

Commercial Solar Financing

Financing a sustainable tomorrow

greenpennySM

Harnessing the Power of the Sun for Businesses Small and Large

Reduce energy consumption from the grid and save money. Solar energy generating systems are efficient, low maintenance, and last a long time. Power your business with clean energy that protects our planet for future generations.

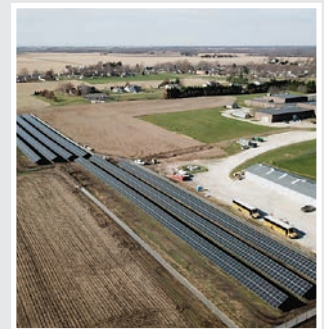

SAVE

- ✓ By installing solar, depreciation and a 26% Federal Tax Credit can be claimed. Consult your tax advisor.
- ✓ The immediate reduction in monthly electricity spending is usually enough to cover the solar loan payment.

“They have been refreshingly easy to do business with – more like a community bank rather than our current big bank, which was not helping us grow our business.”

- **Anthony Fotopoulos and William DePhillipo**
Co-Founders of Keystone Power Holdings, LLC

Swap your monthly utility bill for a monthly solar payment.

- ✓ Up to 100% financing available based on cash flow.*
- ✓ Flexible community bank with custom underwriting.
- ✓ No prepayment penalty.
- ✓ Fixed interest rates available – so you're protected from an increase in payment costs.
- ✓ Arrange financing now and schedule your project with confidence!
- ✓ Residential solar financing also available.
