P-NFP (PETROCHEM – NO FOAM POWDER)

TECHNICAL DATA

P-NFP is designed for use in slurries that present foaming problems. It is most compatible with all classes of cement, cement extenders and Petrochem cement additives and do not change the slurry properties or the quality of the set cement.

P-NFP is designed to be blended with the cement or dispersed thoroughly in the water before mixing begins or directly to the slurry in the tub as needed. However, P-NFP has a greater capability as an Anti-Foam Agent when dry blended or added to the mix water.

P-NFP is normally used at concentrations of 0.2% BWOC however in some slurries a higher concentration may be necessary.

PROPERTIES

<u>PRODUCT</u>	<u>FORM</u>	<u>SP.GR.</u>	<u>PACKAGING</u>
P-NFP	Tan Powder	1.5	50 Lbs. /sack.

SAFETY

Read the SDS before use.
