9-HI funded by US Air Force & the OUSD Defense Production Act under SBIR and other contracts rolls out next week to increase your R&D success rates 3-fold!

9-HI is a Patent Pending new technology that provides Human-AI collaborative Decision Guidance to achieve greater success in commercialization and Transition.

Traditional Project management addresses Resources and Schedules, 9-HI Addresses Risks and Success.

There are no participation fees for the Beta event (60 days of free usage). As a participant, you will enjoy free usage of the 9-HI Selection & Development Project Modules. They provide you with Human-AI Decision Guidance recommendations designed to maximize your potential for successful investment & deployment of your technology to the US warfighter.

9-HI accomplishes this by providing project management, innovation management, knowledge management, risk management and SOTA Human and AI collaboration all in one platform solely designed to drive success for your product or technology.

visit www.Nine-HI.com to sign up for our Beta program with 2 months completely risk free!

Human-AI teaming to accelerate technology development by reducing investment & dev. risks. ($5.8M invested by US DoD) (120 characters)

9-HI Accelerates technology development and reduces risks to make investments and development activities more successful.

9-HI Directly attacks the "Valley of Death" that currently results in 90% failure of DoD Technology investments.

9-HI Includes 5 custom Decision Guidance Agents now powered by MS GPT pipelines that provide consistent valuable information to the selection and development teams.

9-HI is built top scale across many markets as pretty much everyone wants to leverage new technologies to keep a competitive advantage.

9-HI is the only technology that captures "Institutional Intelligence" by recording/recommending decisions made in context with the Technology & Market Applications.
