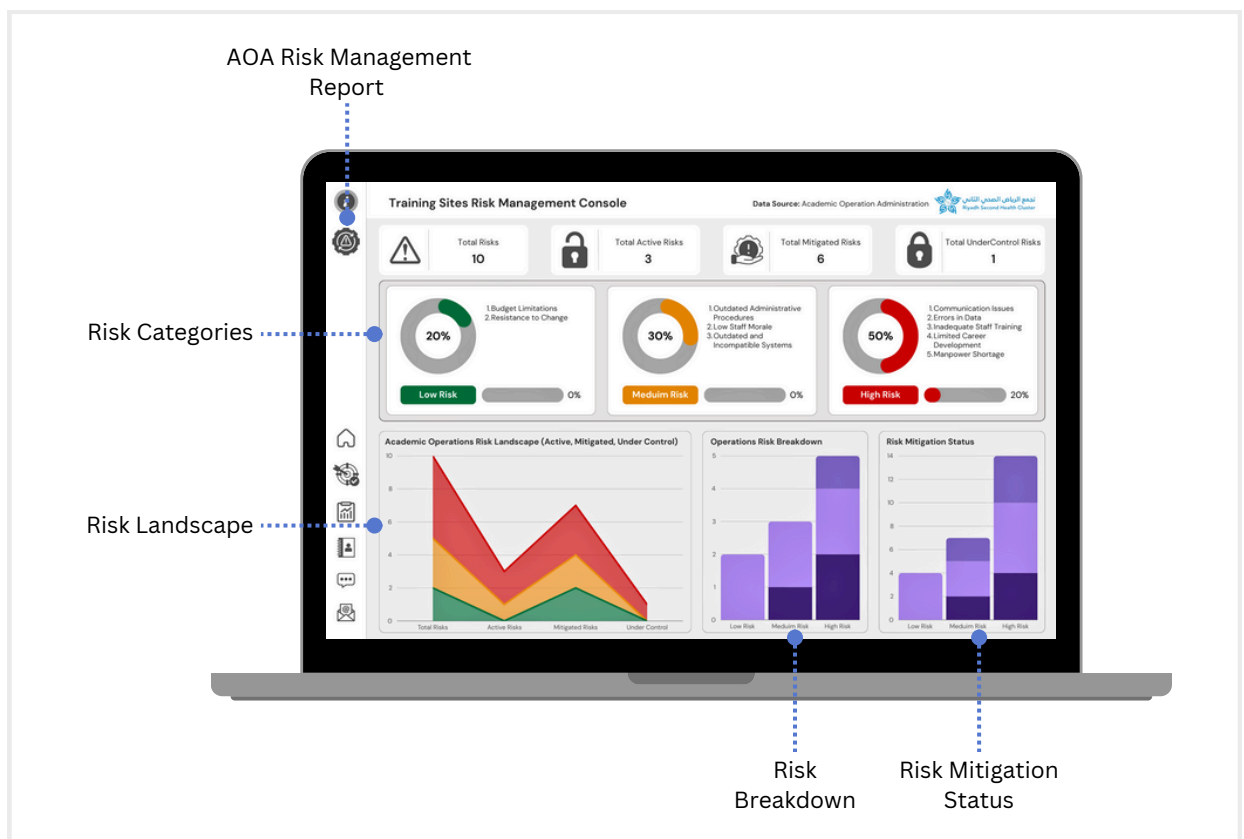

The Training Sites Risk Management Console is an essential tool for the Executive Administration for Academic and Training Affairs. This console offers in-depth insights into the various risks associated with training sites affiliated with the Academic Operation Administration. By leveraging this console, the administration can:

- **Identify Risk Categories:** Gain a detailed understanding of the different categories of risks that may affect training sites. This includes operational risks, financial risks, compliance risks, and more. Each risk category is clearly defined and categorized for easy reference.
- **Assess Impact:** Evaluate the potential impact of identified risks on training site operations. The console provides metrics and analytics that help quantify the severity and consequences of each risk, enabling the administration to prioritize and address the most critical issues.
- **Monitor Mitigation Progress:** Track the progress of mitigation strategies and actions taken to address identified risks. The console displays real-time updates on the status of mitigation efforts, allowing the administration to ensure that risks are being effectively managed and reduced over time.
- **Enhance Decision-Making:** With comprehensive risk insights, the administration can make informed decisions to enhance the safety, efficiency, and effectiveness of training site operations. This includes allocating resources, implementing preventive measures, and adjusting strategies based on current risk levels and trends.

