

FASHION AND THE AUTOMOBILE

Fashion and the Automobile is a touring exhibit that highlights the many changes wrought on popular culture by the evolution of the car.

The exhibit is a virtual drive down memory lane, showcasing the relationship between fashion and automotive design by decade, and how both were influenced by function, environment, lifestyle, and world events.

The fashion and accessories in the exhibit are authentic. The automobiles are depicted by automotive artists' work in original fine art, photographs & renderings.

Pay attention to the "U-turns" each decade takes as "what's old becomes new again".

"Fashion and automobiles are both about identity. They show who you are, and who you want to be."
- Karl Lagerfeld

"Fashion is not something that exists in dresses only. Fashion is in the sky, in the street, fashion has to do with ideas, the way we live, what is happening."
