

# ESTIMATE

This preliminary estimate is for simple swimming pool and spa projects only. A simple swimming pool design is based on the following:

## **BASE COST FOR ONE RESIDENTIAL SIMPLE SWIMMING POOL and SPA**

DWIS residential pricing is based on a minimum of \$450.00 plus tax for the first four (4) hours and \$99.00 plus tax for every hour after. Time to execute observation reports will be factored in times.

### **INCLUSIONS:**

- Observation Report
- Pressure Test of All Accessible Zones (See Exclusions).
- Dye Testing of All Accessible Zones (See Exclusions).  
(Accessible Zone meaning covers and fittings can be removed and/or openings allow for pressure testing by Durawise Industry Services).
- Filter Pump Quantity: One (1)
- Polaris Pump Quantity: One (1)
- Pool Lines Quantity Going into Ground: Six (6)
- 2" Pool Lines or Less (One or Two Three Inch Lines are Fine-Special Plugs)

### **ADD COSTS**

There are some additional charges that will result in additional fees plus applicable tax:

- 1) O-rings for Leaking Valves (Required to Change for Testing): \$ 21.00 plus tax
- 2) Yellow Algae Present: (Requires Wet Suit Cleaning Fee): \$ 25.00
- 3) Wet Suit Charge (Water temperatures below 70 degrees Fahrenheit or requiring a wet suit to enter)
- 4) Temporary Putty Patching (Cost based on Job)
- 5) Specialty Feature Testing (Price based on project)
- 6) Additional Pump/Line Testing ( \$ 7.50 - \$ 58.00 +tax per zone)
- 7) Water Monitoring Services (\$ 75+ tax per mode run- min. 2)
- 8) Invasive Locates (Price based on project)
- 9) 3"+ Lines (Priced based on project)
- 10) Cutting Fees (Priced based on project. Minimum \$25.00 +tax)

DWIS reserves the right to revise or update pricing by written notice. DWIS reserves the right to refuse service. This pricing is only for simple swimming pools and spas.

### **EXCLUSIONS:**

- Replacement of Aged Fittings (Aged plastic, metal, etc -Integrity to handle changes)
- Basins (Lower and Upper) Needs more time.
- Additional Pumps
- Durawise Industry Services defined specialty features and fixtures. This includes, but is not limited too: Rock water feature fountains, fiberglass fountains, shear descents, scupper fountains, deck sprayers, toy features, slides, statues, sprayers/nozzles, in-floor valve systems, cannisters, paramount/caretaker/similar systems, slides, bench venturi systems (small openings), overhead canopy fountains systems, storage tanks, reservoirs, hot tub poured in place fittings in spas, metal fittings set in plaster, seized fittings and fixtures that cannot be removed and other features outside of basic pools fittings/fixtures, backwash line testing, auto fill line testing, equalizer lines, venturi skimmers, etc.
- Commercial/ Multi-Family/ HOA Pools/Interior Residential fall under different pricing.

### **INVOICING:**

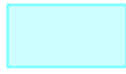

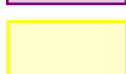

If applicable, all invoices will be sent containing the observation report and/or repair closeout. This is DWIS record systems. Anything sent outside of this delivery method, should be considered unofficial.