Overall, the Training Sites Risk Management Console is a powerful tool that empowers the Executive Administration for Academic and Training Affairs to proactively manage and mitigate risks, ensuring the continued success and stability of their academic and training programs.

Illustration of Training Sites Risk Management Console Key Features:

Training Sites Revenue Console

Financial Insights for Strategic Growth

The Training Sites Revenue Console is a vital resource for the Executive Administration for Academic and Training Affairs. This console provides critical insights into the revenue generation of training sites, offering a comprehensive view of financial performance and trends. By utilizing this console, the administration can:

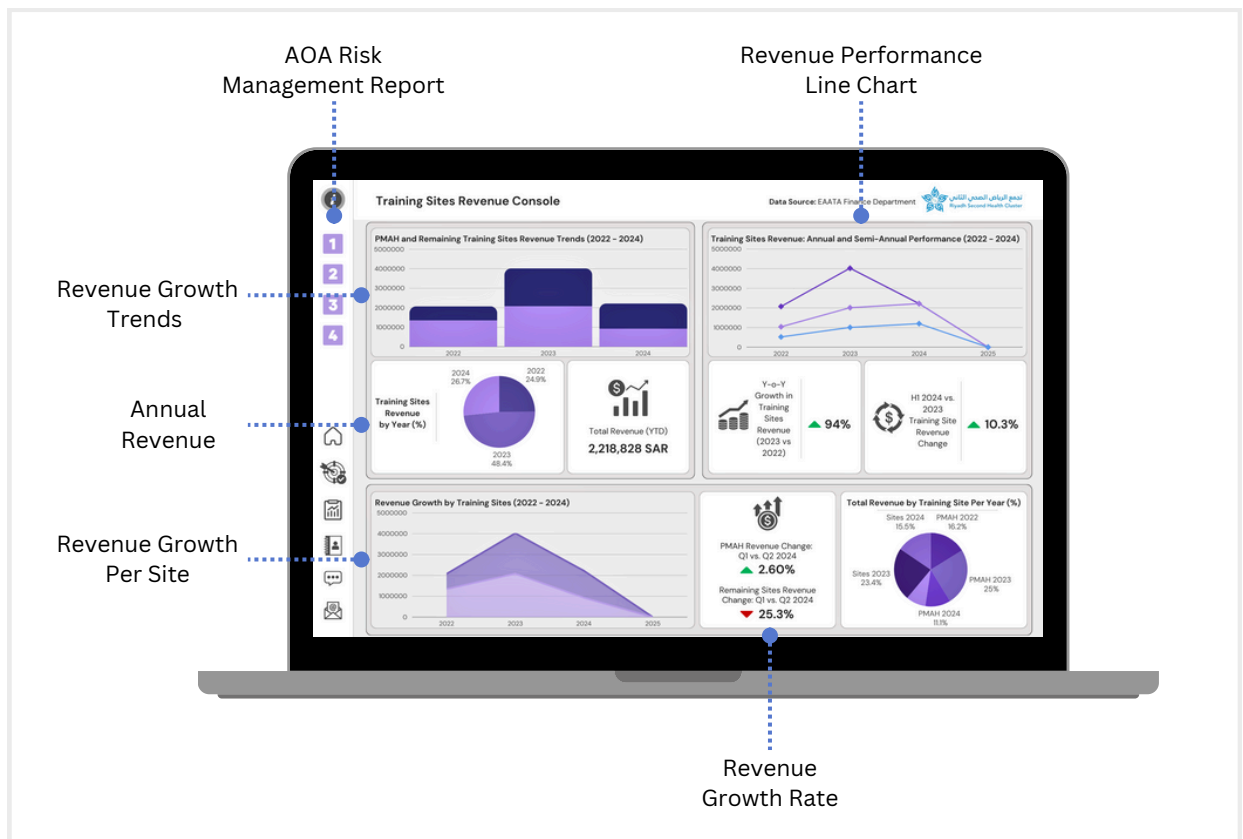

- **Analyze Revenue Generation:** Access detailed data on the revenue generated by the training sites. The console provides a clear breakdown of income sources, enabling the administration to understand the financial contributions of various programs and initiatives.
- **Compare Performance:** Make informed comparisons between different training sites to identify high-performing locations and areas that may need improvement. This feature allows the administration to benchmark performance and allocate resources more effectively.
- **Track Trends Over Time:** Examine revenue trends over multiple years to identify growth patterns and seasonal variations. The console offers historical data analysis, helping the administration to forecast future revenue and plan strategically.
- **Identify Improvement Opportunities:** Gain valuable insights that inform decisions to enhance revenue generation. The console highlights areas with potential for increased income, guiding the administration in implementing targeted strategies to boost financial performance.

