

The A+ Teacher

A POSITIVE APPROACH TO CLASSROOM MANAGEMENT

Managing a group of curious minds, with unique personalities and individualized needs, is no easy feat!

Classroom management has no proven success model... or does it?

Applied Behavior Analysis (ABA)

involves applying the principles of behavior to produce measurable change to socially significant issues and has over 30 years of research that has demonstrated the efficacy of ABA methods in reducing inappropriate behavior and increasing communication, learning and positive social behavior.

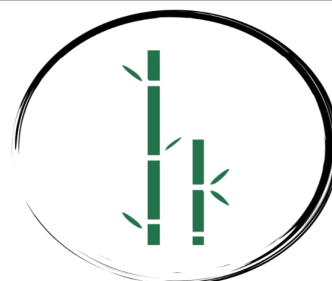

The A+ Teacher course focuses on *antecedent and proactive* measures (hence the name, A+) and dives into the fundamentals of ABA in a way that is both digestible and useful.
