SUBJECT: Marcantonio Global (DTIP) Past Performance

Dear Esteemed Future FORUM Participant/Sponsor,

It is with great honor and pride that we introduce Marcantonio Global (DTIP), a technology innovation center that has made significant contributions to advancing US capabilities in critical areas that are crucial to our national security.

Our mission is to identify, evaluate, and bring in technologies for DoD review that have the potential to be breakthrough solutions to address outstanding challenges faced by the Department. Through our innovation scouting efforts, we have identified and brought in a number of breakthrough technologies that have matured into leapfrogging capabilities for the United States.

Our efforts in identifying and bringing in advanced materials and propulsion technologies have contributed to the development of hypersonic weapons, which are essential for both offensive and defensive capabilities. We have also identified and brought in AI technologies that have been integrated into various defense applications, including autonomous systems, data analysis, and decision-making support.

Our efforts in identifying and bringing in quantum computing technologies have contributed to the development of quantum computers that can perform complex calculations and simulations faster than traditional computers.

Additionally, we have strengthened the critical supply chain of silicon carbide advanced production and manufacturing, which is essential for various defense applications.

MARCANTONIO GLOBAL

We are also proud to have made significant contributions to the health and wellness of the warfighter through our breakthrough technology, Policane. This sugar cane extract containing Policosanols has been shown to have numerous health benefits, including reducing LDL cholesterol levels, improving circulation, and reducing inflammation. We plan on integrating Policane into the warfighter's diet, contributing to their overall health and wellness.

We are humbly patriotic and grateful for the opportunity to serve our country through our mission of advancing US capabilities in critical areas that are essential to our national security.

We remain committed to identifying and bringing in breakthrough technologies that can make a positive impact on the defense contested logistics needs of our great nation.

Thank you for your consideration.

Sincerely,

V/r

"I believe we are in one of those pivotal moments where it is vital to throw off old conventions. Our time to innovate is now. If we lose this decade of progress, I don't think we can make up for lost ground." -- Office of Naval Research, Chief RADM Lorin Selby

List of Successful Tech Companies we collaborated over the years:

- American Integrated Circuits, Inc
- SSAI
- Fortem Technologies
- Prescient Edge
- Field Propulsion Technologies
- Geometric Energy Corporation
- Geometric Space Corporation
- Scopeshield Inc
- EneXs Health Solutions LLC
- Darwin AI
- Anzyz Technologies
- Scriptstring LLC
- Coolwise Technologies
- MILCOMM-X Fleet Comms
- C3D Hyper-Dimensionality
- TecSafe Fire Suppression
- E3TEK EMP Immunization
- Lighthouse Ultratech MIL
- AnCom AS Antennas
- Freylit Oil Spill Recovery
- TLEC Propulsion Systems
- WAVETECH Battery CCD
- Skystar Mobile Lighting
- Haven Software "Baxie" AI
- Lattice Energy LENRs
- EnerNOC Microgrids Optimization
- ACARDIOz Health Monitors
- Imagination Engines Advanced AI
- Pesco-Beam Oil Recovery
- Tarendiesel Green Diesel Plant
- WorldERP AI driven ERP solutions
- Anzyz AS OSINT AI systems
- EarthTech Quantum Communications
- BlackFx Blockchain Cybersecurity
- Imagination Engines, Inc.
- Verticon Defense and Security
- CORAS