Enhance Decision-Making: With comprehensive financial insights, the administration can make data-driven decisions that support the sustainability and growth of training site operations. This includes optimizing pricing strategies, expanding successful programs, and addressing financial challenges proactively.

Overall, the Training Sites Revenue Console is an indispensable tool that empowers the Executive Administration for Academic and Training Affairs to achieve financial excellence, ensuring the continued prosperity and effectiveness of their training sites.

Illustration of Training Sites Revenue Console Key Features:

Academic Administration Map

Navigate the Expertise

The Academic Administration Map serves as your essential guide to the eight key divisions within the Executive Administration for Academic and Training Affairs. Each administration plays a vital role in driving excellence across our network of training sites within the Riyadh Second Health Cluster.

Our Guiding Pillars:

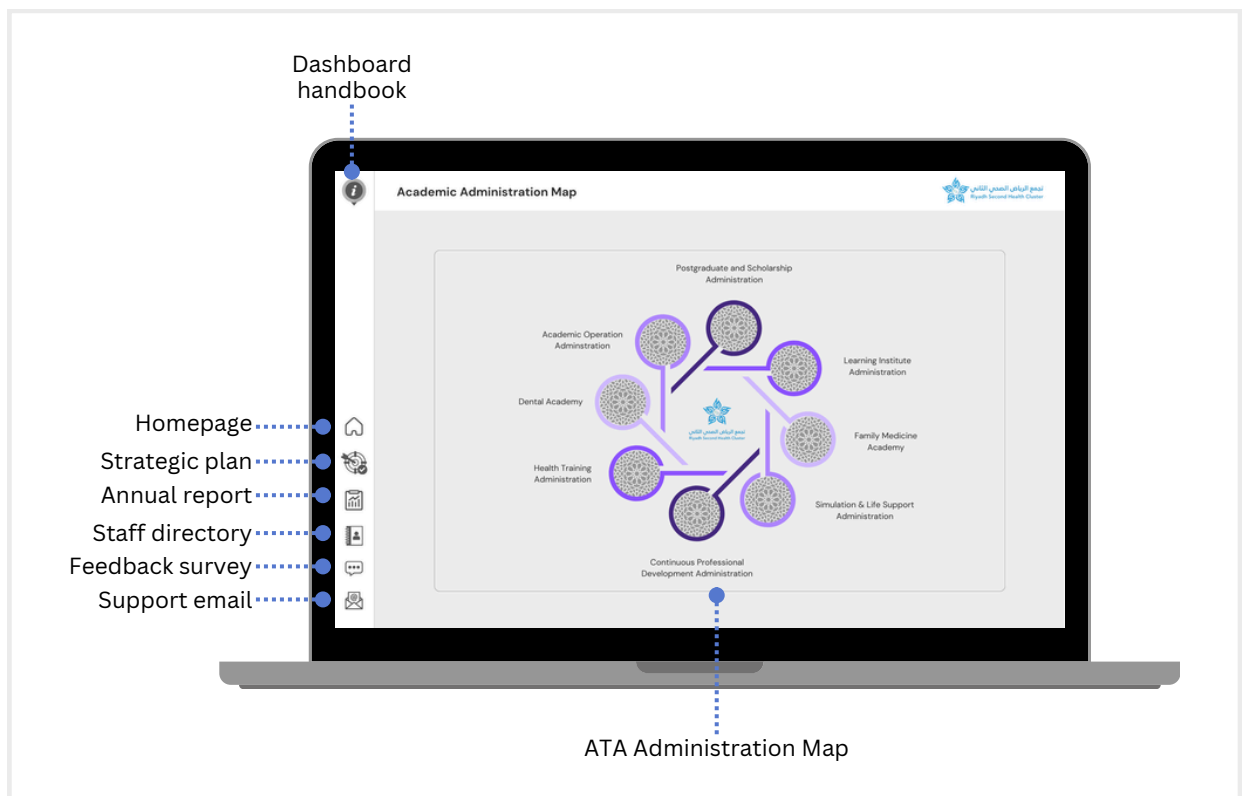

These core administrations provide the foundation for our initiatives.

