

P-XCA2

CEMENTING SERVICE BULLETIN

1/10/22

P-XCA2 (PETROCHEM – LOW TEMPERATURE EXPANDING CEMENT ADDITIVE)

TECHNICAL DATA

P-XCA2 provides early expansion of the set cement, improved bonding for better zonal isolation, prevents cement volume losses (due to shrinkage), reduces pipe corrosion and scale build-up and provides a positive seal to the pipe and formation. It also helps to prevent fluid and gas migration in the well bore and is compatible with all API cements, other additives and has little effect on viscosity and/or thickening time.

PRINCIPAL USES

- P-XCA2: Applicable Temperature Range is <200°F
- P-XCA4: Applicable Temperature Range is 200-400°F

DOSAGE

- Concentrations of 5% to 30% by weight of cement, cement type and slurry design.
- Both P-XCA2 & P-XCA4 are available in 40 X 50 LB. sacks per pallet.

PROPERTIES

<u>PRODUCT</u>	<u>FORM</u>	<u>SP.GR.</u>	<u>PACKAGING</u>
P-XCA2	Tan Powder	3.35	5 Gal. Pails / 50 lb. Sacks

SAFETY

Read the SDS before use.
