

Privacy Policy

Effective date: May 28, 2026

TranscriptToOutline is a Chrome extension that converts video transcripts into AI-generated study outlines. This policy explains exactly what data we collect, why, and how it is handled.

1. Data We Collect

Data	Where it lives	Why we collect it
License key	Your browser (chrome.storage.local) and our server (Cloudflare KV)	To verify your subscription and track monthly usage
Email address	Our server (Cloudflare KV)	Obtained from your purchase via LemonSqueezy at activation; used to identify your account
Plan type & monthly usage count	Our server (Cloudflare KV)	To enforce your plan's monthly outline limit and display your usage in the popup
Transcript text	Not stored — processed in transit only	Extracted from the current page and sent to our server, which forwards it to the Anthropic Claude API to generate your outline. Neither we nor Anthropic retain this text after the response is returned.

2. Data We Do Not Collect

- Browsing history or the URLs of pages you visit
- The content of pages where you do *not* click Generate Outline
- The outlines we generate for you

- Any information about you beyond your license email and usage count
- Cookies, device identifiers, or analytics

3. How Transcript Text Is Handled

When you click **Generate Outline**, the extension extracts transcript text from the current page and sends it to our Cloudflare Worker over HTTPS. The Worker forwards the text to the Anthropic Claude API to produce the outline, then streams the result back to your browser. The transcript text is **not logged, stored, or used for any purpose beyond generating your outline.**

Anthropic's data handling for API requests is governed by [Anthropic's Privacy Policy](#). Anthropic does not use API inputs to train their models by default.

4. Third-Party Services

Service	Purpose	Data shared
LemonSqueezy	Payment processing and license key generation	Name, email, and payment information — governed by LemonSqueezy's own privacy policy
Anthropic	AI outline generation (Claude API)	Transcript text submitted for outline generation only
Cloudflare	Backend hosting (Workers) and license storage (KV)	License key, email, plan, and usage count

5. Data Retention

- **License key** (local): stored in your browser until you click Deactivate License or uninstall the extension.
- **License record** (server): retained in Cloudflare KV for as long as your license is active. You may request deletion by contacting us.
- **Transcript text**: never stored. It exists only in memory during the API request and is discarded once your outline is returned.

6. Data Security

All communication between the extension and our server is encrypted via HTTPS. Your license key is stored locally in Chrome's sandboxed `chrome.storage.local`, which is inaccessible to web pages.

Server-side secrets (API keys, admin credentials) are stored as encrypted environment variables in Cloudflare and are never embedded in the extension package.

7. Your Rights

You may at any time:

- **Access** the data we hold about you by contacting us with your license key or email address.
- **Delete** your license record from our servers by contacting us. This will deactivate your license.
- **Remove** locally stored data by clicking Deactivate License in the extension popup, or by uninstalling the extension.

8. Children's Privacy

TranscriptToOutline is not directed at children under 13. We do not knowingly collect personal information from children.

9. Changes to This Policy

If we make material changes to this policy, we will update the effective date at the top of this page. Continued use of the extension after changes constitutes acceptance of the updated policy.

10. Contact