- **Postgraduate and Scholarship Administration:** Oversees postgraduate training programs and scholarship opportunities, empowering healthcare professionals to pursue advanced education and expertise.
- **Learning Institute Administration:** Provides comprehensive training programs and resources, ensuring healthcare professionals acquire the knowledge and skills necessary for continuous learning and professional development.
- **Continuous Professional Development (CPD) Administration:** Champions the ongoing learning of healthcare professionals by offering a comprehensive range of CPD programs aligned with the SCFHS guidelines.
- **Simulation & Life Support Administration:** Leads the development and delivery of high-fidelity simulation training and life support courses, enhancing the clinical skills and preparedness of healthcare professionals.
- **Family Medicine Academy:** Focuses on advancing the field of family medicine by offering specialized training programs and fostering a robust network of family medicine practitioners.
- **Allied Health Training Administration:** Provides comprehensive training programs for allied health professionals, ensuring a skilled and dedicated workforce to support patient care across diverse healthcare settings.
- **Dental Academy:** Spearheads the development of dental professionals through specialized training programs and initiatives, promoting a robust dental workforce.
- **Academic Operations Administration:** Provides essential oversight and support for the smooth operation of all academic activities and training programs across the cluster.

Strategic Alignment:

Comprised of various departments, these eight core administrations work in close collaboration. They ensure the effective execution and operation of training initiatives across all cluster-wide training sites. Their combined efforts contribute to achieving the overarching strategic objectives of the Riyadh Second Health Cluster, ultimately elevating the quality of healthcare workforce.

Scholarship and Training Analytic Console

Optimizing Performance

The Scholarship and Training Analytic Console empowers you with a comprehensive view of the performance of scholarships, SCFHS and hospital-based training programs, and trainees, enabling informed decision-making. This dynamic tool provides insightful data on a monthly and quarterly basis, enabling you to track progress, identify trends, and optimize training initiatives.

Unveiling Performance Insights:

Delve deeper into the performance of each affiliated administration. The console presents a tailored set of variables relevant to their specific areas of focus, including (but not limited to):

