

About the Video

Näkki Out of the Water

Water is the source of all life. When Näkki, a Finnish water sprite, comes Out of the Water, the Green World is endangered. Will the Queen be released from the monster? Can the Dragonflies fulfill their quest?

This 15-minute video was created of the workshopped version of *Näkki Out of the Water* in 2022 by videographer Jim Yocum. Since that time, with the generous support of Finlandia Foundation, the operetta has been expanded to its present full-length.

An up-to-date video will be posted when one becomes available.