# Durawise Industry Services

## Base Trip Fee Per Area Map

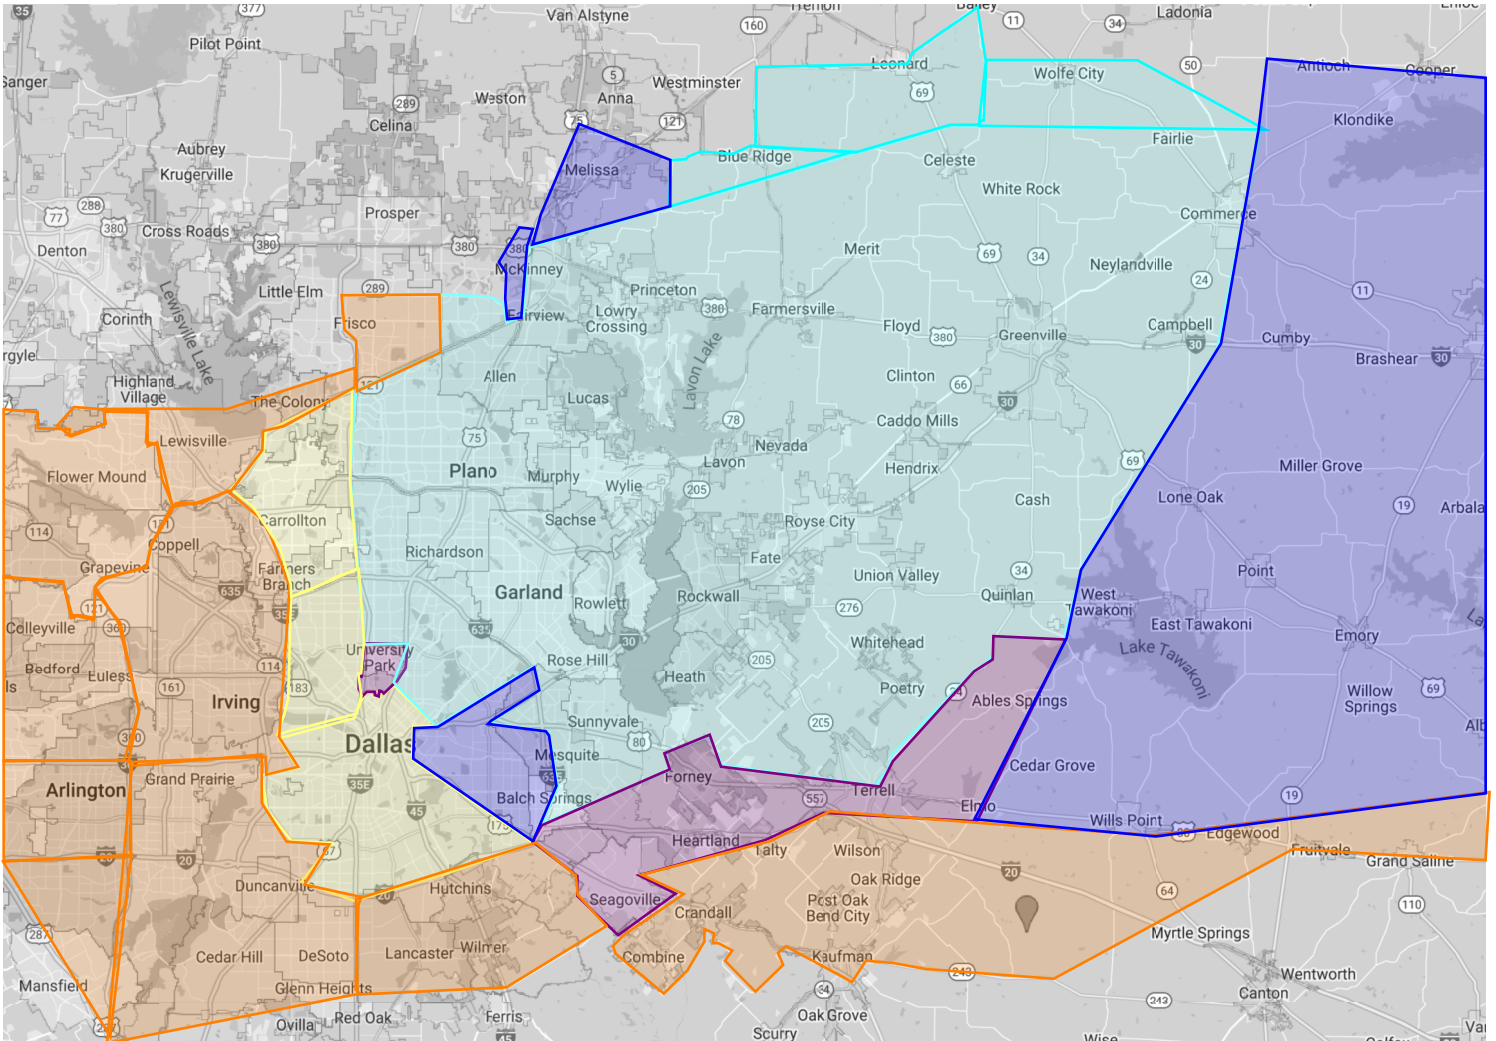

### Legend (Highlighted)

See Map Below

-  Standard Service Area
-  \$ 50.00 Additional Travel Charge Per Day
-  \$ 75.00 Additional Travel Charge Per Day
-  \$ 100.00 Additional Travel Charge Per Day
-  \$ 3.50 Per Mile From Greenville, Texas (Driving Distance) Additional Cost

This map represents DWIS service area and areas DWIS is willing to service for additional compensation. If an area is not highlighted it should be considered excluded from DWIS service area.

These prices will be added to the leak detection charges.

**Cancellation Fees:** The following cancellation fees apply: Projects canceled before 48 hours of the project will not be charged. There will be a \$ 50.00+tx cancellation fee if project is canceled within 48 hours of the project. If DWIS has mobilized and enroute the project a trip charge will apply.

### Trip Charge:

There will be a trip charge of \$ 150.00 plus tax and plus the fees shown above if any of the following occurs:

There is no access to the site, dogs are in the yard without supervision, and/or verification of site cannot be made. DWIS will give fifteen minutes from the time your office is contacted to resolve the situation. This has been put in place due to disorganized pool companies and to stop wasted trips/time by poor planning.

### Ways to avoid Additional Trips Base Fees and Charges:

- 1) Clean and clear pools.
- 2) Fill pools to normal operating levels and have the pool running before we show up.
- 3) If a green to clean has been executed, the pool needs to have at least 6 cycles of run time for the filter to have time to filter the water.
- 4) Be sure all rocks and grates for basins and other areas have been removed and basins have been vacuumed.
- 5) Be sure guard shacks have been notified, access codes have been provided, and verification with homeowner has been made.
- 6) Do not cap lines, nor shut off pool, unless absolutely necessary. If you must, let homeowner know that while it will save them on fill in the blank \_\_\_\_\_ (water costs, flooding of yards, chemicals, etc.) Location cost times could be extended.
- 7) Be sure that the pool control panel and/or power source switch to equipment is accessible to DWIS at time of leak detection.
- 8) Metal valves at equipment and/or cheap ball valves can impede a pressure test.