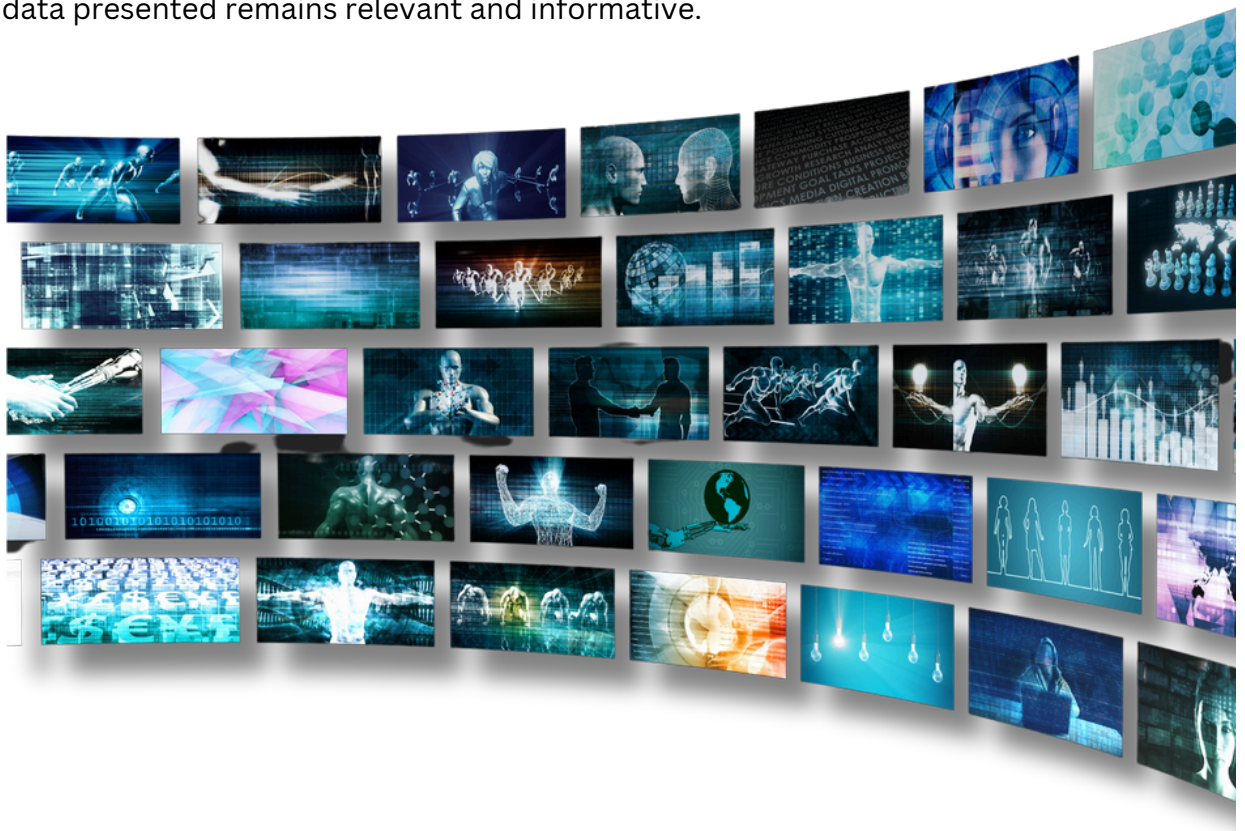

- **Scholarships:** Track scholarship distribution by field, source, and opportunities for modification/upgrade requests (monthly). This includes the percentage breakdown of external and internal scholarships, along with a metric card displaying the total number of scholars and the conversion rate for approved modification/upgrade requests.
- **SCFHS Trainees & Programs:** Analyze the number of SCFHS trainees by month, along with program details categorized by field and category. Metric cards visualize the total number of trainees and programs, along with a breakdown of trainees and programs by field.
- **Hospital-Based Training:** Gain insights into the distribution of hospital-based trainees overseen by training sites, categorized by field and category. The total percentage of hospital-based trainees per field is also displayed. Finally, a metric card highlights the overall number of hospital-based trainees and their growth rate.

At-a-Glance Overview:

This comprehensive analysis empowers stakeholders to monitor scholarship approvals, identify trends in SCFHS training programs and trainee capacity, and optimize hospital-based training delivery. This allows for quick identification of areas requiring further analysis or potential improvement.

Scalable Insights:

The console recognizes the evolving nature of stakeholder needs. It allows for the addition of new variables based on feedback and changing priorities. This ensures the data presented remains relevant and informative.

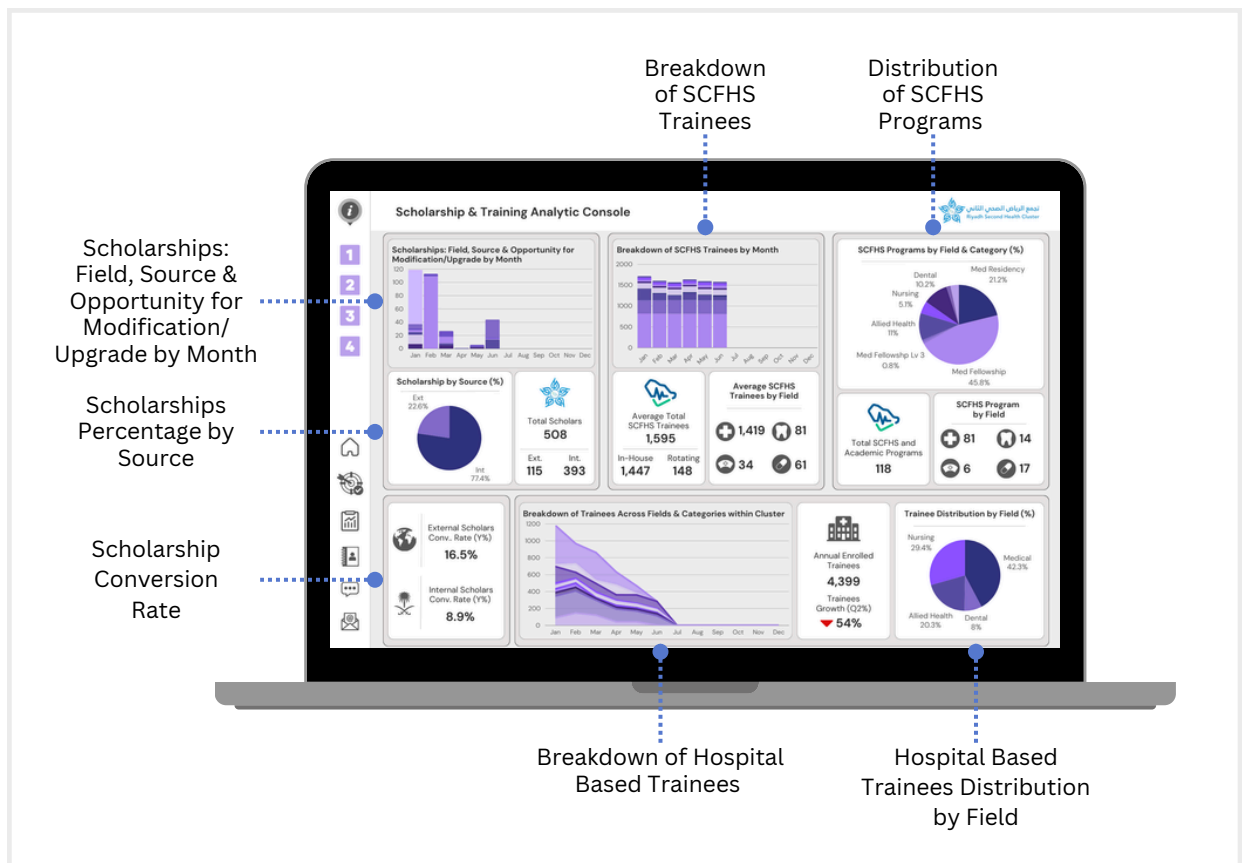

Data-Driven Decision Making:

By leveraging the insights gleaned from the Scholarship and Training Analytic Console, stakeholders can make informed decisions regarding resource allocation, program development, and strategic initiatives. This data-driven approach fosters continuous improvement and ensures the ongoing success of our training programs.

Investing in Excellence:

The Scholarship and Training Analytic Console serves as a powerful tool for optimizing training administration performance. By closely monitoring and analyzing data, we strive to deliver the highest quality training programs and services for healthcare professionals across the Riyadh Second Health Cluster.

Illustration of the Scholarship and Training Analytic Console Key Features:

Training Activities & Service Utilization Analytic Console

Optimizing training effectiveness and maximizing service utilization are crucial for any organization. The Training Activity and Service Utilization Analytic Console within the EAATA Master Dashboard empowers stakeholders with valuable insights to achieve these goals.

Unveiling Performance Insights:

This console sheds light on trends and utilization patterns within training activities and services offered by the organization. Here's a closer look at the key metrics:

- **Training Activities:** Track the distribution of training activities by type each month. This includes a total breakdown by percentage to visualize the focus areas. Additionally, metric cards display the total number of CPD programs and CME hours delivered, along with the monthly growth rate of training activities.
- **Service Utilization:** Analyze the distribution of services received across various categories on a monthly basis. This includes a breakdown percentage for service utilization to understand service popularity. Furthermore, a dedicated metric card highlights the total number of services received, along with the monthly service growth rate.
- **Participants:** Gain insights into participants in training activities each month. This includes a breakdown of the total attendees based on the training type (e.g., CPD, Simulation/Life Support). Dedicated metric cards track the total number of CPD attendees and simulation/life support attendees, along with the monthly growth rate for overall attendance.

Optimizing Training Impact:

The Training Activity and Service Utilization Analytic Console empowers stakeholders to identify popular training activities and services. This allows for adjustments to offerings based on demand, ensuring the organization's training programs effectively meet participant needs. Ultimately, this data-driven approach fosters a more efficient and impactful training ecosystem.

Adapting to Evolving Needs of Scalable Insights:

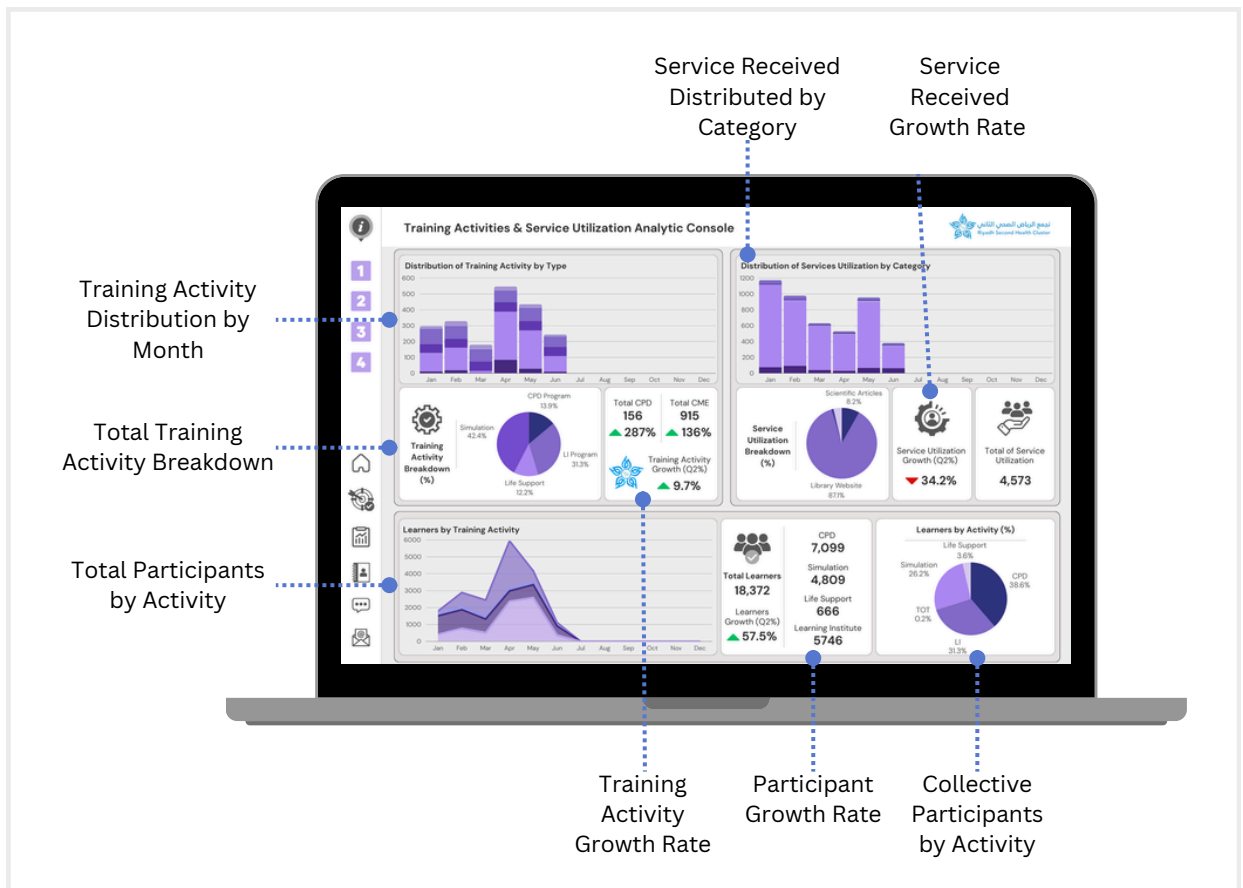

The console recognizes the dynamic nature of stakeholder requirements. It allows for the addition of new variables based on feedback and shifting priorities. This ensures the data presented remains relevant and informative, providing valuable insights for ongoing improvement.

Data-Driven Focus on Training Activities & Service Utilization:

By analyzing trends in training activities and service utilization, stakeholders can make informed decisions regarding resource allocation, program development, and strategic initiatives. This data-driven approach supports continuous improvement and ensures the ongoing success of training activities and service offerings.

Illustration of Training Activities & Service Utilization Analytic Console Key Features:

Operation & Strategy Management Console

Charting the Course to Excellence

The Operation and Strategy Management Console serves as your intelligent companion, empowering the Executive Administration for Academic and Training Affairs to navigate the complexities of data analysis and strategic decision-making. This advanced instrument offers unparalleled visualization and interpretation tools, equipping users to:

- **Visualize Data:** Utilize advanced visualization tools to transform complex data into easily interpretable graphs and charts, making it simpler to identify key insights and trends.
- **Interpret Information:** Leverage sophisticated interpretation tools that provide context and deeper understanding of the data, enabling more accurate and informed strategic planning.
- **Anticipate Trends:** Identify emerging patterns and forecast future performance, allowing you to proactively adapt and optimize training initiatives.
- **Scrutinize Risks:** Gain a comprehensive view of potential risks across all administrations. The console categorizes risks by severity (low, moderate, high, and severe), and tracks their status (open or closed), enabling proactive mitigation strategies.
- **Assess Strategic Impact:** Evaluate the potential effects of various strategic endeavors, encompassing both operational initiatives and quality improvement projects tailored to each administration. Analyze the overall health of projects by tracking their status (total, active, overdue, and completed).

Unveiling a Comprehensive View:

The Operation and Strategy Management Console presents a multifaceted data landscape:

- **Project Performance:** Gain insights into the overall progress of operational and quality projects undertaken by each administration. Track the total number of projects, identify active projects requiring ongoing attention, pinpoint any overdue projects needing prompt action, and celebrate the successful completion of initiatives.
- **Risk Management:** Proactively address potential challenges by leveraging the console's risk assessment capabilities. Identify the total number of risks discovered within the organization, categorized by their severity level. Additionally, the console tracks the status of each risk, clearly differentiating between open risks requiring mitigation and closed risks that have been successfully addressed.

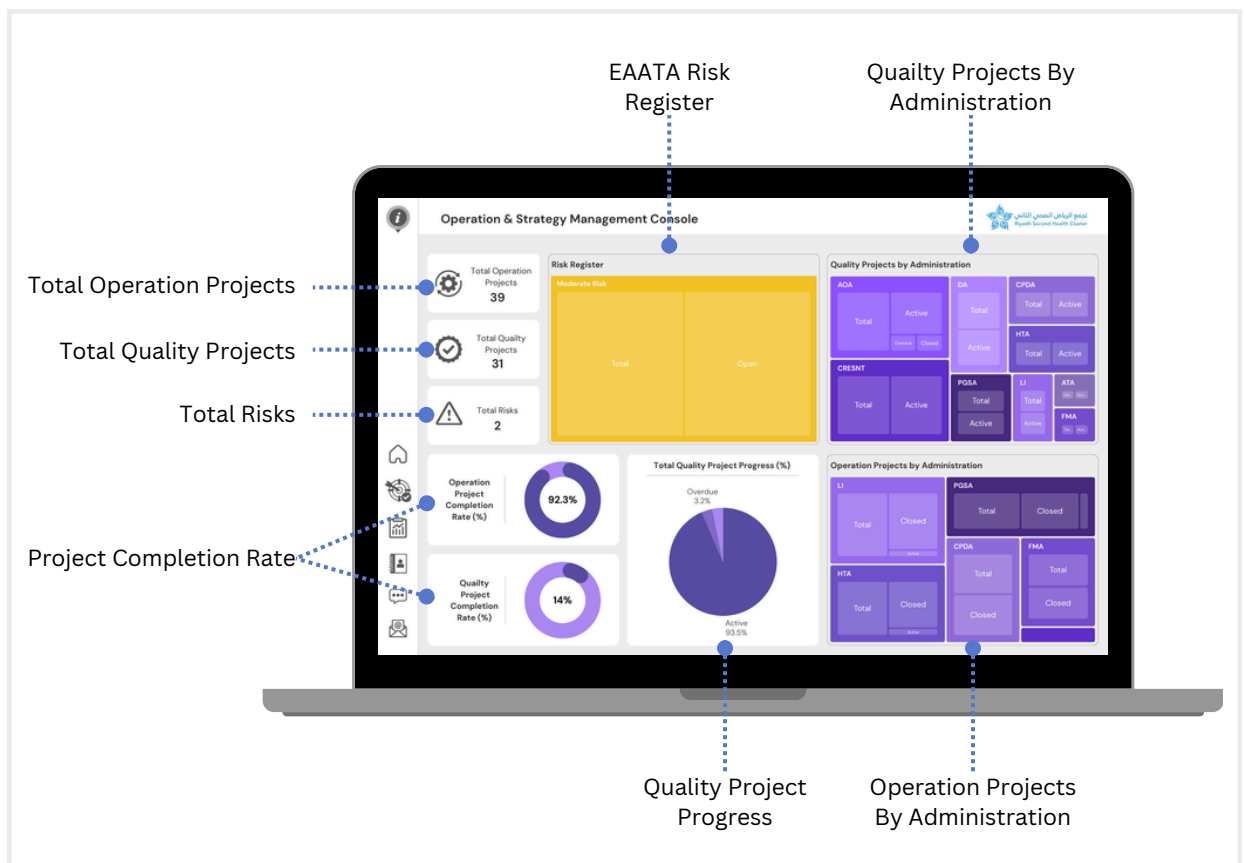

Data-Driven Decisions:

By harnessing the Console, stakeholders can make informed decisions that drive strategic success. This tool enables the anticipation of trends, scrutiny of risks, and assessment of strategic endeavors' impacts, empowering proactive leadership and ensuring the continued excellence of our academic and training programs.

Investing in the Future:

The Console is a cornerstone of our commitment to continuous improvement. By fostering a data-driven culture, we strive to optimize our operations, mitigate risks, and ultimately deliver exceptional training programs that benefit healthcare professionals across the Riyadh Second Health Cluster.

Illustration of the Analytic Key Features:

Beyond The Dashboard

The Power of Detail

While the dashboard highlights critical data for overall performance analysis, its effectiveness hinges on the diligent recording of detailed data within each administration and department. This granular data serves as the foundation for the insights presented on the dashboard.

Here's why detailed data recording remains crucial:

- **In-Depth Investigations:** The dashboard is an excellent tool for initial analysis, but for deeper dives, the underlying detailed data becomes invaluable. It allows you to investigate specific areas requiring further exploration.
- **Performance Optimization:** Granular data enables you to identify specific areas for improvement within each administration. This empowers targeted interventions and continuous performance optimization.
- **Benchmarking and Best Practices:** By capturing detailed data, you can establish benchmarks and identify best practices within your organization. This knowledge fosters a culture of learning and continuous improvement.

Investing in the Future:

The Executive Administration Dashboard, in conjunction with detailed data recording, is a powerful force for achieving excellence. This comprehensive approach empowers data-driven leadership, fosters continuous improvement, and ultimately ensures the success of our academic and training programs.

Remember, the dashboard provides a high-level overview, but the detailed data recorded by each administration and department unlocks a world of rich insights for deeper exploration and optimization.
